

CYBER HORNET S&P 500® AND BITCOIN 75/25 STRATEGY ETF

a series of ONEFUND TRUST

Ticker: ZZZ Listed on: NASDAQ

STATEMENT OF ADDITIONAL INFORMATION

July 31, 2024

This Statement of Additional Information (the “SAI”) describes CYBER HORNET S&P 500® and Bitcoin 75/25 Strategy ETF (the “Fund”), a series of ONEFUND TRUST (the “Trust”). The Trust is a registered open-end investment company.

The Fund constitutes a separate investment portfolio with distinct investment objectives and policies. The Distributor, as defined below, does not sell shares to the public. Shares are distributed to Authorized Participants which are then used to make a market for public consumption.

This Statement of Additional Information (“SAI”) is not a prospectus and should be read in conjunction with the Prospectus of the CYBER HORNET S&P 500® and Bitcoin 75/25 Strategy ETF (the “Fund”), dated July 31, 2024 as may be supplemented from time to time (the “Prospectus”). Capitalized terms used herein that are not defined have the same meaning as in the Prospectus, unless otherwise noted. A copy of the Prospectus may be obtained without charge, by writing the Fund’s distributor, Foreside Fund Services, LLC, a wholly owned subsidiary of Foreside Financial Group, LLC (doing business as ACA Group), (the “Distributor”), at Three Canal Plaza, Suite 100, Portland, Maine 04101 or by visiting the Fund’s website at www.CyberHornetETFs.com or by calling 1.844.282.3837 (1.844.BTC.ETFs).

GENERAL INFORMATION

The CYBER HORNET S&P 500[®] and Bitcoin 75/25 Strategy ETF (the “Fund”) is a separate series of ONEFUND TRUST an open-end management investment company that was organized as a trust under the laws of the State of Delaware on November 9, 2005 (the “Trust”). The Trust was previously known as “Giant 5 Funds,” and changed its name to “Index Funds” in February 2014. The Trust changed its name from “Index Funds” to “ONEFUND Trust” in February 2023.

The investment objective of the Fund is to provide investment results that, before fees and expenses, correspond generally to the performance of the S&P 500[®] and S&P CME Bitcoin Futures Index 75/25 Blend Index (the “Index”). The Fund’s investment objective may be changed without the consent of the shareholders of the Fund. The Fund is diversified, as that term is defined in the Investment Company Act of 1940, as amended (the “1940 Act”).

The Fund will offer and issue shares at net asset value (“NAV”) only in aggregations of a specified number of shares (each a “Creation Unit” or a “Creation Unit Aggregation”). The shares of the Fund are collectively referred to as the “Shares” in this SAI. The Fund’s Shares are listed and traded on The NASDAQ Stock Market LLC (the “Exchange”). Fund Shares will trade on the Exchange at market prices that may be below, at or above NAV. Shares are redeemable only in Creation Unit Aggregations and generally in exchange for portfolio securities held by the Fund and/or a specified cash payment.

In the event of the liquidation of the Fund, the Trust may lower the number of Shares in a Creation Unit. The Trust reserves the right to permit or require a full or partial “cash” option for creations and/or redemptions of Fund Shares. Fund Shares may be issued in advance of receipt of a basket of securities and other investments (“Deposit Instruments”) included in the Fund’s Index subject to various conditions. In each instance of such cash creations or redemptions, transaction fees may be imposed that will be higher than the transaction fees associated with in-kind creations or redemptions. In all cases, such fees will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities.

BITCOIN FUTURES, BITCOIN, THE BITCOIN NETWORK, AND THE BITCOIN PROTOCOL

The price of Bitcoin futures is based on the expected price of Bitcoin on certain exchanges at a future date, specifically, the expiration date of the Bitcoin futures contract. Bitcoin futures prices are based on the Bitcoin Reference Rate, which reflects the price of Bitcoin on certain exchanges only, and not the Bitcoin cash market.

Although the Fund does not invest in Bitcoin, events impacting the price of Bitcoin across all Bitcoin trading venues could impact the price and market for Bitcoin futures, and therefore the performance of the Fund.

The liquidity of the market for Bitcoin futures depends on, among other things: the supply and demand for Bitcoin futures; the supply and demand for Bitcoin; the adoption of Bitcoin for commercial uses; the anticipated increase of investments in Bitcoin-related investment products by retail and institutional investors; speculative interest in Bitcoin, Bitcoin futures, and Bitcoin-related investment products; regulatory or other restrictions on investors’ ability to invest in Bitcoin futures; and the potential ability to hedge against the price of Bitcoin with Bitcoin futures (and vice versa).

The market for Bitcoin futures may be illiquid. This means that the Fund may not be able to buy and sell Bitcoin futures quickly or at the desired price. For example, it is difficult to execute a trade at a specific price when there is a relatively small volume of buy and sell orders in a market. A materially adverse development in one or more of the factors on which the liquidity of the market for Bitcoin futures depends may cause the market to become illiquid, for short or long periods. In such markets, the Fund may not be able to buy and sell Bitcoin futures quickly (or at all) or at the desired price. Market illiquidity may cause losses for the Fund. Additionally, the large size of the futures positions which the Fund may acquire increases the risk of illiquidity, as larger positions may be more difficult to fully liquidate, may take longer to liquidate, and, as a result of their size, may expose the Fund to potentially more significant losses while trying to do so. Limits imposed by counterparties, exchanges or other regulatory organizations, such as accountability levels, position limits and daily price fluctuation limits, may contribute to a lack of liquidity with respect to some financial instruments and have a negative impact on Fund performance. During periods of market illiquidity, including periods of market disruption and volatility, it may be difficult or impossible for the Fund to buy or sell futures contracts or other financial instruments.

The contractual obligations of a buyer or seller holding a futures contract to expiration may be satisfied by settling in cash as provided by the terms of such contract. However, the Fund does not intend to hold Bitcoin futures through expiration. Instead, the Fund intends to “roll” futures positions. “Rolling” refers to a process whereby futures contracts nearing expiration are closed out and replaced with identical futures contracts with a later expiration date. Accordingly, the Fund is subject to risks related to rolling.

When the market for certain futures contracts is such that the prices are higher in the more distant delivery months than in the nearer delivery months, the sale during the course of the “rolling process” of the more nearby Bitcoin futures would

take place at a price that is lower than the price of the more distant Bitcoin futures. This pattern of higher futures prices for longer expiration Bitcoin futures is often referred to as “contango.” Alternatively, when the market for certain Bitcoin futures is such that the prices are higher in the nearer months than in the more distant months, the sale during the course of the rolling process of the more nearby Bitcoin futures would take place at a price that is higher than the price of the more distant Bitcoin futures. This pattern of higher future prices for shorter expiration Bitcoin futures is referred to as “backwardation.”

There have been extended periods in which contango or backwardation has existed in certain futures markets in general. Such periods could occur in the future for Bitcoin futures and may cause significant and sustained losses. Additionally because of the frequency with which the Fund may roll futures contracts, the impact of contango or backwardation on Fund performance may be greater than it would have been if the Fund rolled futures contracts less frequently.

The CME has established margin requirements for Bitcoin futures at levels that may be substantially higher than the margin requirements for more established futures contracts. FCMs utilized by the Fund may impose margin requirements in addition to those imposed by the exchanges. Margin requirements are subject to change, and may be raised in the future by the exchanges and the FCMs. Margin Requirements may be more likely to change during periods of high volatility. High margin requirements could prevent the Fund from obtaining sufficient exposure to Bitcoin futures and may adversely affect its ability to achieve its investment objective. An FCM’s failure to return required margin to the Fund on a timely basis may cause such Fund to delay redemption settlement dates and/or restrict, postpone or limit the right of redemption.

The term “margin” refers to the minimum amount the Fund must deposit and maintain with its FCM in order to establish an open position in futures contracts. The minimum amount of margin required in connection with a particular futures contract is set by the exchange on which such contract is traded and is subject to change at any time during the term of the contract. FCMs may require customers to post additional amounts above the required minimums. Futures contracts are customarily bought and sold on margins that represent a percentage of the aggregate purchase or sales price of the contract.

In addition, FCMs utilized by the Fund may impose limits on the amount of exposure to futures contracts the Fund can obtain through such FCMs. As a result, the Fund may need to transact through a number of FCMs to achieve its investment objective. If enough FCMs are not willing to transact with the Fund, or if exposure limits imposed by such FCMs do not provide sufficient exposure, the Fund may not be able to achieve its investment objective.

There may be circumstances that could prevent or make it impractical for the Fund to operate in a manner consistent with its investment objective and investment strategies.

The price of Bitcoin has experienced periods of extreme volatility. The price of Bitcoin may change dramatically and without warning. This volatility is due to a number of factors, including the supply and demand for Bitcoin, concerns about potential manipulation of the price of Bitcoin and the safety of Bitcoin, market perceptions of the value of Bitcoin as an investment, continuing development of the regulations applicable to Bitcoin, and the changes exhibited by an early-stage technological innovation.

It is believed that speculators and investors who seek to profit from trading and holding Bitcoin currently account for a significant portion of Bitcoin demand. Such speculation regarding the potential future appreciation in the price of Bitcoin may artificially inflate or deflate the price of Bitcoin. Conversely, evolving government regulation, the perception of onerous regulatory actions, concerns over the potential for fraud and manipulation of the price of Bitcoin and other factors may cause a drop in the price of Bitcoin. Developments related to the Bitcoin Network’s operations, also contribute to the volatility in the price of Bitcoin. These factors may continue to cause the price of Bitcoin to be volatile, which may have a negative impact on the performance of the Bitcoin futures and on the performance of the Fund.

The trading of Bitcoin is fragmented across numerous trading venues. The fragmentation of the volume of Bitcoin transactions across multiple trading venues can lead to a higher volatility than would be expected if volume was concentrated in a single trading venue. Market fragmentation and volatility increases the likelihood of price differences across different trading venues.

Market participants trading Bitcoin futures may seek to “hedge” or otherwise manage their exposure to such contracts by taking offsetting positions in Bitcoin. Fragmentation may require market participants to analyze multiple prices, which may be inconsistent and quickly changing. Fragmentation also may require market participants to potentially fill their positions through a number of transactions on different exchanges. These factors potentially increase the cost and uncertainty of trading Bitcoin and may decrease the effectiveness of using transactions in Bitcoin to help manage or offset positions in Bitcoin futures. Market participants who are unable to fully or effectively manage or hedge their positions in Bitcoin futures

typically would be expected to widen the bid-ask spreads on such contracts, which could potentially decrease the trading volume and liquidity of such contracts and have a negative impact on the price of such contracts.

Bitcoin, the Bitcoin Network, and the Bitcoin Protocol

Bitcoin, the Bitcoin Network and Bitcoin trading venues are relatively new and not subject to the same regulations as regulated securities or futures exchanges. Bitcoin exchanges that are regulated typically must comply with minimum net worth, cybersecurity, and anti-money laundering requirements, but are not typically required to protect customers or their markets to the same extent that regulated securities exchanges or futures exchanges are required to do so. As a result, markets for Bitcoin may be subject to manipulation or fraud and may be subject to larger and/or more frequent sudden declines than assets traded on more traditional exchanges. Investors in Bitcoin may lose money, possibly the entire value of their investments.

There is no central registry showing which individuals or entities own Bitcoin or the quantity of Bitcoin that is owned by any particular person or entity. It is possible that a small group of early Bitcoin adopters hold a significant proportion of the Bitcoin that has been thus far created. There are no regulations in place that would prevent a large holder of Bitcoin or a group of holders from selling their Bitcoins, which could depress the price of Bitcoin, or otherwise attempting to manipulate the price of Bitcoin or the Bitcoin Network.

Events could adversely affect the price of Bitcoin, reduce user confidence in Bitcoin, the Bitcoin Network and the fairness of the venues for trading Bitcoin and slow (or even reverse) the further adoption of Bitcoin.

Malicious actors could theoretically structure an attack whereby such actors gain control of more than half of the Bitcoin Network's processing power, or "aggregate hashrate." If a malicious actor or group of actors acquired a hashrate exceeding the rest of the Bitcoin Network, it would be able to exert unilateral control over the addition of blocks to the Bitcoin Blockchain. This would allow a malicious actor to engage in "double spending" (i.e., use the same Bitcoin for two or more transactions), prevent other transactions from being confirmed on the Bitcoin Blockchain, or prevent other miners from mining any valid new blocks. Each of the events described above, among other things, could adversely affect the price of Bitcoin; reduce user confidence in Bitcoin, the Bitcoin Network and the fairness of Bitcoin trading venues; and slow (or even reverse) the further adoption of Bitcoin.

The Bitcoin Protocol was built using open source software by a small group of developers known as the "Bitcoin Core" (as defined herein) who help develop and maintain the original version of Bitcoin, the underlying asset upon which Bitcoin futures are based. The open source nature of the Bitcoin Protocol permits any developer to review the underlying code and suggest changes to it via "Bitcoin Improvement Proposals", or "BIPs." If accepted by a sufficient number of miners, BIPs may result in substantial changes to the Bitcoin Network, including changes that result in "forks" (as described herein). The Bitcoin Network has already experienced two major forks after developers attempted to increase transaction capacity. Blocks mined on these new "forked" networks now diverge from blocks mined on the original Bitcoin Network maintained by the Bitcoin Core, resulting in the creation of two new blockchains whose digital assets are referred to as "Bitcoin Cash" and "Bitcoin Gold." Bitcoin, Bitcoin Cash and Bitcoin Gold now operate as separate, independent networks. Multiple BIPs still exist, many of which are aimed at increasing the transaction capacity of the Bitcoin Network, and it is possible that one or more of these BIPs could result in further network forks. It is possible that the price of the Bitcoin futures subsequent to a "fork" may be linked to the price of Bitcoin on only one of the resulting Bitcoin Networks, rather than the aggregate price of Bitcoin on all resulting Bitcoin Networks.

The CME considers a hard fork of the Bitcoin Blockchain where both forks continue to be actively mined and traded but may not be fungible with each other, as an unusual and extreme circumstance. The CME has determined, in the event of a hard fork or other circumstance in which the split of Bitcoin is expected, CME shall decide what action to take to align Bitcoin futures exposure with cash market exposures, as the CME deems appropriate.

It is possible that, notwithstanding the protocols implemented to attempt to address the impact of forks on Bitcoin futures, forks and similar events could have an adverse effect on the price of Bitcoin and the Bitcoin futures in which the Fund invests and may adversely affect an investment in the Fund. The price of Bitcoin is highly volatile, which could have a negative impact on the price and trading of Bitcoin futures and the performance of the Fund.

It is believed that speculators and investors who seek to profit from trading and holding Bitcoin currently account for a significant portion of Bitcoin demand. Such speculation regarding the potential future appreciation in the price of Bitcoin may artificially inflate or deflate the price of Bitcoin. Conversely, evolving government regulation, the perception of onerous regulatory actions, concerns over the potential for fraud and manipulation of the price of Bitcoin and other factors may cause a drop in the price of Bitcoin. Developments related to the Bitcoin Network's operations, also contribute to the

volatility in the price of Bitcoin. These factors may continue to cause the price of Bitcoin to be volatile, which may have a negative impact on the performance of the Bitcoin futures and on the performance of the Fund.

Since the price and trading of Bitcoin futures is influenced by the price of Bitcoin and events impacting the price of Bitcoin, the Bitcoin Network or the Bitcoin trading venues, each of the events described above could have a negative impact on the price and market for Bitcoin futures. For example, such events could lead to a lack of liquidity in the market for Bitcoin futures or have a negative impact on the price of Bitcoin futures.

Changes in the Bitcoin Network could have an adverse effect on the operation and price of Bitcoin, which could have an adverse effect on the price of Bitcoin futures and the value of an investment in the Fund.

New Bitcoin is created when Bitcoin “miners” use computers on the Bitcoin Network to solve Bitcoin’s “proof of work” algorithm which records and verifies every Bitcoin transaction on the Bitcoin Blockchain. In return for their services, miners are rewarded through receipt of a set amount of Bitcoin known as the “block reward.” The current block reward for solving a new block is six and one quarter (6.25) Bitcoin per block; a decrease from twelve and one half (12.5) Bitcoin in May 2020. Based on current processing power, or “hashrate”, the block reward is estimated to halve again in about four (4) years. Because the block reward slowly declines at a fixed rate over time, a user may incentivize a miner to prioritize the processing of their transaction by including excess Bitcoin which is collected by the miner in the form of a “transaction fee.” If transaction fees are not sufficiently high or if transaction fees increase to the point of being prohibitively expensive for users, miners may not have an adequate incentive to continue mining and may cease their mining operations.

If the price of Bitcoin or the reward for mining new blocks is not sufficiently high to incentivize miners, miners may cease expending hashrate to solve blocks and, as a result, confirmations of transactions on the Bitcoin Blockchain could be slowed temporarily and inhibit the function of the Bitcoin Network. This could have a negative impact on the value of an investment in the Fund.

Additionally, if the price of Bitcoin falls below that which is required for mining operators to turn a profit, some mining operators may temporarily discontinue mining Bitcoin by either halting operations or switching their mining operations to mine other cryptocurrencies. If miners reduce or cease their mining operations it would reduce the aggregate hashrate on the Bitcoin Network, which would adversely affect the confirmation process for transactions (i.e., temporarily decreasing the speed at which blocks are added to the blockchain until the next scheduled adjustment in difficulty for block solutions) and make the Bitcoin Network more vulnerable to a malicious actor obtaining control in excess of fifty (50) percent of the aggregate hashrate on the Bitcoin Network. Periodically, the Bitcoin Network is designed to adjust the difficulty for block solutions so that solution speeds remain in the vicinity of the expected ten (10) minute confirmation time currently targeted by the Bitcoin Network protocol, but significant reductions in aggregate hashrate on the Bitcoin Network could result in material delays in transaction confirmation time. Any reduction in confidence in the confirmation process or aggregate hashrate of the Bitcoin Network may adversely affect the utility and price of Bitcoin, which may negatively impact the Bitcoin futures and an investment in the Fund.

A decline in the adoption of Bitcoin could have a negative impact on the price of Bitcoin and the Bitcoin trading venues and, in turn, a negative impact on the price and market for Bitcoin futures and the value of an investment in the Fund.

Bitcoin is used as a form of payment both directly and, more commonly, through an intermediary service which converts Bitcoin payments into local currency. However, the adoption of Bitcoin has been limited when compared with the increase in the price of Bitcoin as determined by the Bitcoin trading venues. This may indicate that the majority of Bitcoin’s use continues to be for investment and speculative purposes. The continued adoption of Bitcoin will require growth in its usage as a means of payment and in the Bitcoin Blockchain for various applications.

A lack of expansion or a reduction in usage of Bitcoin and the Bitcoin Blockchain could adversely affect the Bitcoin trading venues. This, in turn, may have a negative impact on the market for Bitcoin futures and the performance of the Fund. Even if growth in Bitcoin adoption continues in the near or medium-term, there is no assurance that Bitcoin usage, or the market for Bitcoin futures, will continue to grow over the long-term. A contraction in the use of Bitcoin may result in a lack of liquidity in the Bitcoin trading venues, increased volatility in or a reduction to the price of Bitcoin, and other negative consequences. This, in turn, could exacerbate any lack of liquidity in the market for Bitcoin futures, cause increased volatility in, or a reduction to the price, of Bitcoin futures and other negative consequences. Each of these events could adversely impact the value of an investment in the Fund.

A new competing digital asset may pose a challenge to Bitcoin’s current market dominance, resulting in a reduction in demand for Bitcoin, which could have a negative impact on the price and market for Bitcoin and, in turn, a negative impact on the price and market for Bitcoin futures and the value of an investment in the Fund.

The Bitcoin Network and Bitcoin, as an asset, currently hold a “first-to-market” advantage over other digital assets. This first-to-market advantage has resulted in the Bitcoin Network evolving into the most well-developed network of any digital asset. The Bitcoin Network currently enjoys the largest user base of any digital asset and, more importantly, the largest combined mining power in use to secure the Bitcoin Blockchain. Having a large mining network enhances user confidence regarding the security of the Bitcoin Blockchain and long-term stability of the Bitcoin Network. However, the large mining network also increases the difficulty of solving for Bitcoins, which at times may incentivize miners to mine other cryptocurrencies. It is possible that real or perceived shortcomings in the Bitcoin Network, technological, regulatory or other developments could result in a decline in popularity and acceptance of Bitcoin and the Bitcoin Network.

It is also possible that other digital currencies and trading systems could become more widely accepted and used than Bitcoin. In particular, digital assets “Ethereum”, “Ripple” and “Stellar” have acquired a substantial share of the cryptocurrency market in recent years, which may be in part due to perceived institutional backing and/or potentially advantageous features not incorporated into Bitcoin. There are other cryptocurrencies, or alt-coins, gaining momentum as the price of the Bitcoin continues to rise and investors see the cheaper cryptocurrencies as attractive alternatives. Additionally, the continued rise of alt-coins could lead to a reduction in demand for Bitcoin, which could have a negative impact on the price and market for Bitcoin and the Bitcoin trading venues and, in turn, a negative impact on the price and market for Bitcoin futures and the value of an investment in the Fund.

Regulatory initiatives by governments and uniform law proposals by academics and participants in the Bitcoin economy may impact the use of Bitcoin or the operation of the Bitcoin Network in a manner that adversely affects Bitcoin futures and the value of an investment in the Fund.

As Bitcoin and other digital assets have grown in popularity and market size, certain U.S. federal and state governments, foreign governments and self-regulatory agencies have begun to examine the operations of Bitcoin, cryptocurrencies and other digital assets, the Bitcoin Network, Bitcoin users, and the Bitcoin trading venues. Regulation of cryptocurrencies, like Bitcoin, and initial coin offerings (“ICOs”) in the U.S. and foreign jurisdictions could restrict the use of Bitcoin or impose other requirements that may adversely impact the liquidity and price of Bitcoin, the demand for Bitcoin, the operations of the Bitcoin trading venues and the performance of the Bitcoin futures. If the Bitcoin trading venues become subject to onerous regulations, among other things, trading in Bitcoin may be concentrated in a smaller number of exchanges, which may materially impact the price, volatility and trading volumes of Bitcoin. Additionally, the Bitcoin trading venues may be required to comply with tax, anti-money laundering (“AML”), know-your-customer (“KYC”) and other regulatory requirements, compliance and reporting obligations that may make it more costly to transact in or trade Bitcoin (which may materially impact price, volatility or trading of Bitcoin more generally). Each of these events could have a negative impact on Bitcoin futures and the value of an investment in the Fund.

The regulation of Bitcoin, digital assets and related products and services continues to evolve. The inconsistent and sometimes conflicting regulatory landscape may make it more difficult for Bitcoin businesses to provide services, which may impede the growth of the Bitcoin economy and have an adverse effect on consumer adoption of Bitcoin. There is a possibility of future regulatory change altering, perhaps to a material extent, the nature of an investment in the Fund or the ability of the Fund to continue to operate.

Additionally, to the extent that Bitcoin itself is determined to be a security, commodity future or other regulated asset, or to the extent that a United States or foreign government or quasi-governmental agency exerts regulatory authority over the Bitcoin Network, Bitcoin trading or ownership in Bitcoin, the Bitcoin futures may be adversely affected, which may have an adverse effect on the value of your investment in the Fund. In sum, Bitcoin regulation takes many different forms and will, therefore, impact Bitcoin and its usage in a variety of manners.

The Bitcoin Network is currently maintained by the Bitcoin Core and no single entity owns the Bitcoin Network. However, with the growing adoption of Bitcoin and the significant increase in speculative activity surrounding Bitcoin and cryptocurrencies, third parties may be increasingly motivated to assert intellectual property rights claims relating to the operation of the Bitcoin Network or applications built upon the Bitcoin Blockchain. Regardless of the merit of any intellectual property or other legal action, any threatened action that reduces confidence in the Bitcoin Network’s or the Bitcoin Blockchain’s long-term viability or the ability of end-users to hold and transfer Bitcoin may adversely affect the price of Bitcoin and adversely affect the Bitcoin futures. Additionally, a meritorious intellectual property rights claim could prevent end-users from accessing the Bitcoin Network or holding or transferring their Bitcoin, which could adversely affect the value of the Bitcoin futures. As a result, an intellectual property rights claim against Bitcoin Network participants could have a material adverse impact on the Fund.

An interruption in Internet service or a limitation of Internet access could impact the functionality of the Bitcoin Network.

The Bitcoin Network's functionality relies on the Internet. A broadly accepted and widely adopted decentralized network is necessary for a fully-functional blockchain network, such as the Bitcoin Network. Features of the Bitcoin Network, such as decentralization, open source protocol, and reliance on peer-to-peer connectivity, are essential to preserve the stability of the network and decrease the risk of fraud or cyber-attacks. A significant disruption of Internet connectivity affecting large numbers of users or geographic areas could impede the functionality of the Bitcoin Network. Any technical disruptions or regulatory limitations that affect Internet access may have an adverse effect on the Bitcoin Network, the price of Bitcoin and Bitcoin futures and therefore adversely affect the value of an investment in the Fund.

BLOCKCHAIN TECHNOLOGY

Blockchain Technology

Blockchain technology is a relatively new and untested technology which operates as a distributed ledger. The risks associated with blockchain technology may not emerge until the technology is widely used. Blockchain systems could be vulnerable to fraud, particularly if a significant minority of participants colluded to defraud the rest. There is little regulation of blockchain technology other than the intrinsic public nature of the blockchain system. Any future regulatory developments could affect the viability and expansion of the use of blockchain technology. Because blockchain technology systems may operate across many national boundaries and regulatory jurisdictions, it is possible that blockchain technology may be subject to widespread and inconsistent regulation. Blockchain technology is not a product or service that provides identifiable revenue for companies that implement, or otherwise use it. Currently, blockchain technology is commonly used for the recording of transactions in digital currency, which are extremely speculative and volatile. Problems in digital currency markets could have a wider effect on companies associated with blockchain technology. Blockchain technology also may never be implemented to a scale that provides identifiable economic benefit. There are currently a number of competing blockchain platforms with competing intellectual property claims. The uncertainty inherent in these competing technologies could cause companies to use alternatives to blockchain. Finally, because digital assets registered on a blockchain do not have a standardized exchange, like a stock market, there is less liquidity for such assets and greater possibility of fraud or manipulation.

A blockchain is an open, distributed ledger that records transactions between two parties in a verifiable and permanent way using cryptography. A distributed ledger is a database in which data is stored in a decentralized manner. Cryptography is a method of storing and transmitting data in a particular form so that only those for whom it is intended can read and process it. Transactions on the blockchain are verified and authenticated by computers on the network (referred to as "nodes" or "validators") that receive, propagate, verify, and execute transactions. The process of authenticating a transaction before it is recorded ensures that only valid and authorized transactions are permanently recorded on the blockchain in collections of transactions called "blocks." Blockchain networks are based upon software source code that establishes and governs their respective cryptographic systems for verifying transactions.

Delays in transaction processing have occurred on the blockchain networks. Such a delay may occur on account of, among other things, the inability of nodes to reach consensus on transactions, including in relation to upgrades on changes in the Bitcoin Network. During a network delay, it will not be possible to record transactions in the shares on the blockchain.

Blockchain Regulation

Regulation of digital assets such as Bitcoin, blockchain technologies and digital asset platforms is currently developing and likely to rapidly evolve, varies significantly among international, federal, state and local jurisdictions and is subject to significant uncertainty.

Various legislative and executive bodies in the United States and in other countries are currently considering, or may in the future consider, laws, regulations, guidance, or other actions, which may severely impact the Fund, and thus the Fund's shareholders. Failure by the Fund or any Fund service provider to comply with any laws, rules or regulations, some of which may not exist yet or are subject to interpretation and may be subject to change, could result in a variety of adverse consequences to the Fund (and thus to the Fund's shareholders), including civil penalties and fines.

Blockchain networks, including the Bitcoin Network, currently face an uncertain regulatory landscape in not only the United States but also in many foreign jurisdictions such as the European Union and China. Various foreign jurisdictions may, in the near future, adopt laws, regulations or directives that affect the networks, and their users, developers and service providers that fall within such jurisdictions' regulatory scope. Such laws, regulations or directives may conflict with those of the United States or may directly and negatively impact the Fund and its service providers. The effect of any future regulatory change is impossible to predict, but such change could be substantial and adverse to the shareholders, the Fund and the Fund's service providers.

Additionally, to the extent that Bitcoin itself is determined to be a security, commodity future or other regulated asset, or to the extent that a United States or foreign government or quasi-governmental agency exerts regulatory authority over the Bitcoin Network, Bitcoin trading or ownership in Bitcoin, the Bitcoin futures may be adversely affected, which may have an adverse effect on the value of your investment in the Fund. In sum, Bitcoin regulation takes many different forms and will, therefore, impact Bitcoin and its usage in a variety of manners.

ADDITIONAL INFORMATION ABOUT INVESTMENT OBJECTIVES, RISKS, AND POLICIES

The Prospectus for the Fund discusses the investment objectives and strategies for the Fund and explains how the Fund allocates its assets among the different types of securities that the Fund may invest in. Please refer to the Fund's Prospectus for a discussion of the Fund's principal investment strategies, the principal asset types or securities in which the Fund may invest, and the principal risks associated with the foregoing. Additional information regarding the assets or securities in which the Fund may invest, including securities or instruments not described in the Prospectus, appears below in the section entitled "Additional Information About Securities in Which the Fund May Invest" in this SAI.

As with all funds, there can be no assurance that the investment objectives of the Fund will be achieved. The Fund's investment objectives may be changed without approval by the holders, subject to 60 days' advance notice to shareholders.

Investment Restrictions.

The Fund has adopted investment policies which may be fundamental or non-fundamental. Fundamental policies cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the outstanding voting securities of the Fund, as the case may be. Non-fundamental policies may be changed without shareholder approval by vote of a majority of the Trustees of the Trust at any time, subject to 60 days' advance notice to shareholders. The term "majority of the outstanding voting shares" means the vote of (i) 67% or more of the Fund's shares present at a meeting, if more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (ii) more than 50% of the Fund's outstanding shares, whichever is less.

Fundamental Investment Restrictions. The Fund is subject to the following investment restrictions, all of which are fundamental policies.

The Fund may not:

- (1) borrow money except as permitted by the 1940 Act or other governing statute, by the rules thereunder, or by the SEC or other regulatory agency with authority over the Fund;
- (2) invest directly in real estate unless it is acquired as a result of ownership of securities or other instruments, except that this restriction shall not prevent the Fund from investing in securities or other instruments (1) issued by companies that invest, deal, or otherwise engage in transactions in real estate or (2) backed or secured by real estate or interests in real estate;
- (3) issue senior securities except as permitted by the 1940 Act or other governing statute, by the Rules thereunder, or by the SEC or other regulatory agency with authority over the Fund;
- (4) act as an underwriter of another issuer's securities, except to the extent that the Fund may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended (the "1933 Act"), in connection with the purchase and sale of portfolio securities;
- (5) make loans to other parties, except to the extent permitted under the 1940 Act, including the rules, regulations and any orders obtained thereunder, provided that for the purposes of this limitation, entering into repurchase agreements, lending securities and acquiring any debt securities are not deemed to be the making of loans;
- (6) invest in physical commodities, except that: (i) this restriction does not limit the purchase, sale or use of swaps, futures contracts, forward contracts or options, and (ii) this restriction does not limit the purchase or sale of securities or other instruments backed by commodities; and
- (7) invest more than 25% of its assets (valued at the time of investment) in the securities of issuers conducting their principal business activity in the same industry if, immediately after the purchase and as a result thereof, the value of the Fund's investments in that industry would equal or exceed 25% of the current value of the Fund's total assets, provided that this restriction does not limit the Fund's: (i) investments in securities of other investment companies, (ii) investments in securities issued or guaranteed by the U.S. government, its agencies or

instrumentalities, or (iii) investments in repurchase agreements collateralized by U.S. government securities, and provided further that the Fund reserves the right to concentrate in any industry in which the index that the Fund tracks becomes concentrated to approximately the same degree during the same period, except that the Fund may invest more than 25% of its total assets in investments that provide exposure to Bitcoin and/or Bitcoin futures contracts.

Compliance with the fundamental policies previously described is generally measured at the time the securities are purchased. Unless otherwise required by the 1940 Act (as is the case with borrowing), if a percentage restriction is adhered to at the time the investment is made, a later change in percentage resulting from a change in the market value of assets will not constitute a violation of such restriction. All fundamental policies must comply with applicable regulatory requirements.

With respect to paragraph (1), the 1940 Act currently allows the Fund to borrow up to one-third of the value of its total assets (including the amount borrowed) valued at the lesser of cost or market, less liabilities (not including the amount borrowed) at the time the borrowing is made. With respect to paragraph (5), the 1940 Act and regulatory interpretations currently limit the percentage of the Fund's securities that may be loaned to one-third of the value of its total assets. With respect to paragraph (6), the carve out for futures contracts includes bitcoin futures contracts.

For the purposes of restriction (7) above, industry classifications are determined for the Fund in accordance with the industry or sub-industry classifications established by Bloomberg. The Fund may use other classification titles, standards and systems from time to time, as it determines to be in the best interests of shareholders. The use of any particular classification system is not a fundamental policy. In addition, while the Fund does not regard other investment companies as an "industry," the Fund intends to look through to the holdings of underlying investment companies, subject to the Fund's ability to obtain such information, for purposes of restriction (7).

Non-Fundamental Investment Restrictions.

In addition, it is contrary to the Fund's present policies, which may be changed without shareholder vote, to purchase any illiquid security, including any securities whose disposition is restricted under federal securities laws and securities that are not readily marketable, if, as a result, more than 15% of the Fund's net assets (based on then-current value) would then be invested in such securities. For purposes of this restriction, the staff of the SEC is presently of the view that repurchase agreements maturing in more than seven days are subject to this restriction. Until that position is revised, modified or rescinded, the Fund will conduct its operations in a manner consistent with this view. This limitation on investment in illiquid securities does not apply to certain restricted securities, including securities pursuant to Rule 144A under the 1933 Act, and certain commercial paper that the Adviser has determined to be liquid under procedures approved by the Board of Trustees.

Non-Principal Risks

Concentration Risk – The Fund has a fundamental policy not to invest more than 25% of the current value of the Fund's total assets in any one industry, except that this policy does not apply to: (i) investments in securities of other investment companies, (ii) investments in securities issued or guaranteed by the U.S. government, its agencies or instrumentalities, (iii) investments in repurchase agreements collateralized by U.S. government securities, or (iv) investments that provide exposure to Bitcoin and/or Bitcoin futures contracts. However, the Fund reserves the right to concentrate its investments (i.e., invest 25% or more of its total assets in securities of issuers in a particular industry) to approximately the same extent that the Index concentrates in a particular industry. To the extent the Fund concentrates in a particular industry, it may be more susceptible to economic conditions and risks affecting that industry.

Temporary Defensive Positions and Cash Positions – The Fund may take temporary defensive positions in short-term debt securities, cash and cash equivalents in response to adverse market, economic or political conditions. The Fund may also depart from its principal investment strategies when the portfolio managers believe that market conditions are unfavorable for profitable investing, or when they are otherwise unable to locate attractive investment opportunities. In other words, cash or similar investments generally are a residual – they represent the assets that remain after the Fund has committed available assets to desirable investment opportunities. Under such circumstances, the Fund may not achieve its investment objective, and it may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested.

INDEX DISCLOSURE

ADDITIONAL INFORMATION ABOUT SECURITIES IN WHICH THE FUND MAY INVEST

The Fund’s principal investment objectives and strategies are discussed in the Prospectus under the “**SUMMARY SECTION**” for the Fund and under “**INVESTMENT OBJECTIVE**” and “**PRINCIPAL INVESTMENT STRATEGIES.**” In order to achieve its investment objectives, the Fund generally makes investments of the sort described in the Prospectus.

The Fund may also invest in certain types of securities, or engage in certain investment activities, as generally discussed below. In addition, the Fund may be subject to additional risks in connection with its investments in such securities or as a

result of the Fund's investment strategies or activities. The following is not meant to be an exclusive list of all the securities and instruments in which the Fund may invest, the investment strategies or activities in which it may engage, or the risks associated with both. The Fund may invest in instruments and securities and engage in strategies or activities other than those listed below, and may be subject to risks that are not described here. To the extent this section describes an investment type also described in the prospectus, the disclosure in this SAI should be regarded as supplementing, and not replacing, the prospectus disclosure.

FUTURES CONTRACTS

Futures in General

A cash-settled futures contract obligates the seller to deliver (and the purchaser to accept) an amount of cash equal to a specific dollar amount multiplied by the difference between the final settlement price of a specific futures contract and the price at which the agreement is made. No physical delivery of the underlying asset is made.

The Fund generally engages in closing or offsetting transactions before final settlement of a futures contract wherein a second identical futures contract is sold to offset a long position. In such cases, the obligation is to deliver (or take delivery of) cash equal to a specific dollar amount multiplied by the difference between the price of the offsetting transaction and the price at which the original contract was entered into. If the original position entered into is a long position (futures contract purchased), there will be a gain (loss) if the offsetting sell transaction is carried out at a higher (lower) price, inclusive of commissions.

Whether the Fund realizes a gain or loss from futures activities depends generally upon movements in the underlying asset. The Fund will engage in transactions in futures contracts that are traded on a U.S. exchange or board of trade or that have been approved for sale in the U.S. by the CFTC.

All of the Fund's transactions in futures will be entered into through a FCM regulated by the CFTC or under a foreign regulatory regime that has been recognized as equivalent by the CFTC. Under U.S. law, an FCM is the sole type of entity that may hold collateral in respect of cleared futures. All futures entered into by the Fund will be cleared by a clearing house that is regulated by the CFTC.

In addition, the CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the implementation of higher margin requirements, the establishment of daily price limits and the suspension of trading.

Futures Margin Requirements

Upon entering into a futures contract, the Fund will be required to deposit with its FCM an amount of cash or cash equivalents equal to a small percentage of the contract's value (these amounts are subject to change by the FCM or clearing house through which the trade is cleared). This amount, known as "initial margin," is in the nature of a performance bond or good faith deposit on the contract and is returned to the Fund upon termination of the futures contract, assuming all contractual obligations have been satisfied. Subsequent payments, known as "variation margin," to and from the broker will be made daily as the price of the index underlying the futures contract fluctuates, making the long positions in the futures contract more or less valuable, a process known as "marking-to-market." At any time prior to expiration of a futures contract, the Fund may elect to close its position by taking an opposite position, which will operate to terminate the Fund's existing position in the contract. A party to a futures contract is subject to the credit risk of the clearing house and the FCM through which it holds its position. Credit risk of market participants with respect to futures is concentrated in a few clearing houses, and it is not clear how an insolvency proceeding of a clearing house would be conducted and what impact an insolvency of a clearing house would have on the financial system. An FCM is generally obligated to segregate all funds received from customers with respect to customer futures positions from the FCM's proprietary assets. However, all funds and other property received by an FCM from its customers are generally held by the FCM on a commingled basis in an omnibus account, and the FCM may invest those funds in certain instruments permitted under the applicable regulations. The assets of the Fund might not be fully protected in the event of the bankruptcy of the Fund's FCM, because the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the FCM's customers for a relevant account class. Also, the FCM is required to transfer to the clearing house the amount of margin required by the clearing house for futures positions, which amounts are generally held in an omnibus account at the clearing house for all customers of the FCM. If an FCM does not comply with the applicable regulations or its agreement with the Fund, or in the event of fraud or misappropriation of customer assets by a FCM, the Fund could have only an unsecured creditor claim in an insolvency of the FCM with respect to the margin held by the FCM.

Correlation Risk

The primary risks associated with the use of futures contracts are imperfect correlation between movements in the price of the futures and the market value of the underlying assets, and the possibility of an illiquid market for a futures contract. Although the Fund intends to sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses. If trading is not possible, or if the Fund determines not to close a futures position in anticipation of adverse price movements, the Fund will be required to make daily cash payments of variation margin. The risk that the Fund will be unable to close out a futures position will be minimized by entering into such transactions on a national exchange with an active and liquid secondary market.

Position Limits and Accountability Levels

The CFTC and domestic exchanges have established speculative position limits (“position limits”) on the maximum speculative position which any person, or group of persons acting in concert, may hold or control in particular futures and options on futures contracts. All positions owned or controlled by the same person or entity, even if in different accounts, must be aggregated for purposes of determining whether the applicable position limits have been exceeded. Thus, even if the Fund does not intend to exceed applicable position limits, it is possible that different clients managed by the Advisor may be aggregated for this purpose. Although it is possible that the trading decisions of the Advisor may have to be modified and that positions held by the Fund may have to be liquidated in order to avoid exceeding such limits, the Advisor believes that this is unlikely. The modification of investment decisions or the elimination of open positions, if it occurs, may adversely affect the profitability of the Fund. A violation of position limits could also lead to regulatory action materially adverse to the Fund’s investment strategy.

In addition, the domestic exchanges have established accountability levels (“accountability levels”) on futures contracts traded on U.S.- based Futures exchanges. The accountability levels establish a threshold above which the exchange may exercise greater scrutiny and control over the Fund’s positions.

If the Fund were to reach its position limits and position accountability levels on Bitcoin futures contracts, or if the Advisor believes it is reasonably likely to do so, the Advisor intends to take such action as it believes appropriate and in the best interest of the Fund in light of the totality of the circumstances at such time. In such instances, the Fund reserves the right to invest in U.S. listed equity securities whose performance the Advisor believes may correspond, or be closely related, to the performance of Bitcoin or Bitcoin futures contracts, such as equity securities of companies involved in the cryptocurrency industry. The Fund may also, after consultation with the Staff of the SEC, consider investing any cash on hand due to position limits or accountability levels in money market instruments.

OTHER DERIVATIVE INSTRUMENTS

The value of some derivative instruments in which the Fund invests may be particularly sensitive to changes in prevailing interest rates, and, like the other investments of the Fund, the ability of the Fund to successfully utilize these instruments may depend in part upon the ability of the Advisor to forecast interest rates and other economic factors correctly. If the Advisor incorrectly forecasts such factors and has taken positions in derivative instruments contrary to prevailing market trends, the Fund could be exposed to the risk of loss.

If the Advisor incorrectly forecasts interest rates, market values or other economic factors in utilizing a derivatives strategy for the Fund, the Fund might have been in a better position if it had not entered into the transaction at all. Also, suitable derivative transactions may not be available in all circumstances. The use of these strategies involves certain special risks, including a possible imperfect correlation, or even no correlation, between price movements of derivative instruments and price movements of related investments. While some strategies involving derivative instruments can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in related investments or otherwise, due to the possible inability of the Fund to purchase or sell a portfolio security at a time that otherwise would be favorable or the possible need to sell a portfolio security at a disadvantageous time because the Fund is required to maintain asset coverage or offsetting positions in connection with transactions in derivative instruments, and the possible inability of the Fund to close out or to liquidate its derivatives positions. In addition, the Fund’s use of such instruments may cause the Fund to realize higher amounts of short-term capital gains (generally taxed at ordinary income tax rates) than if it had not used such instruments. For funds that gain exposure to an asset class using derivative instruments backed by a collateral portfolio of fixed income instruments, changes in the value

of the fixed income instruments may result in greater or lesser exposure to that asset class than would have resulted from a direct investment in securities comprising that asset class.

Options on Securities and Indexes. The Fund may purchase and sell put and call options on fixed income or other securities or indexes in standardized contracts traded on foreign or domestic securities exchanges, boards of trade, or similar entities, or quoted on NASDAQ or on an over-the-counter market, and agreements, sometimes called cash puts, which may accompany the purchase of a new issue of bonds from a dealer.

An option on a security (or index) is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option (or the cash value of the index) at a specified exercise price at any time during the term of the option. The writer of an option on a security has the obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price or to pay the exercise price upon delivery of the underlying security. Upon exercise, the writer of an option on an index is obligated to pay the difference between the cash value of the index and the exercise price multiplied by the specified multiplier for the index option. (An index is designed to reflect features of a particular financial or securities market, a specific group of financial instruments or securities, or certain economic indicators.)

The Fund may write call options and put options only if they are “covered.” In the case of a call option on a security, the option is “covered” if the Fund owns the security underlying the call or has an absolute and immediate right to acquire that security without additional cash consideration upon conversion or exchange of other securities held by the Fund. For a call option on an index, the option is covered if the Fund maintains with its custodian assets determined to be liquid by the Adviser in accordance with procedures established by the board of directors or trustees, in an amount equal to the contract value of the index. A call option is also covered if the Fund holds a call on the same security or index as the call written where the exercise price of the call held is (i) equal to or less than the exercise price of the call written, or (ii) greater than the exercise price of the call written. A put option is also covered if the Fund holds a put on the same security or index as the put written where the exercise price of the put held is (i) equal to or greater than the exercise price of the put written, or (ii) less than the exercise price of the put written.

If an option written by the Fund expires unexercised, the Fund realizes a capital gain equal to the premium received at the time the option was written. If an option purchased by the Fund expires unexercised, the Fund realizes a capital loss equal to the premium paid. Prior to the earlier of exercise or expiration, an exchange traded option may be closed out by an offsetting purchase or sale of an option of the same series (type, exchange, underlying security or index, exercise price, and expiration). There can be no assurance, however, that a closing purchase or sale transaction can be effected when the Fund desires.

The Fund may sell put or call options it has previously purchased, which could result in a net gain or loss depending on whether the amount realized on the sale is more or less than the premium and other transaction costs paid on the put or call option which is sold. Prior to exercise or expiration, an option may be closed out by an offsetting purchase or sale of an option of the same series. The Fund will realize a capital gain from a closing purchase transaction if the cost of the closing option is less than the premium received from writing the option, or, if it is more, the Fund will realize a capital loss. If the premium received from a closing sale transaction is more than the premium paid to purchase the option, the Fund will realize a capital gain or, if it is less, the Fund will realize a capital loss. The principal factors affecting the market value of a put or a call option include supply and demand, interest rates, the current market price of the underlying security or index in relation to the exercise price of the option, the volatility of the underlying security or index, and the time remaining until the expiration date.

The premium paid for a put or call option purchased by the Fund is an asset of the Fund. The premium received for an option written by the Fund is recorded as a deferred credit. The value of an option purchased or written is marked to market daily and is valued at the closing price on the exchange on which it is traded or, if not traded on an exchange or no closing price is available, at the mean between the last bid and asked prices.

The Fund may write covered straddles consisting of a combination of a call and a put written on the same underlying security. A straddle will be covered when sufficient assets are deposited to meet the Fund’s immediate obligations. The Fund may use the same liquid assets to cover both the call and put options where the exercise price of the call and put are the same, or the exercise price of the call is higher than that of the put.

Risks Associated with Options on Securities and Indexes. There are several risks associated with transactions in options on securities and on indexes. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events.

During the option period, the covered call writer has, in return for the premium on the option, given up the opportunity to profit from a price increase in the underlying security above the exercise price, but, as long as its obligation as a writer continues, has retained the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price. If a put or call option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security remains equal to or greater than the exercise price (in the case of a put), or remains less than or equal to the exercise price (in the case of a call), the Fund will lose its entire investment in the option. Also, where a put or call option on a particular security is purchased to hedge against price movements in a related security, the price of the put or call option may move more or less than the price of the related security.

There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position. If the Fund were unable to close out an option that it had purchased on a security, it would have to exercise the option in order to realize any profit or the option may expire worthless. If the Fund were unable to close out a covered call option that it had written on a security, it would not be able to sell the underlying security unless the option expired without exercise. As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the exercise price of the call.

If trading were suspended in an option purchased by the Fund, the Fund would not be able to close out the option. If restrictions on exercise were imposed, the Fund might be unable to exercise an option it has purchased. Except to the extent that a call option on an index written by the Fund is covered by an option on the same index purchased by the Fund, movements in the index may result in a loss to the Fund; however, such losses may be mitigated by changes in the value of the Fund's securities during the period the option was outstanding.

Foreign Currency Options. The Fund may buy or sell put and call options on foreign currencies either on exchanges or in the over-the-counter market. A put option on a foreign currency gives the purchaser of the option the right to sell a foreign currency at the exercise price until the option expires. A call option on a foreign currency gives the purchaser of the option the right to purchase the currency at the exercise price until the option expires. Currency options traded on U.S. or other exchanges may be subject to position limits which may limit the ability of the Fund to reduce foreign currency risk using such options. Over-the-counter options differ from traded options in that they are two-party contracts with price and other terms negotiated between buyer and seller, and generally do not have as much market liquidity as exchange-traded options.

Futures Contracts and Options on Futures Contracts. A futures contract is an agreement between two parties to buy and sell a security or commodity for a set price on a future date. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security or commodity. An option on a futures contract gives the holder of the option the right to buy or sell a position in a futures contract to the writer of the option, at a specified price and on or before a specified expiration date. Such futures contracts are traded on commodity exchanges registered with the CFTC. Currently, bitcoin futures contracts in which the Fund will invest are only traded on, or subject to the rules of, the Chicago Mercantile Exchange (the "CME") and are cash settled. The value of bitcoin futures is determined by reference to the CME CF Bitcoin Reference Rate, which provides an indication of the price of bitcoin across certain cash bitcoin exchanges.

The Fund may invest in futures contracts and options thereon ("futures options") with respect to, but not limited to, Bitcoin, interest rates, and security indexes. The Fund may also invest in foreign currency futures contracts and options thereon.

An interest rate, commodity, foreign currency or index futures contract provides for the future sale by one party and purchase by another party of a specified quantity of a financial instrument, commodity, foreign currency or the cash value of an index at a specified price and time. A futures contract on an index is an agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to the difference between the value of the index at the close of the last trading day of the contract and the price at which the index contract was originally written. Although the value of an index might be a function of the value of certain specified securities, no physical delivery of these securities is made. A public market exists in futures contracts covering a number of indexes as well as financial instruments and foreign currencies, including: the S&P 500; the S&P MidCap 400; the Nikkei 225; the NYSE composite; U.S. Treasury bonds; U.S. Treasury notes; Government National Mortgage Association ("GNMA") Certificates; three-month U.S. Treasury bills; 90-day commercial paper; bank certificates of deposit; Eurodollar certificates of deposit; the Australian dollar; the Canadian dollar; the British pound; the Japanese yen; the Swiss franc; the Mexican peso; and certain multinational currencies, such as the euro. It is expected that other futures contracts will be developed and traded in the future.

The Fund may purchase and write call and put futures options. Futures options possess many of the same characteristics as options on securities and indexes (discussed above). A futures option gives the holder the right, in return for the premium paid, to assume a long position (call) or short position (put) in a futures contract at a specified exercise price at any time during the period of the option. Upon exercise of a call option, the holder acquires a long position in the futures contract and the writer is assigned the opposite short position. In the case of a put option, the opposite is true. A call option is "in the money" if the value of the futures contract that is the subject of the option exceeds the exercise price. A put option is "in the money" if the exercise price exceeds the value of the futures contract that is the subject of the option.

When valuing derivatives for purposes of the Fund's 80%/20% investment test, the Fund intends to value such instruments on a marked-to-market basis (i.e. using the current market price of the instrument, or in the case of an over-the-counter derivative, the fair market value of such instrument).

Limitations on Use of Futures and Futures Options. The Fund will only enter into futures contracts and futures options which are standardized and traded on a U.S. or foreign exchange, board of trade, or similar entity, or quoted on an automated quotation system.

When a purchase or sale of a futures contract is made by the Fund, the Fund is required to deposit with its custodian (or broker, if legally permitted) a specified amount of assets determined to be liquid by the Adviser in accordance with procedures established by the board of directors or trustees ("initial margin"). The margin required for a futures contract is set by the exchange on which the contract is traded and may be modified during the term of the contract. Margin requirements on foreign exchanges may be different than U.S. exchanges. The initial margin is in the nature of a performance bond or good faith deposit on the futures contract which is returned to the Fund upon termination of the contract, assuming all contractual obligations have been satisfied. The Fund expects to earn interest income on its initial margin deposits. A futures contract held by the Fund is valued daily at the official settlement price of the exchange on which it is traded. Each day the Fund pays or receives cash, called "variation margin," equal to the daily change in value of the futures contract. This process is known as "marking to market." Variation margin does not represent a borrowing or loan by the Fund but is instead a settlement between the Fund and the broker of the amount one would owe the other if the futures contract expired. In computing daily net asset value, the Fund will mark to market its open futures positions.

The Fund is also required to deposit and maintain margin with respect to put and call options on futures contracts written by it. Such margin deposits will vary depending on the nature of the underlying futures contract (and the related initial margin requirements), the current market value of the option, and other futures positions held by the Fund.

Although some futures contracts call for making or taking delivery of the underlying securities or commodities, generally these obligations are closed out prior to delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying security or index, and delivery month). Closing out a futures contract sale is affected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument or commodity with the same delivery date. If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. The transaction costs must also be included in these calculations.

The Fund may write covered straddles consisting of a call and a put written on the same underlying futures contract. A straddle will be covered when sufficient assets are deposited to meet the Fund's immediate obligations. The Fund may use the same liquid assets to cover both the call and put options where the exercise price of the call and put are the same, or the exercise price of the call is higher than that of the put.

When purchasing a futures contract, the Fund will maintain with its custodian (and mark-to-market on a daily basis) assets determined to be liquid by the Adviser in accordance with procedures established by the board of directors or trustees, that, when added to the amounts deposited with a futures commission merchant as margin, are equal to the market value of the futures contract. Alternatively, the Fund may "cover" its position by purchasing a put option on the same futures contract with a strike price as high as or higher than the price of the contract held by the Fund.

When selling a futures contract, the Fund will maintain with its custodian (and mark-to-market on a daily basis) assets determined to be liquid by the Adviser in accordance with procedures established by the board of directors or trustees that are equal to the market value of the instruments underlying the contract. Alternatively, the Fund may "cover" its position by owning the instruments underlying the contract (or, in the case of an index futures contract, a portfolio with a volatility substantially similar to that of the index on which the futures contract is based), or by holding a call option permitting the Fund to purchase the same futures contract at a price no higher than the price of the contract written by the Fund (or at a higher price if the difference is maintained in liquid assets with the Fund's custodian).

When selling a call option on a futures contract, the Fund will maintain with its custodian (and mark-to-market on a daily basis) assets determined to be liquid by the Adviser in accordance with procedures established by the board of directors or trustees, that, when added to the amounts deposited with a futures commission merchant as margin, equal the total market value of the futures contract underlying the call option. Alternatively, the Fund may cover its position by entering into a long position in the same futures contract at a price no higher than the strike price of the call option, by owning the instruments underlying the futures contract, or by holding a separate call option permitting the Fund to purchase the same futures contract at a price not higher than the strike price of the call option sold by the Fund.

When selling a put option on a futures contract, the Fund will maintain with its custodian (and mark-to-market on a daily basis) assets determined to be liquid by the Adviser in accordance with procedures established by the board of directors or trustees, that equal the purchase price of the futures contract, less any margin on deposit. Alternatively, the Fund may cover the position either by entering into a short position in the same futures contract, or by owning a separate put option permitting it to sell the same futures contract so long as the strike price of the purchased put option is the same or higher than the strike price of the put option sold by the Fund.

The requirements for qualification as a regulated investment company also may limit the extent to which the Fund may enter into futures, futures options or forward contracts. See "DISTRIBUTIONS AND TAX MATTERS."

Risks Associated with Futures and Futures Options. There are several risks associated with the use of futures contracts and futures options as hedging techniques. A purchase or sale of a futures contract may result in losses in excess of the amount invested in the futures contract. There can be no guarantee that there will be a correlation between price movements in the hedging vehicle and in the Fund securities being hedged. In addition, there are significant differences between the securities and futures markets that could result in an imperfect correlation between the markets, causing a given hedge not to achieve its objectives. The degree of imperfection of correlation depends on circumstances such as variations in speculative market demand for futures and futures options on securities, including technical influences in futures trading and futures options, and differences between the financial instruments being hedged and the instruments underlying the standard contracts available for trading in such respects as interest rate levels, maturities, and creditworthiness of issuers. A decision as to whether, when and how to hedge involves the exercise of skill and judgment, and even a well-conceived hedge may be unsuccessful to some degree because of market behavior or unexpected interest rate trends.

Futures contracts on U.S. Government securities historically have reacted to an increase or decrease in interest rates in a manner similar to that in which the underlying U.S. Government securities reacted. Thus, the anticipated spread between the price of the futures contract and the hedged security may be distorted due to differences in the nature of the markets. The spread also may be distorted by differences in initial and variation margin requirements, the liquidity of such markets and the participation of speculators in such markets.

Futures exchanges may limit the amount of fluctuation permitted in certain futures contract prices during a single trading day. The daily limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day's settlement price at the end of the current trading session. Once the daily limit has been reached in a futures contract subject to the limit, no more trades may be made on that day at a price beyond that limit. The daily limit governs only price movements during a particular trading day and therefore does not limit potential losses because the limit may work to prevent the liquidation of unfavorable positions. For example, futures prices have occasionally moved to the daily limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of positions and subjecting some holders of futures contracts to substantial losses.

There can be no assurance that a liquid market will exist at a time when the Fund seeks to close out a futures or a futures option position, and that Fund would remain obligated to meet margin requirements until the position is closed. In addition, many of the contracts discussed above are relatively new instruments without a significant trading history. As a result, there can be no assurance that an active secondary market will develop or continue to exist.

Risks Associated with Commodity Futures Contracts. There are several additional risks associated with transactions in commodity futures contracts.

Storage. Unlike the financial futures markets, in the commodity futures markets there are costs of physical storage associated with purchasing the underlying commodity. The price of the commodity futures contract will reflect the storage costs of purchasing the physical commodity, including the time value of money invested in the physical commodity. To the extent that the storage costs for an underlying commodity change while the Fund is invested in futures contracts on that commodity, the value of the futures contract may change proportionately.

Reinvestment. In the commodity futures markets, producers of the underlying commodity may decide to hedge the price risk of selling the commodity by selling futures contracts today to lock in the price of the commodity at delivery tomorrow. In order to induce speculators to purchase the other side of the same futures contract, the commodity producer generally must sell the futures contract at a lower price than the expected future spot price. Conversely, if most hedgers in the futures market are purchasing futures contracts to hedge against a rise in prices, then speculators will only sell the other side of the futures contract at a higher futures price than the expected future spot price of the commodity. The changing nature of the hedgers and speculators in the commodity markets will influence whether futures prices are above or below the expected future spot price, which can have significant implications for the Fund. If the nature of hedgers and speculators in futures markets has shifted when it is time for the Fund to reinvest the proceeds of a maturing contract in a new futures contract, the Fund might reinvest at higher or lower futures prices, or choose to pursue other investments.

Other Economic Factors. The commodities which underlie commodity futures contracts may be subject to additional economic and non-economic variables, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments. These factors may have a larger impact on commodity prices and commodity-linked instruments, including futures contracts, than on traditional securities. Certain commodities are also subject to limited pricing flexibility because of supply and demand factors. Others are subject to broad price fluctuations as a result of the volatility of the prices for certain raw materials and the instability of supplies of other materials. These additional variables may create additional investment risks which subject the Fund's investments to greater volatility than investments in traditional securities.

Additional Risks of Options on Securities, Futures Contracts, Options on Futures Contracts, and Forward Currency Exchange Contracts and Options Thereon. Options on securities, futures contracts, and options on currencies may be traded on foreign exchanges. Such transactions may not be regulated as effectively as similar transactions in the United States; may not involve a clearing mechanism and related guarantees, and are subject to the risk of governmental actions affecting trading in, or the prices of, foreign securities. The value of such positions also could be adversely affected by (i) other complex foreign political, legal and economic factors, (ii) lesser availability than in the United States of data on which to make trading decisions, (iii) delays in the Trust's ability to act upon economic events occurring in foreign markets during non-business hours in the United States, (iv) the imposition of different exercise and settlement terms and procedures and margin requirements than in the United States, and (v) lesser trading volume.

Swap Agreements and Options on Swap Agreements. The Fund may engage in swap transactions, including swap agreements on interest rates, security or commodity indexes, specific securities and commodities, and credit and event-linked swaps. The Fund may also invest in currency exchange rate swap agreements. The Fund may also enter into options on swap agreements ("swap options").

The Fund may enter into swap transactions for any legal purpose, such as for the purpose of attempting to obtain or preserve a particular return or spread at a lower cost than obtaining a return or spread through purchases and/or sales of instruments in other markets, to protect against currency fluctuations, as a duration management technique, to protect against any increase in the price of securities the Fund anticipates purchasing at a later date, or to gain exposure to certain markets in the most economical way possible.

Swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. The gross returns to be exchanged or "swapped" between the parties are generally calculated with respect to a "notional amount," i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities or commodities representing a particular index. A "quanto" or "differential" swap combines both an interest rate and a currency transaction. Other forms of swap agreements include interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or "cap"; interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified rate, or "floor"; and interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels. The Fund may invest in commodity swap agreements. For example, an investment in a commodity swap agreement may involve the exchange of floating-rate interest payments for the total return on a commodity index. In a total return commodity swap, the Fund will receive the price appreciation of a commodity index, a portion of the index, or a single commodity in exchange for paying an agreed-upon fee. If the commodity swap is for one period, the Fund may pay a fixed fee, established at the outset of the swap. However, if the term of the commodity swap is more than one period, with interim swap payments, the Fund may pay an adjustable or floating fee. With a "floating" rate, the fee may be pegged to a base rate, such as the London Interbank Offered Rate, and is adjusted each period. Therefore, if interest rates increase over the term of the swap contract, the Fund may be required to pay a higher fee at each swap reset date.

The Fund may also enter into swap options. A swap option is a contract that gives a counterparty the right (but not the obligation) in return for payment of a premium, to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. The Fund may write (sell) and purchase put and call swap options.

Depending on the terms of the particular option agreement, the Fund will generally incur a greater degree of risk when it writes a swap option than it will incur when it purchases a swap option. When the Fund purchases a swap option, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when the Fund writes a swap option, upon exercise of the option the Fund will become obligated according to the terms of the underlying agreement.

Most other types of swap agreements entered into by the Fund would calculate the obligations of the parties to the agreement on a "net basis." Consequently, the Fund's current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The Fund's current obligations under a swap agreement will be accrued daily (offset against any amounts owed to the Fund).

The Fund may also enter into credit default swap agreements. The credit default swap agreement may have as reference obligations one or more securities that are not currently held by the Fund. The protection "buyer" in a credit default contract is generally obligated to pay the protection "seller" an upfront or a periodic stream of payments over the term of the contract provided that no credit event, such as a default, on a reference obligation has occurred. If a credit event occurs, the seller generally must pay the buyer the "par value" (full notional value) of the swap in exchange for an equal face amount of deliverable obligations of the reference entity described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled. The Fund may be either the buyer or seller in the transaction. If the Fund is a buyer and no credit event occurs, the Fund may recover nothing if the swap is held through its termination date. However, if a credit event occurs, the buyer generally may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity whose value may have significantly decreased. As a seller, the Fund generally receives an upfront payment or a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap.

Credit default swap agreements involve greater risks than if the Fund had invested in the reference obligation directly since, in addition to general market risks, credit default swaps are subject to illiquidity risk, counterparty risk and credit risk. The Fund will enter into credit default swap agreements only with counterparties that meet certain standards of creditworthiness. A buyer generally also will lose its investment and recover nothing should no credit event occur and the swap is held to its termination date. If a credit event were to occur, the value of any deliverable obligation received by the seller, coupled with the upfront or periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the seller. The Fund's obligations under a credit default swap agreement will be accrued daily (offset against any amounts owing to the Fund).

Whether the Fund's use of swap agreements or swap options will be successful depends on the Adviser's ability to predict correctly whether certain types of investments are likely to produce greater returns than other investments. Because they are two party contracts and because they may have terms of greater than seven days, swap agreements may be considered to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. Generally, the Fund will enter into swap agreements only with counterparties that meet certain standards of creditworthiness (generally, such counterparties would have to be eligible counterparties under the terms of the Fund's repurchase agreement guidelines). Certain restrictions imposed on the Fund by the Internal Revenue Code of 1986, as amended (the "Code") may limit the Fund's ability to use swap agreements. The swaps market is a relatively new market and is largely unregulated. It is possible that developments in the swaps market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements.

Swaps are highly specialized instruments that require investment techniques, risk analyses, and tax planning different from those associated with traditional investments. The use of a swap requires an understanding not only of the referenced asset, reference rate, or index but also of the swap itself, without the benefit of observing the performance of the swap under all possible market conditions. Swap agreements may be subject to liquidity risk, which exists when a particular swap is difficult to purchase or sell. If a swap transaction is particularly large or if the relevant market is illiquid (as is the case with many OTC swaps), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses. In addition, swap transaction may be subject to the Fund's limitation on investments in illiquid securities.

Like most other investments, swap agreements are subject to the risk that the market value of the instrument will change in a way detrimental to the Fund's interest. The Fund bears the risk that the Adviser will not accurately forecast future market trends or the values of assets, reference rates, indexes, or other economic factors in establishing swap positions for the Fund. If the Fund attempts to use a swap as a hedge against, or as a substitute for, a portfolio investment, the Fund will be exposed to the risk that the swap will have or will develop imperfect or no correlation with the portfolio investment. This could cause substantial losses for the Fund. While hedging strategies involving swap instruments can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in other Fund investments. Many swaps are complex and often valued subjectively.

Certain swap agreements are exempt from most provisions of the CEA and, therefore, are not regulated as futures or commodity option transactions under the CEA, pursuant to regulations approved by the CFTC. To qualify for this exemption, a swap agreement must be entered into by "eligible participants," which includes the following, provided the participants' total assets exceed established levels: a bank or trust company, savings association or credit union, insurance company, investment company subject to regulation under the 1940 Act, commodity pool, corporation, partnership, proprietorship, organization, trust or other entity, employee benefit plan, governmental entity, broker-dealer, futures commission merchant, natural person, or regulated foreign person. To be eligible, natural persons and most other entities must have total assets exceeding \$10 million; commodity pools and employee benefit plans must have assets exceeding \$5 million. In addition, an eligible swap transaction must meet three conditions. First, the swap agreement may not be part of a fungible class of agreements that are standardized as to their material economic terms. Second, the creditworthiness of parties with actual or potential obligations under the swap agreement must be a material consideration in entering into or determining the terms of the swap agreement, including pricing, cost or credit enhancement terms. Third, swap agreements may not be entered into and traded on or through a multilateral transaction execution facility.

This exemption is not exclusive, and participants may continue to rely on existing exclusions for swaps, such as the Policy Statement issued in July 1989 which recognized a safe harbor for swap transactions from regulation as futures or commodity option transactions under the CEA or its regulations. The Policy Statement applies to swap transactions settled in cash that (1) have individually tailored terms, (2) lack exchange-style offset and the use of a clearing organization or margin system, (3) are undertaken in conjunction with a line of business, and (4) are not marketed to the public.

Structured Notes. Structured notes are derivative debt securities, the interest rate or principal of which is determined by an unrelated indicator. Indexed securities include structured notes as well as securities other than debt securities, the interest rate or principal of which is determined by an unrelated indicator. Indexed securities may include a multiplier that multiplies the indexed element by a specified factor and, therefore, the value of such securities may be very volatile. The terms of the structured and indexed securities may provide that in certain circumstances no principal is due at maturity and therefore, may result in a loss of invested capital. Structured and indexed securities may be positively or negatively indexed, so that appreciation of the reference may produce an increase or a decrease in the interest rate or the value of the structured or indexed security at maturity may be calculated as a specified multiple of the change in the value of the reference; therefore, the value of such security may be very volatile. Structured and indexed securities may entail a greater degree of market risk than other types of debt securities because the investor bears the risk of the reference. Structured or indexed securities may also be more volatile, less liquid, and more difficult to accurately price than less complex securities or more traditional debt securities.

HYBRID INSTRUMENTS

A hybrid instrument is a type of potentially high-risk derivative that combines a traditional stock, bond, or commodity with an option or forward contract. Generally, the principal amount, amount payable upon maturity or redemption, or interest rate of a hybrid is tied (positively or negatively) to the price of some commodity, currency or securities index or another interest rate or some other economic factor (each a "benchmark"). The interest rate or (unlike most fixed income securities) the principal amount payable at maturity of a hybrid security may be increased or decreased, depending on changes in the value of the benchmark. An example of a hybrid could be a bond issued by an oil company that pays a small base level of interest with additional interest that accrues in correlation to the extent to which oil prices exceed a certain predetermined level. Such a hybrid instrument would be a combination of a bond and a call option on oil.

Hybrids can be used as an efficient means of pursuing a variety of investment goals, including currency hedging, duration management, and increased total return. Hybrids may not bear interest or pay dividends. The value of a hybrid or its interest rate may be a multiple of a benchmark and, as a result, may be leveraged and move (up or down) more steeply and rapidly than the benchmark. These benchmarks may be sensitive to economic and political events, such as commodity shortages and currency devaluations, which cannot be readily foreseen by the purchaser of a hybrid. Under certain conditions, the redemption value of a hybrid could be zero. Thus, an investment in a hybrid may entail significant market risks that are not associated with a similar investment in a traditional, U.S. dollar-denominated bond that has a fixed principal amount and pays a fixed rate or floating rate of interest. The purchase of hybrids also exposes the Fund to

the credit risk of the issuer of the hybrids. These risks may cause significant fluctuations in the net asset value of the Fund.

Certain hybrid instruments may provide exposure to the commodities markets. These are derivative securities with one or more commodity-linked components that have payment features similar to commodity futures contracts, commodity options, or similar instruments. Commodity-linked hybrid instruments may be either equity or debt securities, and are considered hybrid instruments because they have both security and commodity-like characteristics. A portion of the value of these instruments may be derived from the value of a commodity, futures contract, index or other economic variable.

Certain issuers of structured products such as hybrid instruments may be deemed to be investment companies as defined in the 1940 Act. As a result, the Fund's investments in these products may be subject to limits applicable to investments in investment companies and may be subject to restrictions contained in the 1940 Act.

INVESTMENT COMPANY SECURITIES

The Fund may, from time to time invest in shares of other investment companies, including open-end investment companies, subject to limits prescribed by the 1940 Act. These investment companies typically incur fees that are separate from those fees incurred directly by the Fund. The Fund's purchase of such investment company securities results in the layering of expenses, such that shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying Fund expenses. No adjustments will be made to the advisory fee with respect to assets of the Fund invested in such investment companies.

Exchange Traded Funds ("ETFs"). ETFs are investment companies whose shares are bought and sold on a securities exchange. An ETF holds a portfolio of securities designed to track a particular market segment or index. Some examples of ETFs are SPDR® ETFs, Invesco QQQ Trust and iShares®.

An investment in an ETF generally presents the same primary risks as an investment in a fund that is not exchange traded and that has the same investment objectives, strategies, and policies. The price of an ETF can fluctuate within a wide range, and the Fund could lose money investing in an ETF if the prices of the stocks owned by the ETF go down. In addition, ETFs are subject to the following risks that do not apply to other funds: (i) the market price of the ETF's shares may trade at a discount to their net asset value; (ii) an active trading market for an ETF's shares may not develop or be maintained; or (iii) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are delisted from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally.

EQUITY SECURITIES

Equity securities represent ownership interests in a company and may consist of common stocks, preferred stocks, warrants to acquire common stock, or securities convertible into common stock. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which a fund invests will cause the net asset value of a fund to fluctuate. The Fund may purchase equity securities traded in the U.S. or foreign countries on securities exchanges or the over-the-counter market. Equity securities are described in more detail below:

Common Stock. Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.

Preferred Stock. Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.

Warrants. Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.

Convertible Securities. Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third-party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at a price above their “conversion value,” which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest- rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and are often lower-quality securities.

Generally, capitalization or market capitalization is a measure of a company’s size. Investing in equity securities of small and medium capitalization companies often involves greater risk than is customarily associated with investments in larger capitalization companies. This increased risk may be due to the greater business risks of smaller size, limited markets and financial resources, narrow product lines and frequent lack of depth of management. The securities of smaller companies are often traded in the over-the-counter market and even if listed on a national securities exchange may not be traded in volumes typical for that exchange. Consequently, the securities of smaller companies are less likely to be liquid, may have limited market stability, and may be subject to more abrupt or erratic market movements than securities of larger, more established growth companies or the market averages in general.

FOREIGN SECURITIES

The Fund may invest in foreign securities. Foreign investments can involve significant risks in addition to the risks inherent in U.S. investments. The value of securities denominated in or indexed to foreign currencies, and of dividends and interest from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets, and prices on some foreign markets can be highly volatile. Many foreign countries lack uniform accounting and disclosure standards comparable to those applicable to U.S. companies and it may be more difficult to obtain reliable information regarding an issuer’s financial condition and operations. In addition, the costs of foreign investing, including withholding taxes, brokerage commissions, and custodial costs, generally are higher than for U.S. investments.

Foreign markets may offer less protection to investors than U.S. markets. Foreign issuers, brokers, and securities markets may be subject to less government supervision. Foreign security trading practices, including those involving the release of assets in advance of payment, may invoke increased risks in the event of a failed trade or the insolvency of a broker-dealer, and may involve substantial delays. It also may be difficult to enforce legal rights in foreign countries.

Investing abroad also involves different political and economic risks. Foreign investments may be affected by actions of foreign governments adverse to the interests of U.S. investors, including the possibility of expropriation or nationalization of assets, confiscatory taxation, and restrictions on U.S. investment or on the ability to repatriate assets or convert currency into U.S. dollars, or other government intervention. There may be a greater possibility of default by foreign governments or foreign government-sponsored enterprises. Investments in foreign countries also involve a risk of local political, economic or social instability, military action or unrest, or adverse diplomatic developments. There is no assurance that the Adviser will be able to anticipate or counter these potential events and their impacts on the Fund’s share price.

Investments by the Fund in emerging markets securities include special risks in addition to those generally associated with foreign investing. The Adviser regards “emerging markets” to include all countries currently excluded from the MSCI World Index of developed countries, and domicile is determined by where the company is organized, located, has the majority of its assets, or receives the majority of its revenue. Many investments in emerging markets can be considered

speculative, and the value of those investments can be more volatile than in more developed foreign markets. Emerging markets also have different clearance and settlement procedures, and delays in settlement could result in temporary periods when a portion of the assets is uninvested and no return is earned thereon. The inability to make intended security purchases due to settlement problems could cause the Fund to miss attractive investment opportunities. Inability to dispose of portfolio securities due to settlement problems could result either in losses to the Fund due to subsequent declines in the value of those securities or possible liability to the purchaser. Many emerging markets have experienced substantial rates of inflation for many years, which has had and may continue to have adverse effects on the economies and securities markets of certain emerging market countries. In an attempt to control inflation, certain emerging market countries have imposed wage and price controls. Emerging market governmental issuers are among the largest debtors to commercial banks, foreign governments, international financial organizations and other financial institutions. Debt obligations of emerging market countries may involve a high degree of risk, and may be in default or present the risk of default. Certain emerging market governmental issuers have not been able or have been unwilling to make payments of interest or principal on debt obligations as those payments have come due.

CURRENCY TRANSACTIONS

A currency exchange transaction, including a virtual currency exchange transaction, may be conducted either on a spot (i.e., cash) basis at the spot rate for purchasing or selling currency prevailing in the foreign exchange market, virtual currency exchange market, or through a forward currency exchange contract ("forward contract"). A forward contract is an agreement to purchase or sell a specified currency at a specified future date (or within a specified time period) and price set at the time of the contract. Forward contracts are usually entered into with banks, foreign exchange dealers or broker-dealers, are not exchange-traded, and are usually for less than one year, but may be renewed.

Forward currency transactions may involve currencies of the different countries in which the Fund may invest, and serve as hedges against possible variations in the exchange rate between these currencies. Transaction hedging is the purchase or sale of a forward contract with respect to specific payables or receivables of the Fund accruing in connection with the purchase or sale of portfolio securities. Portfolio hedging is the use of a forward contract with respect to a portfolio security position denominated or quoted in a particular currency. The Fund may engage in portfolio hedging with respect to the currency of a particular country in amounts approximating actual or anticipated positions in securities denominated in that currency.

If the Fund enters into a forward contract hedging an anticipated purchase of portfolio securities, assets of the Fund having a value at least as great as the Fund's commitment under such forward contract will be segregated on the books of the Fund while the contract is outstanding.

At the maturity of a forward contract to deliver a particular currency, the Fund may either sell the portfolio security related to such contract and make delivery of the currency, or it may retain the security and either acquire the currency on the spot market or terminate its contractual obligation to deliver the currency by purchasing an offsetting contract with the same currency trader obligating it to purchase on the same maturity date the same amount of the currency.

It is impossible to forecast with absolute precision the market value of portfolio securities at the expiration of a forward contract. Accordingly, it may be necessary for the Fund to purchase additional currency on the spot market (and bear the expense of such purchase) if the market value of the security is less than the amount of currency that the Fund is obligated to deliver and if a decision is made to sell the security and make delivery of the currency. Conversely, it may be necessary to sell on the spot market some of the currency received upon the sale of the portfolio security if its market value exceeds the amount of currency that the Fund is obligated to deliver.

Hedging against a decline in the value of a currency does not eliminate fluctuations in the prices of portfolio securities or prevent losses if the prices of such securities decline. Such transactions also preclude the opportunity for gain if the value of the hedged currency should rise. Moreover, it may not be possible for the Fund to hedge against a devaluation that is so generally anticipated that the Fund is not able to contract to sell the currency at a price above the devaluation level it anticipates. The cost to the Fund of engaging in currency exchange transactions varies with such factors as the currency involved, the length of the contract period, and prevailing market conditions. Since currency exchange transactions are usually conducted on a principal basis, no fees or commissions are involved.

ILLIQUID AND RESTRICTED SECURITIES

The Fund may invest up to 15% of its net assets in illiquid securities. The term “illiquid securities” for this purpose means securities that the Fund reasonably expects cannot be sold or disposed of under current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the securities. Repurchase agreements maturing in more than seven days, and restricted securities may be illiquid; other types of investments may also be illiquid from time to time. If the Fund determines at any time that it owns illiquid securities in excess of 15% of its net asset value, it will not purchase additional illiquid securities until its existing holdings in illiquid securities represent less than 15% of its net asset value. If the Fund exceeds this 15% threshold, it will report the occurrence in compliance with Rule 30b1-10 under the 1940 Act and, depending on the circumstances, may take additional steps to reduce its holdings of illiquid securities. In compliance with Rule 22e-4 under the 1940 Act, the Fund has established a liquidity risk management program. While the liquidity risk management program attempts to assess and manage liquidity risk, there is no guarantee it will be effective in its operations and may not reduce the liquidity risk inherent in the Fund’s investments. Moreover, compliance with Rule 22e-4 may affect the Fund’s performance and its ability to achieve its investment objective.

Illiquid securities are priced at a fair value determined in good faith by the board of trustees of the Fund or its valuation designee. The Fund may be unable to realize a favorable price upon sale of the securities, or in some cases may not be able to sell the securities.

Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the 1933 Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than prevailed when it decided to sell. Restricted securities will be priced at a fair value as determined in good faith by the board of the Fund or its valuation designee.

Notwithstanding the above, the Fund may purchase securities that have been privately placed but that are eligible for purchase and sale under Rule 144A under the 1933 Act. That rule permits certain qualified institutional buyers, such as the Fund, to trade in privately placed securities that have not been registered for sale under the 1933 Act. Generally, the Adviser, under the supervision of the board of directors or trustees, will consider whether securities purchased under Rule 144A are illiquid and thus subject to the Fund’s restriction of investing no more than 15% of its assets in illiquid securities. Investing in Rule 144A securities could have the effect of increasing the amount of the Fund’s assets invested in illiquid securities if qualified institutional buyers are unwilling to purchase such securities.

DEBT SECURITIES

Investors should be aware that even though interest-bearing obligations are investments which promise a stable stream of income, the prices of such securities are inversely affected by changes in interest rates and, therefore, are subject to the risk of market price fluctuations. Long-term obligations are affected to a greater extent by interest rates than shorter term obligations. The values of fixed-income obligations also may be affected by changes in the credit rating or financial condition of the issuing entities.

The Fund may invest in debt securities, including lower-rated securities (i.e., securities rated BB or lower by S&P Global Ratings (“S&P Ratings”), a division of McGraw Hill Financial, Inc., or Ba or lower by Moody’s Investors Service, Inc. (“Moody’s”), commonly called “junk bonds”), and securities that are not rated. There may be no restrictions as to the ratings of debt securities acquired by the Fund or the portion of the Fund’s assets that may be invested in debt securities in a particular ratings category.

Securities rated BBB or Baa are considered to be medium grade and to have speculative characteristics. Lower-rated debt securities are predominantly speculative with respect to the issuer’s capacity to pay interest and repay principal. Investment in medium- or lower-quality debt securities involves greater investment risk, including the possibility of issuer default or bankruptcy. An economic downturn could severely disrupt the market for such securities and adversely affect the value of such securities. In addition, lower- quality bonds are less sensitive to interest rate changes than higher-quality instruments and generally are more sensitive to adverse economic changes or individual corporate developments. During a period of adverse economic changes, including a period of rising interest rates, the junk bond market may be severely disrupted, and issuers of such bonds may experience difficulty in servicing their principal and interest payment obligations.

Medium- and lower-quality debt securities may be less marketable than higher-quality debt securities because the market for them is less broad. The market for unrated debt securities is even narrower. During periods of thin trading in these

markets, the spread between bid and asked prices is likely to increase significantly, and the Fund may have greater difficulty selling its portfolio securities. The market value of these securities and their liquidity may be affected by adverse publicity and investor perceptions.

The debt securities held by the Fund may have redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, the Fund would have to replace the security with a lower yielding security, resulting in a decreased return for the investors in the Fund. Conversely, a high yield, high risk security's value will decrease in a rising interest rate market, as will the value of the Fund's assets.

Special tax considerations are associated with investing in debt securities structured as zero coupon or pay-in-kind securities. The Fund will report the interest on these securities as income even though it receives no cash interest until the security's maturity or payment date.

Credit ratings evaluate the safety of principal and interest payments, not the market value risk of debt securities. Rating agencies may fail to change the credit ratings in a timely manner to reflect subsequent events. To the extent that the Fund invests in medium- and lower- quality debt securities, the achievement of the Fund's investment objective may be more dependent on the Fund's own credit analysis than is the case for higher quality bonds. A more complete description of the characteristics of bonds in each ratings category is included in Appendix A to this SAI.

HIGH YIELD SECURITIES

High yield securities, commonly referred to as junk bonds, are debt obligations rated below investment grade, i.e., below BBB by S&P Ratings or Baa by Moody's, or their unrated equivalents. The risks associated with investing in high yield securities include: (i) high yield, lower rated bonds involve greater risk of default or price declines than investments in investment grade securities (e.g., securities rated BBB or higher by S&P Ratings or Baa or higher by Moody's) due to changes in the issuer's creditworthiness; (ii) the market for high risk, high yield securities may be thinner and less active, causing market price volatility and limited liquidity in the secondary market. This may limit the ability of the Fund to sell these securities at their fair market values either to meet redemption requests, or in response to changes in the economy or the financial markets; (iii) market prices for high risk, high yield securities may also be affected by investors' perception of the issuer's credit quality and the outlook for economic growth. Thus, prices for high risk, high yield securities may move independently of interest rates and the overall bond market; and (iv) the market for high risk, high yield securities may be adversely affected by legislative and regulatory developments.

FORWARD COMMITMENTS, WHEN-ISSUED PURCHASES AND DELAYED DELIVERY TRANSACTIONS

The Fund may purchase or sell securities on a when-issued or delayed delivery basis and make contracts to purchase or sell securities for a fixed price at a future date beyond customary settlement time. Securities purchased or sold on a when-issued, delayed- delivery or forward commitment basis involve a risk of loss if the value of the security to be purchased declines, or the value of the security to be sold increases, before the settlement date. The Fund may dispose of securities purchased on a when-issued, delayed- delivery or a forward commitment basis before settlement when deemed appropriate by the Adviser.

BORROWING

The Fund may be permitted to borrow money up to one-third of the value of its total assets. Borrowing for the purpose of investment is a speculative technique that increases both investment opportunity and the Fund's ability to achieve greater diversification. However, it also increases investment risk. Because the Fund's investments will fluctuate in value, whereas the interest obligations on borrowed funds may be fixed, during times of borrowing, the Fund's net asset value may tend to increase more when its investments increase in value, and decrease more when its investments decrease in value. In addition, interest costs on borrowings may fluctuate with changing market interest rates and may partially offset or exceed the return earned on the borrowed funds. Also, during times of borrowing under adverse market conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales.

EXCHANGE TRADED NOTES

Exchange-Traded Notes ("ETNs") are a type of unsecured, unsubordinated debt security that are designed to track the total return of a specific market index, less fees, and combine certain aspects of bonds and ETFs. Similar to ETFs, ETNs are traded on a major exchange (e.g., NYSE) during normal trading hours. However, investors can also hold the ETN until maturity. At maturity, the issuer pays to the investor a cash amount equal to principal amount, subject to the day's index factor. ETN returns are based upon the performance of a market index minus applicable fees. ETNs do not make periodic coupon payments and provide no principal protection. The value of an ETN may be influenced by time to maturity, level of

supply and demand for the ETN, volatility and lack of liquidity in underlying commodities markets, changes in the applicable interest rates, changes in the issuer's credit rating and economic, legal, political or geographic events that affect the referenced commodity. The value of the ETN may drop due to a downgrade in the issuer's credit rating, despite the underlying index remaining unchanged.

REAL ESTATE SECURITIES

The Fund may invest in the equity and fixed-income securities of companies that are principally engaged in or related to the real estate industry, including those that own significant real estate assets, such as real estate investment trusts ("REITs"). An issuer is principally "engaged in" or principally "related to" the real estate industry if at least 50 percent of its total assets, gross income, or net profits are attributable to ownership, construction, management or sale of residential, commercial or industrial real estate, or to products or services related to the real estate industry. Issuers engaged in the real estate industry include equity REITs (which directly own real estate), mortgage REITs (which make short-term construction or real estate development loans or invest in long-term mortgages or mortgage pools), real estate brokers and developers, home-builders, companies that manage real estate, and companies that own substantial amounts of real estate. Businesses related to the real estate industry include manufacturers and distributors of building supplies and financial institutions that make or service mortgage loans.

Investments in the securities of companies that own, construct, manage or sell residential, commercial or industrial real estate will be subject to all of the risks associated with the ownership of real estate. These risks include: declines in the value of real estate, negative changes in the climate for real estate, risks related to general and local economic conditions, over-building and increased competition, decreases in property revenues, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, limitations on rents, changes in neighborhood values, the appeal of properties to tenants, leveraging of interests in real estate, increases in prevailing interest rates, and costs resulting from the clean-up of environmental problems.

REAL ESTATE INVESTMENT TRUST

A REIT is a corporation or business trust (that would otherwise be taxed as a corporation) which meets the definitional requirements of the Code. The Code permits a qualifying REIT to deduct from taxable income the dividends paid, thereby effectively eliminating corporate level federal income tax and making the REIT a pass-through vehicle for federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things: invest substantially all of its assets in interests in real estate (including mortgages and other REITs), cash and government securities; derive most of its income from rents from real property or interest on loans secured by mortgages on real property; and distribute annually 95% or more of its otherwise taxable income to shareholders.

REITs are of land and buildings; a Mortgage REIT invests primarily in mortgages on real property, which may secure construction, development or long-term loans.

REITs in which the Fund invests may be affected by changes in underlying real estate values, which may have an exaggerated effect to the extent that REITs in which the Fund invests may concentrate investments in particular geographic regions or property types. Additionally, rising interest rates may cause investors in REITs to demand a higher annual yield from future distributions, which may in turn decrease market prices for equity securities issued by REITs. Rising interest rates also generally increase the costs of obtaining financing, which could cause the value of the Fund's investments to decline. During periods of declining interest rates, certain Mortgage REITs may hold mortgages that the mortgagors elect to prepay, which prepayment may diminish the yield on securities issued by such Mortgage REITs. In addition, Mortgage REITs may be affected by the ability of borrowers to repay when due the debt extended by the REIT and Equity REITs may be affected by the ability of tenants to pay rent.

Certain REITs have relatively small market capitalization, which may tend to increase the volatility of the market price of securities issued by such REITs. Furthermore, REITs are dependent upon specialized management skills, have limited diversification and are, therefore, subject to risks inherent in operating and financing a limited number of projects. By investing in REITs indirectly through the Fund, a shareholder will bear not only his proportionate share of the expenses of the Fund, but also, indirectly, similar expenses of the REITs. REITs depend generally on their ability to generate cash flow to make distributions to shareholders.

In addition to these risks, Equity REITs may be affected by changes in the value of the underlying property owned by the trusts, while Mortgage REITs may be affected by the quality of any credit extended. Further, Equity and Mortgage REITs are dependent upon management skills and generally may not be diversified. Equity and Mortgage REITs are also subject to heavy cash flow dependency defaults by borrowers and self-liquidation. In addition, Equity and Mortgage REITs could possibly fail to qualify for tax free pass-through of income under the Code or to maintain their exemptions from registration

under the 1940 Act. The above factors may also adversely affect a borrower's or a lessee's ability to meet its obligations to the REIT. In the event of default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

TEMPORARY DEFENSIVE OR INTERIM POSITIONS

Under market conditions when investments meeting the Fund's criteria are scarce, cash and cash reserves may represent a significant percentage of the Fund's total net assets. The Fund may invest up to 100% of its assets in international and domestic short-term obligations (such as Eurodollar and Yankee bank obligations, certificate of deposit, bankers' acceptances, commercial paper) money market funds and cash. During times when the Fund holds a significant portion of its net assets in cash and cash reserves, it will not be investing according to its investment objective, and the Fund's performance may be negatively affected as a result.

U.S. GOVERNMENT OBLIGATIONS

The Fund may invest in various types of U.S. Government obligations. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities. Payment of principal and interest on U.S. Government obligations (i) may be backed by the full faith and credit of the United States (as with U.S. Treasury obligations and GNMA certificates) or (ii) may be backed solely by the issuing or guaranteeing agency or instrumentality itself (as with Federal National Mortgage Association notes). In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities where it is not obligated to do so. As a general matter, the value of debt instruments, including U.S. Government obligations, declines when market interest rates increase and rises when market interest rates decrease. Certain types of U.S. Government obligations are subject to fluctuations in yield or value due to their structure or contract terms.

OBLIGATIONS OF FOREIGN GOVERNMENTS, SUPRANATIONAL ENTITIES AND BANKS

The Fund may invest in U.S. dollar-denominated short-term obligations issued or guaranteed by one or more foreign governments or any of their political subdivisions, agencies or instrumentalities that are determined by the Adviser to be of comparable quality to the other obligations in which such Fund may invest. The Fund may also invest in debt obligations of supranational entities. Supranational entities include international organizations designated or supported by governmental entities to promote economic reconstruction or development and international banking institutions and related government agencies. Examples include the International Bank for Reconstruction and Development (the World Bank), the Asian Development Bank and the InterAmerican Development Bank.

The Fund may invest a portion of its total assets in high-quality, short-term (one year or less) debt obligations of foreign branches of U.S. banks or U.S. branches of foreign banks that are denominated in and pay interest in U.S. dollars.

REPURCHASE AGREEMENTS

Repurchase agreements are transactions in which the Fund purchases a security from a bank or recognized securities dealer and simultaneously commits to resell that security to the bank or dealer at an agreed-upon price, date, and market rate of interest unrelated to the coupon rate or maturity of the purchased security. Repurchase agreements involve certain risks, such as default by, or insolvency of, the other party to the repurchase agreement. The Fund's right to liquidate its collateral in the event of a default could involve certain costs, losses or delays. To the extent that the proceeds from any sale upon a default in the obligation to repurchase were less than the repurchase price, the Fund would suffer a loss. If the financial institution which is party to the repurchase agreement petitions for bankruptcy or otherwise becomes subject to bankruptcy or other liquidation proceedings, there may be restrictions on the Fund's ability to sell the collateral and the Fund could suffer a loss.

REVERSE REPURCHASE AGREEMENTS

The Fund may enter into reverse repurchase agreements. In a reverse repurchase agreement, the Fund will sell securities and receive cash proceeds, subject to its agreement to repurchase the securities at a later date for a fixed price reflecting a market rate of interest. There is a risk that the counter party to a reverse repurchase agreement will be unable or unwilling to complete the transaction as scheduled, which may result in losses to the Fund.

FOREIGN DEPOSITARY RECEIPTS

The Fund may invest in American Depositary Receipts (“ADRs”), European Depositary Receipts (“EDRs”) and Global Depositary Receipts (“GDRs”) of foreign issuers.

ADRs, EDRs and GDRs may not necessarily be denominated in the same currency as the securities into which they may be converted. ADRs are receipts typically issued by a United States bank or trust company which evidence ownership of underlying securities issued by a foreign corporation. GDRs are receipts issued by either a U.S. or non-U.S. banking institution, that evidence ownership of underlying foreign securities. EDRs, which are sometimes referred to as Continental Depositary Receipts (“CDRs”), are receipts issued in Europe typically by non-United States banks and trust companies that evidence ownership of either foreign or domestic securities. Generally, ADRs in registered form are designed for use in the United States securities markets and EDRs, CDRs and GDRs in bearer form are designed for use in Europe. The Fund may invest in ADRs, EDRs and CDRs through “sponsored” or “unsponsored” facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depositary, whereas a depositary may establish an unsponsored facility without participation by the issuer of the deposited security. Holders of unsponsored depositary receipts generally bear all the costs of such facilities and the depositary of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities.

COMMERCIAL PAPER AND SHORT-TERM CORPORATE DEBT INSTRUMENTS

The Fund may invest in commercial paper (including variable amount master demand notes), which consists of short-term, unsecured promissory notes issued by corporations to finance short-term credit needs. Commercial paper is usually sold on a discount basis and has a maturity at the time of issuance not exceeding nine months. Variable amount master demand notes are demand obligations that permit the investment of fluctuating amounts at varying market rates of interest pursuant to arrangements between the issuer and a commercial bank acting as agent for the payee of such notes whereby both parties have the right to vary the amount of the outstanding indebtedness on the notes.

The Fund also may invest in nonconvertible corporate debt securities (e.g., bonds and debentures) with not more than one year remaining to maturity at the date of settlement.

FLOATING- AND VARIABLE-RATE OBLIGATIONS

The Fund may purchase floating- and variable-rate demand notes and bonds, which are obligations ordinarily having stated maturities in excess of 13 months, but which permit the holder to demand payment of principal at any time or at specified intervals not exceeding 13 months. Variable-rate demand notes include master demand notes, which are obligations that permit the Fund to invest fluctuating amounts, which may change daily without penalty, pursuant to direct arrangements between the Fund, as lender, and the borrower. The interest rates on these notes fluctuate from time to time. The issuer of such obligations ordinarily has a corresponding right, after a given period, to prepare in its discretion the outstanding principal amount of the obligations plus accrued interest upon a specified number of days’ notice to the holders of such obligations. The interest rate on a floating-rate demand obligation is based on a known lending rate, such as a bank’s prime rate, and is adjusted automatically at specified intervals. Frequently, such obligations are secured by letters of credit or other credit support arrangements provided by banks. Because these obligations are direct lending arrangements between the lender and borrower, it is not contemplated that such instruments generally will be traded. There generally is no established secondary market for these obligations, although they are redeemable at face value. Accordingly, where these obligations are not secured by letters of credit or other credit support arrangements, the Fund’s right to redeem is dependent on the ability of the borrower to pay principal and interest on demand. Such obligations frequently are not rated by credit rating agencies and the Fund may invest in obligations which are not so rated only if the Adviser determines that at the time of investment the obligations are of comparable quality to the other obligations in which such Fund may invest.

INVERSE FLOATING-RATE OBLIGATIONS

The Fund may invest in so-called “inverse floating rate obligations” or “residual interest bonds” or other obligations or certificates relating thereto structured to have similar features. In creating such an obligation, a municipality issues a certain amount of debt and pays a fixed interest rate. Half of the debt is issued as variable rate short term obligations, the interest rate of which is reset at short intervals, typically 35 days. The other half of the debt is issued as inverse floating rate obligations, the interest rate of which is calculated based on the difference between a multiple of (approximately two times) the interest paid by the issuer and the interest paid on the short-term obligation. Under usual circumstances, the holder of the inverse floating rate obligation can generally purchase an equal principal amount of the short- term obligation and link the two obligations in order to create long-term fixed rate bonds. Because the interest rate on the inverse floating

rate obligation is determined by subtracting the short-term rate from a fixed amount, the interest rate will decrease as the short-term rate increases and will increase as the short-term rate decreases. The magnitude of increases and decreases in the market value of inverse floating rate obligations may be approximately twice as large as the comparable change in the market value of an equal principal amount of long-term bonds which bear interest at the rate paid by the issuer and have similar credit quality, redemption and maturity provisions.

INITIAL PUBLIC OFFERINGS (“IPOs”)

The Fund may invest a portion of its assets in securities of companies offering shares in IPOs. IPOs may have a magnified performance impact on the Fund for as long as it has a small asset base. The impact of IPOs on the Fund’s performance likely will decrease as the Fund’s asset size increases, which could reduce the Fund’s total returns. Because IPO shares frequently are volatile in price, the Fund may hold IPO shares for a very short period of time. This may increase the turnover of the Fund’s portfolio and may lead to increased expenses for the Fund, such as commissions and transaction costs. By selling shares, the Fund may realize taxable gains they will subsequently distribute to shareholders. In addition, the market for IPO shares can be speculative and/or inactive for extended periods of time. The limited number of shares available for trading in some IPOs may make it more difficult for the Fund to buy or sell significant amounts of shares without an unfavorable impact on prevailing prices. Shareholders in IPO shares can be affected by substantial dilution in the value of their shares, by sales of additional shares and by concentration of control in existing management and principal shareholders.

The Fund’s investment in IPO shares may include the securities of unseasoned companies (companies with less than three years of continuous operations), which present risks considerably greater than common stocks of more established companies. These companies may have limited operating histories and their prospects for profitability may be uncertain. These companies may be involved in new and evolving businesses and may be vulnerable to competition and changes in technology, markets and economic conditions. They may be more dependent on key managers and third parties and may have limited product lines.

LEVERAGING TRANSACTIONS

The Fund may engage in the types of transactions which involve “leverage” because in the Fund receives cash which it can invest in portfolio securities and has a future obligation to make a payment. The use of these transactions by the Fund will generally cause its net asset value to increase or decrease at a greater rate than would otherwise be the case. Any investment income or gains earned from the portfolio securities purchased with the proceeds from these transactions which is in excess of the expenses associated from these transactions can be expected to cause the value of the Fund’s shares and distributions on the Fund’s shares to rise more quickly than would otherwise be the case. Conversely, if the investment income or gains earned from the portfolio securities purchased with proceeds from these transactions fail to cover the expenses associated with these transactions, the value of the Fund’s shares is likely to decrease more quickly than otherwise would be the case and distributions thereon will be reduced or eliminated. Hence, these transactions are speculative, involve leverage and increase the risk of owning or investing in the shares of the Fund. These transactions also increase the Fund’s expenses because of interest and similar payments and administrative expenses associated with them. Unless the appreciation and income on assets purchased with proceeds from these transactions exceed the costs associated with them, the use of these transactions by the Fund would diminish the investment performance of the Fund compared with what it would have been without using these transactions.

RECENT MARKET EVENTS

The Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. The value of a security or other instrument may decline due to changes in general market conditions, economic trends or events that are not specifically related to the issuer of the security or other instrument, or factors that affect a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates generally do not have the same impact on all types of securities and instruments.

Stresses associated with the 2008 financial crisis in the United States and global economies peaked approximately a decade ago, but periods of unusually high volatility in the financial markets and restrictive credit conditions, sometimes limited to a particular sector or a geography, continue to recur. Some countries, including the United States, have adopted and/or are considering the adoption of more protectionist trade policies, a move away from the tighter financial industry regulations that followed the financial crisis, and/or substantially reducing corporate taxes. The exact shape of these policies is still being considered, but the equity and debt markets may react strongly to expectations of change, which could increase volatility, especially if the market’s expectations are not borne out. A rise in protectionist trade policies, and the possibility of changes to some international trade agreements, could affect the economies of many nations in ways

that cannot necessarily be foreseen at the present time. In addition, geopolitical and other risks, including environmental and public health, may add to instability in world economies and markets generally. Economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not the Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic, political and/or financial difficulties, the value and liquidity of the Fund's investments may be negatively affected by such events.

An outbreak of infectious respiratory illness, COVID-19, caused by a novel coronavirus was first detected in December 2019 and has spread globally. This coronavirus has resulted in travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19, and other infectious illness outbreaks that may arise in the future, could adversely affect the economies of many nations or the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

ADDITIONAL MARKET DISRUPTION RISK

In late February 2022, Russia launched a large scale military attack on Ukraine. The invasion significantly amplified already existing geopolitical tensions among Russia, Ukraine, Europe, NATO and the West, including the U.S. In response to the military action by Russia, various countries, including the U.S., the United Kingdom, and European Union issued broad-ranging economic sanctions against Russia. Such sanctions included, among other things, a prohibition on doing business with certain Russian companies, large financial institutions, officials and oligarchs; a commitment by certain countries and the European Union to remove selected Russian banks from the Society for Worldwide Interbank Financial Telecommunications ("SWIFT"), the electronic banking network that connects banks globally; and restrictive measures to prevent the Russian Central Bank from undermining the impact of the sanctions. Additional sanctions may be imposed in the future. Such sanctions (and any future sanctions) and other actions against Russia may adversely impact, among other things, the Russian economy and various sectors of the economy, including but not limited to, financials, energy, metals and mining, engineering and defense and defense-related materials sectors; result in a decline in the value and liquidity of Russian securities; result in boycotts, tariffs, and purchasing and financing restrictions on Russia's government, companies and certain individuals; weaken the value of the ruble; downgrade the country's credit rating; freeze Russian securities and/or funds invested in prohibited assets and impair the ability to trade in Russian securities and/or other assets; and have other adverse consequences on the Russian government, economy, companies and region. Further, several large corporations and U.S. states have announced plans to divest interests or otherwise curtail business dealings with certain Russian businesses.

The ramifications of the hostilities and sanctions, however, may not be limited to Russia and Russian companies but may spill over to and negatively impact other regional and global economic markets of the World (including Europe and the United States), companies in other countries (particularly those that have done business with Russia) and on various sectors, industries and markets for securities and commodities globally, such as oil and natural gas. Accordingly, the actions discussed above and the potential for a wider conflict could increase financial market volatility, cause severe negative effects on regional and global economic markets, industries, and companies and have a negative effect on the Fund's investments and performance beyond any direct exposure to Russian issuers or those of adjoining geographic regions. In addition, Russia may take retaliatory actions and other countermeasures, including cyberattacks and espionage against other countries and companies in the World, which may negatively impact such countries and the companies in which the Fund invests. Accordingly, there may be heightened risk of cyberattacks which may result in, among other things, disruptions in the functioning and operations of industries or companies around the World, including in the United States and Europe.

The extent and duration of the military action or future escalation of such hostilities, the extent and impact of existing and future sanctions, market disruptions and volatility, and the result of any diplomatic negotiations cannot be predicted. These and any related events could have a significant impact on Fund performance and the value of an investment in the Fund, particularly with respect to Russian exposure.

OTHER INFORMATION

COMMODITY POOL OPERATOR INFORMATION

In connection with the management of the Fund, the Advisor has registered as a "commodity pool operator" ("CPO") under the Commodity Exchange Act and the rules of the CFTC and is subject to CFTC regulation with respect to the Fund. The

CFTC has adopted rules regarding the disclosure, reporting and recordkeeping requirements that apply with respect to a Fund as a result of the Advisor's registration as a CPO. Generally, these rules allow for substituted compliance with CFTC disclosure and shareholder reporting requirements, based on the Advisor's compliance with comparable SEC requirements. This means that most of the CFTC's disclosure and shareholder reporting requirements applicable to the Advisor as the Fund's CPO, the Advisor's compliance with SEC disclosure and shareholder reporting requirements will be deemed to fulfill the Advisor's CFTC compliance obligations. However, as a result of CFTC regulation with respect to the Fund, the Fund may incur additional compliance and other expenses and could adversely affect the Fund's total return. The Advisor is also subject to periodic inspections and audits by the National Futures Association ("NFA"). The CFTC has neither reviewed nor approved the Fund, its investment strategies, or this registration statement, including both the prospectus and this SAI.

PORTFOLIO TURNOVER

Purchases and sales of portfolio securities may be made as considered advisable by the Adviser in the best interests of the shareholders. The Fund's portfolio turnover rate may vary from year to year, as well as within a year. The Fund's distributions of any net short-term capital gains realized from portfolio transactions are taxable to shareholders as ordinary income. In addition, higher portfolio turnover rates can result in corresponding increases in portfolio transaction costs for the Fund.

For reporting purposes, the Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year. In determining such portfolio turnover, all securities whose maturities at the time of acquisition were one year or less are excluded. A 100% portfolio turnover rate would occur, for example, if all of the securities in the Fund's investment portfolio (other than short-term money market securities) were replaced once during the fiscal year. Portfolio turnover will not be a limiting factor should the Adviser deem it advisable to purchase or sell securities. The Fund's portfolio turnover rate for the most recent fiscal period ended March 31, was as follows:

2024⁽¹⁾
28%

(1) For the fiscal period December 28, 2023 (commencement of operations) through March 31, 2024.

DISCLOSURE OF PORTFOLIO HOLDINGS INFORMATION

The Trust has adopted a policy regarding the disclosure of information about the Fund's portfolio holdings. The Board of Trustees must approve all material amendments to this policy. The Fund's complete portfolio holdings are publicly disseminated each day the Fund is open for business through financial reporting and news services, including publicly accessible Internet web sites. The complete portfolio holdings are also included on the Fund's website, www.CyberHornetETFs.com. In addition, a basket composition file, which includes the security names and share quantities to deliver in exchange for Fund shares, together with estimates and actual cash components, is publicly disseminated daily prior to the opening of the Exchange via the National Securities Clearing Corporation ("NSCC"). The basket represents one Creation Unit of a Fund. The Trust, the Adviser and the Distributor will not disseminate non-public information concerning the Trust, except: (i) to a party for a legitimate business purpose related to the day-to-day operations of the Funds or (ii) to any other party for a legitimate business or regulatory purpose, upon waiver or exception.

Website Disclosures

The following information about the Fund is available on the Fund's website, www.CyberHornetETFs.com, which is publicly available and free of charge:

- Complete portfolio holdings, including for each security, the ticker symbol, CUSIP, description and the quantity and weight of each security in the Fund;
- The current NAV per share, market price, and premium/discount, each as of the end of the prior business day;
- A table showing the number of days that the Fund's shares traded at a premium or discount during the most recently completed fiscal year and quarter (or for the life of the fund for new funds);
- A chart showing the Fund's premiums or discounts for the most recently completed calendar year and calendar quarter (or for the life of the fund for any new ETFs);

- The median bid/ask spread for the Fund on a rolling 30-day basis; and
- If the premium or discount is greater than 2% for more than seven consecutive trading days, a statement that the premium/discount was greater than 2% and a discussion of the factors that are reasonably believed to have materially contributed to this premium/discount.

MANAGEMENT

Board of Trustees Responsibilities. The management and affairs of the Trust are supervised by the Board under the laws of the State of Delaware and the 1940 Act. The Board is responsible for overseeing the Fund. The Board approves all significant agreements between the Fund and the persons or companies that furnish services to the Fund, including agreements with its distributor, Adviser, administrator, custodian and transfer agent. The day-to-day operation of the Fund is delegated to the Fund's Adviser.

Trustees and Officers. The names of the Trustees of the Trust, their addresses, ages/date of birth, positions, principal occupation(s) during the past five years, number of portfolios in the fund complex overseen, and other directorships held by each Trustee are set forth below.

Name, Address and Age/Date of Birth	Position(s) Held with Fund	Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years	Portfolios in Fund Complex* Overseen by Trustee	Other Directorships Held by Trustee During Past 5 Years
Non-Interested Trustees					
Lance J. Baller (born 1974)	Trustee	Indefinite; since January 18, 2006	President, Ultimate Investments Inc. (1995 - present); President, Baller Enterprises, Inc. (1993 - present); President, Baller Family Foundation (2014 – present); Secretary and Vice President, High Speed Aggregate, Inc., (2010 - present); President, Lakeview Village, Inc. (2010 – 2019); Secretary, HSA Bedrock LLC (2014 - present); Member, RM Investments, (2014 - 2017); President, High Speed Mining, LLC (2014 - present); Chairman, Iofina PLC (2014 - present); CEO and Director, Global Healthcare REIT (2015 - present); Vice President and Secretary, Empire Aggregate Inc. (2018 - present); President, Empire Leasing, Inc. (2018 - present); President, Titan Au, Inc. (2018 - present); Managing Member, Yukon Au LLC (2018-present).	2	Co-Chairman, Eagle: XM; Director, Iofina PLC; Vice Chairman, NetAds International, Inc.; Director, Baylor Solar, (2014); Director, High Speed Mining (2014 – 2018); CEO and Director, Global Healthcare REIT (2015 - present); Director, Douglas County Soccer (2017 – present); Empire Au, Inc. (2018 – present); Director, GBB Management (2018 - present).
Vijoy P. Chattergy (born 1967)	Trustee	Indefinite; since April 3, 2020	President and Founder, VMLH, LLC, (2018- present); Chief Investment Officer, Consultant, Consequent Capital Management (2022-2023) Employees' Retirement System of the State of Hawaii (2011-2018).	2	None
Interested Trustee					
Michael Willis (born 1966)	Trustee	Indefinite; since January 18, 2006	President of ONEFUND, LLC (formerly, The Index Group, LLC) (2004 to present). Manager of Digital Funds, LLC (2021 to present).	2	None

* Mr. Willis may be deemed an “interested person” of the Trust as that term is defined in the 1940 Act because of his ownership and control of the Adviser, and service as an officer of the Adviser.

** The “Fund Complex” includes all series of the Trust and any other investment companies for which the Adviser provides investment advisory services (currently two).

The names of the officers, their addresses, ages, position(s) held with the Trust, and principal occupation(s) during the past five years are described in the table below.

Name, Address and Age/Date of Birth	Position(s) Held with Fund	Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years
Michael Willis (born 1966)	President, Treasurer and Secretary	Indefinite; since January 18, 2006 (President), since November 25, 2009 (Treasurer and Secretary)	President of ONEFUND, LLC (formerly, The Index Group, LLC) (2004 to present); Manager of Digital Fund, LLC (2021 to present).
Randi Roessler (born 1981)	Chief Compliance Officer	Indefinite; since June 29, 2023	Director, PINE Advisor Solutions (March 2023 to present); Chief Compliance Officer, Davis Selected Advisers, L.P., the Davis Funds, Selected and Clipper Funds, the Davis Select Fundamental ETF Trust and Davis Distributors, LLC (January 2018 to February 2023).
Jesse D. Hallee (born 1976)	Assistant Secretary	Indefinite; since May 4, 2020	Senior Vice President and Associate General Counsel, Ultimus Fund Solutions, LLC (August 2022 to present); Vice President and Senior Managing Counsel, Ultimus Fund Solutions, LLC (June 2019 to August 2022); Vice President and Managing Counsel, State Street Bank and Trust Company (March 2013 to June 2019).

All communications to the Trustees and Officers of the Fund may be directed c/o ONEFUND TRUST, 200 2nd Ave. South #737, St. Petersburg, Florida 33701.

The Board believes that the significance of each Trustee’s experience, qualifications, attributes or skills is an individual matter (meaning that experience that is important for one Trustee may not have the same value for another) and that these factors are best evaluated at the Board level, with no single Trustee, or particular factor, being indicative of the Board’s effectiveness. The Board determined that each of the Trustees is qualified to serve as a Trustee of the Trust based on a review of the experience, qualifications, attributes and skills of each Trustee. In reaching this determination, the Board has considered a variety of criteria, including, among other things: character and integrity; ability to review critically, evaluate, question and discuss information provided, to exercise effective business judgment in protecting shareholder interests and to interact effectively with the other Trustees, the Adviser, other service providers, counsel and the independent registered accounting firm (“independent auditors”); and willingness and ability to commit the time necessary to perform the duties of a Trustee. Each Trustee’s ability to perform his duties effectively is evidenced by his experience or achievements in the following areas, in no particular order of importance: management or board experience in the investment management industry or at companies or organizations in other fields, entrepreneurial experience, educational background and professional training; and experience as a Trustee of the Trust. Information discussing the specific experience, skills, attributes and qualifications of each Trustee which led to the Board’s determination that the Trustee should serve in this capacity is provided below.

Michael Willis. Michael G. Willis is Founder and President of the Adviser and ONEFUND Trust since 2004 and 2005, respectively. Mr. Willis has been the Lead Portfolio Manager for the Fund since its inception in 2015. He has been a portfolio manager for 1940 Act mutual funds for the past 15 years. Mr. Willis is also the Founder and Manager of Digital Funds, LLC since 2021. Prior to his association with the Adviser, Mr. Willis worked in the investment banking industry for UBS Financial Services, Paine Webber, & Smith Barney. Mr. Willis was chosen to serve as a Trustee based on his experience as founder of these companies and his Wall Street portfolio management experience.

Lance J. Baller. Mr. Baller was co-founder, CEO and President (2010-2013), CFO (2006-2013) of Iofina Plc since prior to his departure for health reasons in June 2013. Mr. Baller returned to Iofina plc as Chairman in April 2014. Mr. Baller has been the CEO of Global Healthcare REIT since 2015. Mr. Baller is the former managing partner of The Elevation Fund and Elevation Capital Management. Mr. Baller is the former managing partner of Shortline Equity Partners, Inc., a mid-market merger and acquisitions consulting and investment company in the United States. He has actively served on the

investment, audit, corporate governance, and compensation committees, while on the board of directors of companies in Asia and North America. Mr. Baller is also a former vice president of mergers and acquisitions, financing and corporate development at Integrated Biopharma, Inc. and prior to this a vice president of the investment banking firms UBS AG and Morgan Stanley. He has served as Chairman to various companies and has led successful restructurings. He was chosen to serve as a Trustee of the Trust based on his business, financial services, investment management and accounting experience.

Vijoy P. Chattergy. Mr. Chattergy brings to the Board his investment management leadership expertise in public, private, and nonprofit sector financial services entities, covering equities, fixed income, foreign exchange, and alternatives asset classes. Mr. Chattergy is the President and Founder of VMLH, LLC, a consulting firm which provides strategic and practical advice to global asset managers. His professional experience includes work in the development of functional risk class portfolio design, risk management applications, and brand development. In addition, Mr. Chattergy has been selected to exclusive formal leadership programs spanning three decades and provides global and multi-cultural sensitivity and experience. He was chosen to serve as a Trustee of the Trust based upon his investment management leadership and experience.

Specific details regarding each Trustee's principal occupations during the past five years are included in the table above. The summaries set forth above as to the experience, qualifications, attributes and/or skills of the Trustees do not constitute holding out the Board or any Trustee as having any special expertise or experience, and do not impose any greater responsibility or liability on any such person or on the Board as a whole than would otherwise be the case.

Board Composition and Leadership Structure

The Board currently consists of three individuals, one of whom is an Interested Trustee. The Board has appointed Michael G. Willis, an Interested Trustee, to serve in the role of Chairman. The Chairman's role is to preside at all meetings of the Board and to act as a liaison with the Adviser, other service providers, counsel and other Trustees generally between meetings. The Chairman may also perform such other functions as may be delegated by the Board from time to time. Mr. Willis is also the President, Treasurer and Secretary of the Fund and the President of the Adviser. The Board has does not have a lead Independent Trustee. The Independent Trustees, acting collectively, seek to serve as a check and balance on the activities of the Interested Trustee.

Overall responsibility for oversight of the Fund rests with the Trustees. The Trust has engaged the Adviser to manage the Fund on a day-to day basis. The Board is responsible for overseeing the Adviser and other service providers in the operations of the Fund in accordance with the provisions of the 1940 Act, applicable provisions of state and other laws and the Trust's organizational documents. The Board meets at regularly scheduled quarterly meetings each year. In addition, the Board may hold special in-person or telephonic meetings or informal conference calls to discuss specific matters that may arise or require action between regular meetings.

The Board believes that its structure facilitates the orderly and efficient flow of information to the Trustees from the Adviser and other service providers with respect to services provided to the Fund, potential conflicts of interest that could arise from these relationships and other risks that the Fund may face. The Board further believes that its structure allows all of the Trustees to participate in the full range of the Board's oversight responsibilities. The Board believes that the orderly and efficient flow of information and the ability to bring each Trustee's talents to bear in overseeing the Fund's operations is important, in light of the size and complexity of the Fund and the risks that the Fund faces. The Board and its committees review their structure regularly, to help ensure that it remains appropriate as the business and operations of the Fund and the environment in which the Fund operates changes.

Board's Role in Risk Oversight of the Fund

The Board oversees risk management for the Fund directly and, as to certain matters, through its committees. The Board exercises its oversight in this regard primarily through requesting and receiving reports from and otherwise working with the Fund's senior officers (including, Mr. Willis and the Fund's Chief Compliance Officer), the Fund's independent auditors, legal counsel and personnel from the Fund's other service providers. The Board has adopted, on behalf of the Fund, and periodically reviews with the assistance of the Fund's Chief Compliance Officer, policies and procedures designed to address certain risks associated with the Fund's activities. In addition, the Adviser and the Fund's other service providers also have adopted policies, processes and procedures designed to identify, assess and manage certain risks associated with the Fund's activities, and the Board receives reports from service providers with respect to the operation of these policies, processes and procedures as required and/or as the Board deems appropriate. The Board does not believe that a separate Risk Oversight Committee is necessary for effective risk oversight at this time, but intends to continuously evaluate how it assesses risk and will consider again in the future whether any changes to their current structure are prudent.

Committees

The Board has established an Audit Committee and a Nominating and Governance Committee.

The Audit Committee consists of the Independent Trustees. The members of the Audit Committee are not “interested persons” of the Trust as defined by the 1940 Act (“Independent Trustees”). The primary purpose of the Audit Committee is to oversee the accounting and financial reporting policies, practices and internal controls of the Trust.

The Audit Committee is currently chaired by Lance J. Baller. The Audit Committee: (i) recommends to the Board of Trustees the selection, retention and compensation of an independent public accounting firm; (ii) annually reviews the scope of the proposed audit, the audit procedures to be utilized and the proposed audit fees; (iii) reviews the results of the annual audit with the independent auditors; (iv) reviews the annual financial statements of the Fund with management and the independent auditors; and (v) reviews the adequacy and effectiveness of internal controls and procedures with management and the independent auditors. The Audit Committee met two times during the fiscal year ended March 31, 2024.

The Trust also has a Nominating and Governance Committee that is comprised of the Independent Trustees. The Nominating and Governance Committee: (i) makes nominations for trustee membership on the Board; (ii) evaluates on a periodic basis the operations and effectiveness of the Board as a whole; (iii) periodically reviews the composition of the Board to determine whether it may be appropriate to add individuals with different backgrounds or skills from those already on the Board; (iv) periodically reviews Board governance procedures and shall recommend any appropriate changes to the full Board; and (v) periodically reviews trustee compensation and shall recommend any appropriate changes to the Board as a group. The Nominating and Governance Committee does not consider nominees recommended by shareholders. The Nominating and Governance Committee did not meet during the fiscal year ended March 31, 2024.

Trustee Share Ownership

The following tables provide the dollar range of equity securities beneficially owned by the Board on December 31, 2023.

Name of Trustee	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies
Independent Trustees:		
Lance J. Baller	None	None
Vijoy P. Chattergy	None	None
Interested Trustee:		
Michael G. Willis	\$1-\$10,000	\$1-\$10,000

None of the Independent Trustees own securities in the Adviser or the Distributor, nor do they own securities in any entity directly controlling, controlled by, or under common control with the Adviser or the Distributor.

Trustee Compensation*

The following table provides the total fees paid to Trustees by the Fund for the fiscal period ended March 31, 2024.

Name of Trustee	Aggregate Compensation from the Fund	Total Compensation from Fund and Fund Complex Paid to Trustees
Independent Trustees:		
Lance J. Baller	\$0	\$509
Vijoy P. Chattergy	\$0	\$509
Interested Trustees:		
Michael Willis	\$0	\$0

* Independent Trustees of the Trust received from the Trust an annual retainer of 1/10 of 1 basis point of the average annual assets under management, paid quarterly. Trustees who are affiliated with the Adviser do not receive compensation from the Trust. All Trustees (Interested and Independent) are reimbursed for all out-of-pocket expenses

(e.g., travel and lodging) relating to attendance at such meetings. The Trust has not adopted any pension or retirement plans for the officers or Trustees of the Trust. Therefore, there have been no currently estimated annual benefits upon retirement.

None of the officers receive compensation from the Trust for their services, with the exception of the Chief Compliance Officer and the Assistant Secretary whose employers receive compensation for the work performed by such officers on behalf of the Trust.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A principal shareholder is any person who owns of record or beneficially owns 5% or more of any class of the Fund's outstanding equity securities. A control person is any person who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control.

As of July 1, 2024, the following shareholders owned 5% or more of the outstanding share of the Fund:

Name and Address	% Ownership	Type of Ownership
Charles Schwab & Co., Inc. 211 Main Street San Francisco, CA 94105-1905	81.11%	Record
Vanguard Marketing Corporation 5951 Lockett Court, Suite A1 El Paso, TX 79932	7.56%	Record

CODE OF ETHICS

The Trust and the Adviser each have adopted a code of ethics, as required by applicable law, which is designed to prevent affiliated persons of the Trust and the Adviser from engaging in deceptive, manipulative, or fraudulent activities in connection with securities held or to be acquired by the Fund (which may also be held by persons subject to a code). Such persons are prohibited from effecting certain transactions, allowed to effect certain exempt transactions, required to preclear certain transactions and to report certain transactions on a regular basis.

INVESTMENT ADVISER TO THE FUND

ONEFUND, LLC (the "Adviser", formerly known as "The Index Group, LLC" and "the Index Group, Inc.") serves as investment adviser to the Fund pursuant to an investment advisory contract (the "Investment Advisory Agreement"). The Adviser is located at 200 2nd Ave. South #737, St. Petersburg, Florida 33701. The Adviser is majority-owned and controlled by Michael Willis, an interested Trustee of the Trust and the portfolio manager of the Fund. Mr. Willis also serves as Chairman and President of the Adviser.

Under the terms of the Investment Advisory Agreement, the Adviser serves as the investment adviser and makes the investment decisions for the Fund and continuously reviews, supervises and administers the investment program of the Fund, subject to the supervision of, and policies established by, the Trustees of the Trust. Under the terms of the Investment Advisory Agreement, the investment advisory services of the Adviser are not exclusive. The Adviser is free to render investment advisory services to others.

For its services, the Adviser is entitled to a fee, computed daily and paid monthly, equal on an annual basis to 0.95% of the Fund's average daily net assets. The Adviser provides investment advisory services and pays the Fund's operating expenses, with certain exceptions, in return for a "unitary fee" exclusive of expenses incurred pursuant to the Fund's 12b-1 Distribution Plan, if any; costs of borrowing (such as interest charges and dividend expenses on securities sold short); taxes or governmental fees; acquired fund fees and expenses, if any; brokerage commissions and other expenses of executing portfolio transactions; costs of holding shareholder meetings, including proxy costs; fees and expenses associated with the Fund's securities lending program, if any; fees of independent counsel to the disinterested Trustees; and litigation and potential litigation and other extraordinary expenses not incurred in the ordinary course of the Fund's business.

The table below shows the advisory fees paid by the Fund for the fiscal period ended March 31:

2024⁽¹⁾
\$2,716

(1) For the fiscal period December 28, 2023 (commencement of operations) through March 31, 2024.

PORTFOLIO MANAGEMENT INFORMATION

Michael Willis is responsible for the day-to-day management of the Fund. The Prospectus contains information about Mr. Willis and his management of the Fund. The sections below contain certain additional information about his compensation, his management of other accounts, and potential conflicts of interest.

Management of Other Accounts. As of March 31, 2024, Mr. Willis was primarily responsible for the day-to-day management of other accounts, as set forth in the table below.

Category of Account	Total Number of Accounts Managed	Total Assets in Accounts Managed (in Millions)	Number of Accounts for which Advisory Fee is Based on Performance	Assets in Accounts for which Advisory Fee is Base on Performance
Other Registered Investment Companies	1	\$114	0	\$0
Other Pooled Investment Vehicles ("PIVs")	0	\$0	0	\$0
Other Accounts	0	\$0	0	\$0

Portfolio Manager Compensation Structure

Mr. Willis is entitled to receive a base salary from the Adviser for his services in the various positions he holds with the Adviser, including his position as portfolio manager and President. In addition, Mr. Willis, as the principal shareholder of the Adviser, is entitled to receive a share of net profits earned by the Adviser. Mr. Willis does not receive any other form of compensation or benefits for his services to the Adviser.

Potential Conflicts of Interest. Since the Fund and other accounts that may be managed by Mr. Willis and the Adviser in the future could have similar investment strategies, there is a potential risk that Mr. Willis could favor one or more of the other accounts over the Fund. However, the Adviser has established policies and procedures governing brokerage practice and the allocation of trades, which are designed to seek to ensure that the purchase and sale of securities among various accounts managed by the Adviser are fairly and equitably allocated. The Adviser is not aware of any cases where the investment strategies employed for the other accounts managed by Mr. Willis and the Adviser would cause him to take positions on the contrary side of the market from the Fund, or otherwise contrary to the interests of the Fund.

Portfolio Manager Ownership of Securities

The following table shows the dollar range of securities of the Fund beneficially owned by the portfolio manager as of March 31, 2024.

Portfolio Manager	Dollar Range of Equity Securities in the Fund Beneficially Owned
Michael G. Willis	None

PROXY VOTING POLICIES

The Fund has adopted Proxy Voting Policies that delegate the responsibility of voting proxies to the Adviser. The Proxy Voting Policies of the Fund and Adviser are attached as Appendix B and Appendix C respectively. These policies provide a general indication as to how the Adviser and will vote proxies relating to portfolio securities. However, the guidelines do not address all potential voting issues or the intricacies that may surround individual proxy votes. For that reason, there may be instances in which votes may vary from the guidelines presented. Notwithstanding the foregoing, the Adviser will always endeavor to vote proxies relating to portfolio securities in accordance with the Fund's investment objective. The policies also describe the courses of action available to the Adviser when it determines that there is a material conflict of interest, including for example taking instruction from the Fund's Board.

Information regarding how the Adviser voted proxies is available during the most recent 12-month period ended June 30 without charge (1) by calling the Fund at 1-844-464-6339; (2) by emailing the Fund at info@cyberhornetetfs.com; and (3) on the SEC's website at www.sec.gov.

DISTRIBUTION OF FUND SHARES

The Trust, on behalf of the Fund and ACA Group (the “Distributor”) are parties to a distribution agreement (the “Distribution Agreement”), whereby the Distributor acts as principal underwriter for the Funds shares and distributes the shares of the Fund. Shares are continuously offered for sale by the Distributor only in Creation Units. Each Creation Unit is made up of 25,000 Shares. The Distributor will not distribute Shares in amounts less than a Creation Unit and does not maintain a secondary market in Fund Shares. The principal business address of the Distributor is Three Canal Plaza, 3rd Floor, Portland, Maine 04101.

Under the Distribution Agreement, the Distributor, as agent for the Trust, will receive orders for the purchase and redemption of Creation Units, provided that any subscriptions and orders will not be binding on the Trust until accepted by the Trust. The Distributor will deliver a prospectus to authorized participants purchasing Shares in Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934 (the “Exchange Act”) and a member of FINRA.

Upon direction from the Trust, the Distributor may also enter into agreements with securities dealers (“Soliciting Dealers”) who will solicit purchases of Creation Units of Shares. Such Soliciting Dealers may also be Authorized Participants (as discussed in “Creation and Redemption of Creation Units” below) or DTC participants (as defined below).

The Distribution Agreement will continue for two years from its effective date and is renewable thereafter. The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the shareholders of the Fund and (ii) by the vote of a majority of the Trustees who are not “interested persons” of the Trust and have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement is terminable without penalty by the Trust on 60 days’ written notice when authorized either by majority vote of its outstanding voting shares or by a vote of a majority of its Board (including a majority of the Independent Trustees), or by the Distributor on 60 days written notice, and will automatically terminate in the event of its assignment. The Distribution Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of the Distributor, or reckless disregard by it of its obligations thereunder, the Distributor shall not be liable for any action or failure to act in accordance with its duties thereunder.

Distribution Plan

The Fund has adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act that allows the Fund to pay distribution and/or service fees for the sale and distribution of Fund shares, and for services provided to shareholders. No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because these fees are paid out of the Fund’s assets on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

ADMINISTRATION, TRANSFER AGENT AND COMPLIANCE

Pursuant to the Administration Agreement, as compensation for its services, U.S. Bancorp Fund Services, LLC doing business as U.S. Bank Global Fund Services (“Fund Services”), located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, receives from the Adviser a combined fee for fund administration and fund accounting services based on the Fund’s current average daily net assets. Fund Services is also entitled to be reimbursed for certain out-of-pocket expenses. In addition to its role as administrator, Fund Services also acts as fund accountant (“Fund Accountant”).

The Fund’s Administration fees for the most recent fiscal period ended March 31, 2024, which are paid by the Adviser, were as follows:

2024 ⁽¹⁾
\$36,201

(1) For the fiscal period December 28, 2023 (commencement of operations) through March 31, 2024.

PINE Advisors LLC (“PINE”) provides Chief Compliance Officer services to the Fund under a Services Agreement. Under the Services Agreement, PINE also provides services in monitoring and testing the policies and procedures of the Fund in conjunction with the requirements under Rule 38a-1 under the 1940 Act. PINE receives compensation for these services under the Services Agreement.

To generate additional income, the Fund may lend up to 33 ⅓% of its total assets pursuant to agreements that would require that the loan be continuously secured by cash. As of the date of this SAI, the Fund has not entered into a securities lending agreement with a securities lending agent.

CUSTODIAN AND TRANSFER AGENT

U.S. Bank National Association., (“USBNA”) (the “Custodian”), located at 1555 North RiverCenter Drive, Suite 302, Milwaukee, Wisconsin 53212 serves as the custodian for the Fund. As such, the Custodian holds in safekeeping certificated securities and cash belonging to the Fund and, in such capacity, is the registered owner of securities in book-entry form belonging to the Fund. Upon instruction, the Custodian receives and delivers cash and securities of the Fund in connection with Fund transactions and collects all dividends and other distributions made with respect to Fund portfolio securities. The Custodian also maintains certain accounts and records of the Fund. Sub-custodians provide custodial services for any foreign assets held outside of the United States. USBNA also serves as the Fund’s Transfer Agent.

COUNSEL

Davis Graham & Stubbs LLP, located at 1500 17th Street, Suite 500, Denver, Colorado 80202, serves as counsel to the Trust.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Cohen & Company, Ltd., serves as the Independent Registered Public Accounting Firm for the Trust. Cohen & Company, Ltd., provides audit and tax services, and assistance and consultation in connection with certain SEC filings, and is located at 1835 Market St., Suite 310, Philadelphia, Pennsylvania 19103.

EXPENSES

The Fund bears the costs of its operations not assumed by the Adviser. The costs borne by the Fund include expenses incurred pursuant to the Fund’s 12b-1 Distribution Plan, if any; costs of borrowing (such as interest charges and dividend expenses on securities sold short); taxes or governmental fees; acquired fund fees and expenses, if any; brokerage commissions and other expenses of executing portfolio transactions; costs of holding shareholder meetings, including proxy costs; fees and expenses associated with the Fund’s securities lending program, if any; fees of independent counsel to the disinterested Trustees; and litigation and potential litigation and other extraordinary expenses not incurred in the ordinary course of the Fund’s business.

BROKERAGE ALLOCATION AND OTHER PRACTICES

Brokerage Transactions

The policy of the Trust regarding purchases and sales of securities for the Fund is that primary consideration will be given to obtaining the most favorable prices and efficient executions of transactions. Consistent with this policy, when securities transactions are effected on a stock exchange, the Trust’s policy is to pay commissions which are considered fair and reasonable without necessarily determining that the lowest possible commissions are paid in all circumstances. The Trust believes that a requirement always to seek the lowest possible commission cost could impede effective portfolio management and preclude the Fund and the Adviser from obtaining a high quality of brokerage and research services. In seeking to determine the reasonableness of brokerage commissions paid in any transaction, the Adviser will rely upon its experience and knowledge regarding commissions generally charged by various brokers and on its judgment in evaluating the brokerage and research services received from the broker effecting the transaction. These services may be more beneficial to the Fund or certain accounts of the Adviser than to others. Such determinations are necessarily subjective and imprecise, as in most cases, an exact dollar value for those services is not ascertainable. The Trust has adopted policies and procedures that prohibit the consideration of sales of the Fund’s shares as a factor in the selection of a broker or dealer to execute its portfolio transactions.

The Adviser owes a fiduciary duty to its clients to seek to provide best execution on trades effected. In selecting a broker/dealer for each specific transaction, the Adviser chooses the broker/dealer deemed most capable of providing the services necessary to obtain the most favorable execution. Best execution is generally understood to mean the most favorable cost or net proceeds reasonably obtainable under the circumstances. The full range of brokerage services applicable to a particular transaction may be considered when making this judgment, which may include, but is not limited to: liquidity, price, commission, timing, aggregated trades, capable floor brokers or traders, competent block trading coverage, ability to position, capital strength and stability, reliable and accurate communications and settlement processing, use of automation, knowledge of other buyers or sellers, arbitrage skills, administrative ability, underwriting and provision of information on a particular security or market in which the transaction is to occur. The specific criteria will vary depending upon the nature of the transaction, the market in which it is executed, and the extent to which it is possible to select from among multiple broker/dealers. The Adviser will also use electronic crossing networks (“ECNs”) when appropriate.

The Adviser does not currently use the Fund's assets for, or participate in, any third-party soft dollar arrangements, although it may receive proprietary research from various full-service brokers, the cost of which is bundled with the cost of the broker's execution services. The Adviser does not "pay up" for the value of any such proprietary research.

The Adviser is responsible, subject to oversight by the Adviser and the Board, for placing orders on behalf of the Fund for the purchase or sale of portfolio securities. If purchases or sales of portfolio securities of the Fund and one or more other investment companies or clients supervised by the Adviser are considered at or about the same time, transactions in such securities are allocated among the several investment companies and clients in a manner deemed equitable and consistent with its fiduciary obligations to all by the Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security so far as the Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower brokerage commissions will be beneficial to the Fund. The primary consideration is prompt execution of orders at the most favorable net price.

The Fund may deal with affiliates in principal transactions to the extent permitted by exemptive order or applicable rule or regulation.

For the fiscal period ended March 31, the Fund paid the following aggregate brokerage commissions:

2024 ⁽¹⁾
\$231

(1) For the fiscal period December 28, 2023 (commencement of operations) through March 31, 2024.

Regular Broker-Dealers

The Fund is required to identify any securities of its "regular brokers and dealers" (as such term is defined in the 1940 Act) which it may hold at the close of its most recent fiscal year. "Regular brokers or dealers" of the Trust are the ten brokers or dealers that, during the most recent fiscal year: (i) received the greatest dollar amounts of brokerage commissions from the Trust's portfolio transactions; (ii) engaged as principal in the largest dollar amounts of portfolio transactions of the Trust; or (iii) sold the largest dollar amounts of the Trust's shares.

The Fund is new and has no securities of "regular broker dealers" to report.

DESCRIPTION OF SHARES

The Trust is an open-end, management investment company organized as a Delaware statutory trust. The Trust is comprised of two series, one of which is covered by this SAI. The Fund is a separate series of shares of beneficial interest.

The Trust's Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional shares of one or more series and classes within any series and to divide or combine the shares of any series or class without materially changing the proportionate beneficial interest of such shares of such series or class in the assets held with respect to that series. Each share represents an equal beneficial interest in the net assets of the Fund with each other share of the Fund. The Trustees of the Trust may authorize the issuance of shares of additional series and the creation of classes of shares within any series with such preferences, voting powers, rights, duties and privileges as the Trustees may determine; however, the Trustees may not classify or change outstanding shares in a manner materially adverse to shareholders of each share. Upon liquidation of the Fund, shareholders are entitled to share pro rata in the net assets of the Fund available for distribution to such shareholders.

The shareholders of the Fund are entitled to one vote for each dollar of NAV (or a proportionate fractional vote with respect to the remainder of the NAV of shares, if any), on matters on which shares of the Fund shall be entitled to vote. Subject to the 1940 Act, the Trustees themselves have the power to alter the number and the terms of office of the Trustees, to lengthen their own terms, or to make their terms of unlimited duration subject to certain removal procedures, and appoint their own successors, provided, however, that immediately after such appointment the requisite majority of the Trustees have been elected by the shareholders. The voting rights of shareholders are not cumulative with respect to the election of Trustees. It is the intention of the Trust not to hold meetings of shareholders annually. The Trustees may call meetings of shareholders for action by shareholder vote as may be required by either the 1940 Act or the Declaration of Trust of the Trust.

Each share of a series represents an equal proportionate interest in the assets in that series with each other share of that series. The shares of each series participate equally in the earnings, dividends and assets of the particular series. Expenses of the Trust which are not attributable to a specific series are allocated among all of their series in a manner

deemed by the Trustees to be fair and equitable. Shares have no pre-emptive or conversion rights, and when issued, are fully paid and non-assessable. Shares of each series generally vote together, except when required under federal securities laws to vote separately on matters that may affect a particular class, such as the approval of distribution plans for a particular class.

The Trustees of the Trust may, without shareholder approval (unless otherwise required by applicable law): (i) cause the Trust to merge or consolidate with or into one or more corporations (or series thereof) to the extent permitted by law, partnerships, associations, corporations or other business entities (including trusts, partnerships, associations, corporations, or other business entities created by the Trustees to accomplish such merger or consolidation) so long as the surviving or resulting entity is an investment company as defined in the 1940 Act, or is a series thereof, that will succeed to or assume the Trust's registration under the 1940 Act and that is formed, organized, or existing under the laws of the U.S. or of a state, commonwealth, possession or territory of the U.S., unless otherwise permitted under the 1940 Act; (ii) cause the shares to be exchanged under or pursuant to any state or federal statute to the extent permitted by law; or (iii) cause the Trust to reorganize as a corporation, limited liability company or limited liability partnership under the laws of Delaware or any other state or jurisdiction. However, the exercise of such authority may be subject to certain restrictions under the 1940 Act.

The Trustees may, without shareholder vote, generally restate, amend or otherwise supplement the Trust's governing instruments, including the Certificate of Trust and the Declaration of Trust, without the approval of shareholders, subject to limited exceptions, such as the right to elect Trustees.

The Trustees, without obtaining any authorization or vote of shareholders, may change the name of any series or dissolve or terminate any series.

Shares have no subscription or preemptive rights and only such conversion or exchange rights as the Board may grant in its discretion. When issued for payment as described in the Prospectus and this SAI, Shares will be fully paid and non-assessable. In the event of a liquidation or dissolution of the Trust, Shares of the Fund are entitled to receive the assets available for distribution belonging to the Fund, and a proportionate distribution, based upon the relative asset values of the Fund, of any general assets not belonging to the Fund which are available for distribution.

Rule 18f-2 under the 1940 Act provides that any matter required to be submitted to the holders of the outstanding voting securities of an investment company such as the Trust shall not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding Shares of the Fund affected by the matter. For purposes of determining whether the approval of a majority of the outstanding Shares of the Fund will be required in connection with a matter, the Fund will be deemed to be affected by a matter unless it is clear that the interests of the Fund in the matter are identical, or that the matter does not affect any interest of the Fund. Under Rule 18f-2, the approval of an investment advisory agreement or any change in investment policy would be effectively acted upon with respect to the Fund only if approved by a majority of the outstanding Shares of the Fund. However, Rule 18f-2 also provides that the ratification of independent public accountants, the approval of principal underwriting contracts, and the election of Trustees may be effectively acted upon by Shareholders of the Trust voting without regard to series.

PURCHASE, REDEMPTION, AND PRICING OF SHARES

Buying and Selling Shares

In the Secondary Market

Most investors will buy and sell Shares of the Fund in secondary market transactions through brokers. Shares of the Fund are listed and traded on the secondary market on the Exchange. Shares can be bought and sold throughout the trading day like other publicly traded shares. There is no minimum investment. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The spread varies over time for Shares of the Fund based on the Fund's trading volume and market liquidity, and is generally lower if the Fund has a lot of trading volume and market liquidity.

Shares of the Fund trade on the Exchange at prices that may differ to varying degrees from the daily NAV of the Shares.

Directly with the Fund

The Fund's Shares are issued or redeemed by the Fund at NAV only in Creation Units. Investors such as market makers, large investors and institutions who wish to deal in Creation Units directly with the Fund must have entered into an authorized participant agreement with the Distributor, or purchase through a dealer that has entered into such an

agreement. For additional information regarding the creation and redemption of creation units, see the section below entitled, "Creation and Redemption of Creation Units."

Creation and Redemption of Creation Units

General

The Trust issues and sells Shares of the Funds only in Creation Units on a continuous basis through the Distributor, without an initial sales load, at their NAV next determined after receipt, on any Business Day (as defined herein), of an order in proper form. An Authorized Participant (defined below) that is not a "qualified institutional buyer," as such term is defined under Rule 144A of the Securities Act of 1933, will not be able to receive, as part of a redemption, restricted securities eligible for resale under Rule 144A.

A "Business Day" with respect to the Fund is any day on which the Exchange is open for business. As of the date of this SAI, the Exchange observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, President's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Continuous Offering

The method by which Creation Units are created and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Fund on an ongoing basis, at any point a "distribution," as such term is used in the 1933 Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner that could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the 1933 Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent shares and sells such shares directly to customers or if it chooses to couple the creation of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the 1933 Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in Shares, whether or not participating in the distribution of Shares, generally are required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the 1933 Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus delivery obligation with respect to Shares of the Fund are reminded that, pursuant to Rule 153 under the 1933 Act, a prospectus delivery obligation under Section 5(b)(2) of the 1933 Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the prospectus is available at the Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is available only with respect to transactions on an exchange.

Portfolio Deposit

The consideration for a purchase of Creation Units generally consists of the in-kind deposit of a portfolio of securities and other investments (the "Deposit Instruments") included in the Fund and an amount of cash computed as described below (the "Cash Amount"). The Cash Amount together with the Deposit Instruments, as applicable, are referred to as the "Portfolio Deposit," which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund.

In the event the Fund requires Deposit Instruments in consideration for purchasing a Creation Unit, the portfolio of securities required may be different than the portfolio of securities the Fund will deliver upon redemption of Fund Shares.

In the event the Fund requires Deposit Instruments and a Cash Amount in consideration for purchasing a Creation Unit, the function of the Cash Amount is to compensate for any differences between the NAV per Creation Unit and the Deposit Amount (as defined below). The Cash Amount would be an amount equal to the difference between the NAV of the Shares (per Creation Unit) and the "Deposit Amount," which is an amount equal to the aggregate market value of the Deposit Instruments. If the Cash Amount is a positive number (the NAV per Creation Unit exceeds the Deposit Amount), the Authorized Participant will deliver the Cash Amount. If the Cash Amount is a negative number (the NAV per Creation Unit is less than the Deposit Amount), the Authorized Participant will receive the Cash Amount. Computation of the Cash

Amount excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Instruments, which shall be the sole responsibility of the Authorized Participant.

The Adviser, through the NSCC, makes available on each Business Day, immediately prior to the opening of business on the Exchange (currently 9:30 a.m. Eastern time), the list of the names and the required number of shares of each Deposit Instrument to be included in the current Portfolio Deposit (based on information at the end of the previous Business Day), as well as information regarding the Cash Amount for the Fund. Such Portfolio Deposit is applicable, subject to any adjustments as described below, in order to effect creations of Creation Units of the Fund until such time as the next-announced Portfolio Deposit composition is made available.

In addition, the Trust reserves the right to accept a basket of securities or cash that differs from Deposit Instruments or to permit the substitution of an amount of cash (i.e., a “cash in lieu” amount) to be added to the Cash Amount to replace any Deposit Instrument.

Procedures for Creation of Creation Units

To be eligible to place orders with the Distributor to create Creation Units of the Fund, an entity or person either must be (1) a “Participating Party,” i.e., a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC; or (2) a DTC Participant (see “Book Entry Only System”); which, in either case, must have executed an agreement with the Distributor (as it may be amended from time to time in accordance with its terms) (“Participant Agreement”) (discussed below). A Participating Party and DTC Participant are collectively referred to as an “Authorized Participant.” All Creation Units of the Fund, however created, will be entered on the records of DTC in the name of Cede & Co. for the account of a DTC Participant.

Except as described below, and in all cases subject to the terms of the applicable Participant Agreement, all orders to create Creation Units, whether through the NSCC Clearing Process or outside the NSCC Clearing Process through DTC or otherwise, must be received by the Distributor no later than the closing time of the regular trading session on the Exchange (“Closing Time”) (ordinarily 4:00 p.m. Eastern time or, for Custom Orders (discussed below), such earlier time set forth in the Participant Agreement or the Authorized Participant Procedures Handbook), in each case on the date such order is placed in order for creation of Creation Units to be effected based on the NAV of the Fund as determined on such date. A “Custom Order” may be placed by an Authorized Participant in the event that the Trust accepts (or delivers, in the case of a redemption) a basket or securities or cash that differs from the published Deposit Instruments or Redemption Instruments (discussed below). The Business Day on which a creation order (or order to redeem as discussed below) is placed is herein referred to as the “Transmittal Date.” Orders must be transmitted by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement or Authorized Participant Procedures Handbook. Severe economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach the Distributor, a Participating Party or a DTC Participant. Creation Units may be created in advance of the receipt by the Trust of all or a portion of the Portfolio Deposit. In such cases, the Authorized Participant will remain liable for the full deposit of the missing portion(s) of the Portfolio Deposit and will be required to post collateral with the Trust consisting of cash at least equal to a percentage of the marked-to-market value of such missing portion(s) that is specified in the Participant Agreement. The Trust may use such collateral to buy the missing portion(s) of the Portfolio Deposit at any time and will subject such Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such securities and the value of such collateral. The Trust will have no liability for any such shortfall. The Trust will return any unused portion of the collateral to the Authorized Participant once the entire Fund Deposit has been properly received and deposited into the Trust.

Orders to create Creation Units of the Fund shall be placed with a Participating Party or DTC Participant, as applicable, in the form required by such Participating Party or DTC Participant. Investors should be aware that their particular broker may not have executed a Participant Agreement, and that, therefore, orders to create Creation Units of the Fund may have to be placed by the investor’s broker through a Participating Party or a DTC Participant who has executed a Participant Agreement. At any given time there may be only a limited number of broker-dealers that have executed a Participant Agreement. Those placing orders to create Creation Units of the Fund through the NSCC Clearing Process should afford sufficient time to permit proper submission of the order to the Distributor prior to the Closing Time on the Transmittal Date.

Orders for creation that are effected outside the NSCC Clearing Process are likely to require transmittal by the DTC Participant earlier on the Transmittal Date than orders effected using the NSCC Clearing Process. Those persons placing orders outside the NSCC Clearing Process should ascertain the deadlines applicable to DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker or depository institution effectuating such transfer of Deposit Instruments and Cash Amount.

The Distributor has adopted guidelines regarding Authorized Participants' transactions in Creation Units that are made available to all Authorized Participants through the Participant Agreement. These guidelines set forth the processes and standards for Authorized Participants to transact with the Distributor in connection with creation and redemption transactions.

Placement of Creation Orders Using NSCC Clearing Process

Portfolio Deposits created through the NSCC Clearing Process, if available, must be delivered through a Participating Party that has executed a Participant Agreement.

The Participant Agreement authorizes Custodian to transmit to the NSCC on behalf of the Participating Party such trade instructions as are necessary to effect the Participating Party's creation order. Pursuant to such trade instructions to the NSCC, the Participating Party agrees to transfer the requisite Deposit Instruments (or contracts to purchase such Deposit Instruments that are expected to be delivered in a "regular way" manner by the second (2nd) Business Day ("T+2" basis)) and the Cash Amount to the Trust, together with such additional information as may be required by the Distributor. The Fund reserves the right to settle Creation Unit transactions on a basis other than T+2 if necessary or appropriate under the circumstances and compliant with applicable law. An order to create Creation Units of the Fund through the NSCC Clearing Process is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than the Closing Time on such Transmittal Date and (ii) all other procedures set forth in the Participant Agreement are properly followed.

Placement of Creation Orders Outside NSCC Clearing Process

Portfolio Deposits created outside the NSCC Clearing Process must be delivered through a DTC Participant that has executed a Participant Agreement. A DTC Participant who wishes to place an order creating Creation Units of the Fund to be effected outside the NSCC Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the NSCC Clearing Process and that the creation of Creation Units will instead be effected through a transfer of securities and cash. The Portfolio Deposit transfer must be ordered by the DTC Participant in a timely fashion so as to ensure the delivery of the requisite number of Deposit Instruments through DTC to the account of the Trust by no later than 11:00 a.m. Eastern time, of the next Business Day immediately following the Transmittal Date. All questions as to the number of Deposit Instruments to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust, whose determination shall be final and binding. The cash equal to the Cash Amount must be transferred directly to the Custodian through the Federal Reserve wire system in a timely manner so as to be received by the Custodian no later than 2:00 p.m. Eastern time, on the next Business Day immediately following the Transmittal Date. An order to create Creation Units of the Fund outside the NSCC Clearing Process is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than the Closing Time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed. However, if the Custodian does not receive both the requisite Deposit Instruments and the Cash Amount in a timely fashion on the next Business Day immediately following the Transmittal Date, such order may be cancelled. Upon written notice to the Distributor, such cancelled order may be resubmitted the following Business Day using the Portfolio Deposit as newly constituted to reflect the current NAV of the applicable Fund. The delivery of Creation Units so created will occur no later than the second (2nd) Business Day following the day on which the creation order is deemed received by the Distributor. The Fund reserves the right to settle Creation Unit transactions on a basis other T+2 if necessary or appropriate under the circumstances and compliant with applicable law.

Additional transaction fees may be imposed with respect to transactions effected outside the NSCC Clearing Process (through a DTC Participant) and in circumstances in which any cash can be used in lieu of Deposit Instruments to create Creation Units. (See "Creation Transaction Fee" section below.)

Acceptance of Creation Orders

The Trust and the Distributor reserve the right to reject or revoke acceptance of a creation order transmitted to it in respect of the Fund, for example, if (a) the order is not in proper form; (b) the purchaser or group of related purchasers, upon obtaining the Creation Units of Shares, would own 80% or more of the outstanding Shares of such Fund; (c) the acceptance of the Portfolio Deposit would, in the opinion of the Fund, be unlawful, as in the case of a purchaser who was banned from trading in securities; or (f) there exist circumstances outside the control of the Fund that make it impossible to process purchases of Creation Units of Shares for all practical purposes. Examples of such circumstances include: acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outage resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Funds, the Adviser, any sub-adviser, the Transfer Agent, the Custodian, the Distributor, DTC, NSCC or any other participant in the purchase process; and similar extraordinary events.

The Transfer Agent will notify a prospective creator of its rejection of the order of such person. The Trust, the Custodian, any subcustodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits to Authorized Participants nor shall either of them incur any liability to Authorized Participants for the failure to give any such notification. All questions as to the number of shares of each security in the Deposit Instruments and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

Creation Units of the Fund may be created in advance of receipt by the Trust of all or a portion of the applicable Deposit Instruments as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the Shares on the date the order is placed in proper form since, in addition to available Deposit Instruments, cash must be deposited in an amount equal to the sum of (i) the Cash Amount, plus (ii) at least 105%, which the Trust may change from time to time, of the market value of the undelivered Deposit Instruments (the "Additional Cash Deposit") with the Fund pending delivery of any missing Deposit Instruments.

If an Authorized Participant determines to post an Additional Cash Deposit as collateral for any undelivered Deposit Instruments, such Authorized Participant must deposit with the Custodian the appropriate amount of federal funds by 10:00 a.m. New York, (or such other time as specified by the Trust) on the date of requested settlement. If the Custodian does not receive the Additional Cash Deposit in the appropriate amount by such time, then the order may be deemed to be rejected and the Authorized Participant shall be liable to a fund for losses, if any, resulting therefrom. An additional amount of cash shall be required to be deposited with the Custodian, pending delivery of the missing Deposit Instruments to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to 105% as required, which the Trust may change from time to time, of the daily marked to market value of the missing Deposit Instruments. To the extent that missing Deposit Securities are not received by the specified time on the settlement date, or in the event a marked-to market payment is not made within one Business Day following notification by the Distributor that such a payment is required, the Trust may use the cash on deposit to purchase the missing Deposit Instruments. The Authorized Participant will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Instruments exceeds the market value of such Deposit Instruments on the transmittal date plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Instruments have been properly received by the Custodian or purchased by the Trust and deposited into the Trust. In addition, a transaction fee will be charged in all cases.

Creation Transaction Fee

A fixed creation transaction fee is imposed on each creation transaction regardless of the number of Creation Units purchased in the transaction. The amount of the fixed creation transaction fee is \$500.00. In addition, a variable charge for cash creations or for creations outside the NSCC Clearing Process currently of up to four times the fixed creation transaction fee will be imposed. The variable fee is subject to a maximum fee limit of 200 basis points.

In the case of cash creations or where the Trust permits a creator to substitute cash in lieu of depositing a portion of the Deposit Instruments, the creator may be assessed an additional variable charge to compensate a Fund for the costs associated with purchasing the applicable securities. (See "Portfolio Deposit" section above.) As a result, in order to seek to replicate the in-kind creation order process, the Trust expects to purchase, in the secondary market or otherwise gain exposure to, the portfolio securities that could have been delivered as a result of an in-kind creation order pursuant to local law or market convention, or for other reasons ("Market Purchases"). In such cases where the Trust makes Market Purchases, the Authorized Participant may be required to reimburse the Trust for, among other things, any difference between the market value at which the securities and/or financial instruments were purchased by the Trust and the cash in lieu amount (which amount, at the Adviser's discretion, may be capped), applicable registration fees, brokerage commissions and certain taxes. The Adviser may adjust the transaction fee to the extent the composition of the creation securities changes or cash in lieu is added to the Cash Amount to protect existing shareholders. Amounts in excess of any caps will be borne by a Fund. Creators of Creation Units are responsible for the costs of transferring the securities constituting the Deposit Instruments to the account of the Trust.

Redemption of Creation Units

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Distributor, only on a Business Day and only through a Participating Party or DTC Participant who has executed a Participant Agreement. The Trust will not redeem Shares in amounts less than Creation Units. Beneficial owners also may sell Shares in the secondary market, but must accumulate enough Shares to constitute a Creation Unit in order to have such Shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur

brokerage and other costs in connection with assembling a sufficient number of Shares to constitute a redeemable Creation Unit.

The Adviser, through the NSCC, makes available on each Business Day prior to the opening of business on the Exchange (currently 9:30 a.m. Eastern time), the identity of a Fund's securities and/or an amount of cash that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day. The securities the Fund delivers upon redemption ("Redemption Instruments") may not be identical to Deposit Instruments that are applicable to creations of Creation Units. An Authorized Participant submitting a redemption request is deemed to represent to the Trust that it (or its client) (i) owns outright or has full legal authority and legal beneficial right to tender for redemption the requisite number of Shares to be redeemed and can receive the entire proceeds of the redemption, and (ii) the Shares to be redeemed have not been loaned or pledged to another party nor are they the subject of a repurchase agreement, securities lending agreement or such other arrangement which would preclude the delivery of such Shares to the Trust. The Trust reserves the right to verify these representations at its discretion, but will typically require verification with respect to a redemption request from the Fund in connection with higher levels of redemption activity and/or short interest in the Fund. If the Authorized Participant, upon receipt of a verification request, does not provide sufficient verification of its representations as determined by the Trust, the redemption request will not be considered to have been received in proper form and may be rejected by the Trust. Unless cash redemptions are permitted or required for the Fund, the redemption proceeds for a Creation Unit generally consist of Redemption Instruments as announced on the Business Day of the request for redemption, plus cash in an amount equal to the difference between the NAV of the Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Redemption Instruments, less the redemption transaction fee and variable fees described below. Should the Redemption Instruments have a value greater than the NAV of the Shares being redeemed, a compensating cash payment to the Trust equal to the differential plus the applicable redemption transaction fee will be required to be arranged for by or on behalf of the redeeming shareholder.

The Distributor in coordination with the index receipt agent has established guidelines regarding Authorized

Participants' transactions in Creation Units that are made available to all Authorized Participants through the Participant Agreement and the index receipt agent's Authorized Representatives Documentation Package. These guidelines set forth the processes and standards for Authorized Participants to transact with the Distributor and the index receipt agent in connection with creation and redemption transactions.

The Trust may suspend the right of redemption or postpone the date of payment for Shares for more than seven days when:

- (a) trading on the Exchange is broadly restricted by the applicable rules and regulations of the SEC;
- (b) the Exchange is closed for other than customary weekend and holiday closing;
- (c) the SEC has by order permitted such suspension; or
- (d) the SEC has declared a market emergency.

Redemption Transaction Fee

The fixed redemption transaction fee is \$500.00 is the same no matter how many Creation Units are being redeemed pursuant to any one redemption request. An additional variable fee of up to four times the fixed redemption transaction fee will be charged with respect to cash redemptions or redemptions outside of the NSCC Clearing Process.

An additional variable charge for cash redemptions or partial cash redemptions (when cash redemptions are permitted or required for the Fund) may also be imposed to compensate each applicable Fund for the costs associated with selling the applicable securities. As a result, in order to seek to replicate the in-kind redemption order process, the Trust expects to sell, in the secondary market, the portfolio securities or settle any financial instruments that may not be permitted to be re-registered in the name of the Participating Party as a result of an in-kind redemption order pursuant to local law or market convention, or for other reasons ("Market Sales"). In such cases where the Trust makes Market Sales, the Authorized Participant may be required to reimburse the Trust for, among other things, any difference between the market value at which the securities and/or financial instruments were sold or settled by the Trust and the cash in lieu amount (which amount, at the Adviser's discretion, may be capped), applicable registration fees, brokerage commissions and certain taxes ("Transaction Costs"). The Adviser may adjust the transaction fee to the extent the composition of the redemption securities changes or cash in lieu is added to the Cash Amount to protect existing shareholders. In no event will transaction fees charged by the Fund in connection with a redemption exceed 2% of the amount being redeemed. Investors who use the services of a broker or other such intermediary may be charged a fee for such services. To the

extent the Fund cannot recoup the amount of Transaction Costs incurred in connection with a redemption from the redeeming shareholder because of the 2% cap or otherwise, those Transaction Costs will be borne by the Fund's remaining shareholders and negatively affect the Fund's performance.

Placement of Redemption Orders Using NSCC Clearing Process

Orders to redeem Creation Units of the Fund through the NSCC Clearing Process, if available, must be delivered through a Participating Party that has executed the Participant Agreement. An order to redeem Creation Units of the Fund using the Clearing Process is deemed received on the Transmittal Date if (i) such order is received by the Distributor not later than 4:00 p.m. Eastern time on such Transmittal Date (or, for Custom Orders, such earlier time set forth in the Participant Agreement or the Authorized Participant Procedures Handbook); and (ii) all other procedures set forth in the Participant Agreement are properly followed; such order will be effected based on the NAV of the Fund as next determined. An order to redeem Creation Units of the Fund using the NSCC Clearing Process made in proper form but received by the Fund after 4:00 p.m. Eastern time (or, for certain Custom Orders, such earlier time set forth in the Participant Agreement or the Authorized Participant Procedures Handbook), will be deemed received on the next Business Day immediately following the Transmittal Date. The requisite Redemption Instruments (or contracts to purchase such Redemption Instruments which are expected to be delivered in a "regular way" manner) and the applicable cash payment will be transferred by the second (2nd) Business Day following the date on which such request for redemption is deemed received. The Fund reserves the right to settle Creation Unit transactions on a basis other than T+2 if necessary or appropriate under the circumstances and compliant with applicable law.

Placement of Redemption Orders Outside NSCC Clearing Process

Orders to redeem Creation Units of the Fund outside the NSCC Clearing Process must be delivered through a DTC Participant that has executed the Participant Agreement. A DTC Participant who wishes to place an order for redemption of Creation Units of the Fund to be effected outside the NSCC Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that redemption of Creation Units of the Fund will instead be effected through transfer of Creation Units of the Fund directly through DTC. An order to redeem Creation Units of the Fund outside the Clearing Process is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than 4:00 p.m. Eastern time on such Transmittal Date (or, for certain Custom Orders, such earlier time disclosed in the Participant Agreement or the Authorized Participant Procedures Handbook); (ii) such order is preceded or accompanied by the requisite number of Shares of Creation Units specified in such order, which delivery must be made through DTC to the Custodian no later than 11:00 a.m. Eastern time, on such Transmittal Date (the "DTC Cut-Off-Time"); and (iii) all other procedures set forth in the Participant Agreement are properly followed.

After the Distributor has deemed an order for redemption outside the NSCC Clearing Process received, the Custodian will initiate procedures to transfer the requisite Redemption Instruments (or contracts to purchase such Redemption Instruments) which are expected to be delivered within two Business Days and the cash redemption payment to the redeeming Beneficial Owner by the second Business Day following the Transmittal Date on which such redemption order is deemed received by the Custodian. The Fund reserves the right to settle Creation Unit transactions on a basis other than T+2 if necessary or appropriate under the circumstances and compliant with applicable law. An additional variable redemption transaction fee of up to four times the basic transaction fee is applicable to redemptions outside the NSCC Clearing Process.

To the extent contemplated by the Participant Agreement, in the event the Authorized Participant has submitted a redemption request in proper form but is unable to transfer all or part of the Creation Unit to be redeemed to the Fund's Transfer Agent, the Transfer Agent will nonetheless accept the redemption request in reliance on the undertaking by the Authorized Participant to deliver the missing shares as soon as possible. Such undertaking shall be secured by the Authorized Participant's delivery and maintenance of collateral consisting of cash having a value (marked to market daily) of at least 105%, which the Trust may change from time to time, of the value of the missing shares.

The current procedures for collateralization of missing shares require, among other things, that any cash collateral shall be in the form of U.S. dollars in immediately available funds and shall be held by the Custodian and marked to market daily, and that the fees of the Custodian and any sub-custodians in respect of the delivery, maintenance and redelivery of the cash collateral shall be payable by the Authorized Participant. The Participant Agreement will permit the Trust, on behalf of the Fund, to purchase the missing shares or acquire the Deposit Instruments and the Cash Amount underlying such shares at any time and will subject the Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such shares, Deposit Instruments or Cash Amount and the value of the collateral.

Beneficial Ownership

The Depository Trust Company (“DTC”) acts as securities depository for the Shares. Shares of the Fund are represented by securities registered in the name of DTC or its nominee and deposited with, or on behalf of, DTC. Certificates will not be issued for Shares.

DTC, a limited-purpose trust company, was created to hold securities of its participants (the “DTC Participants”) and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the New York Stock Exchange (“NYSE”) and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the “Indirect Participants”).

Beneficial ownership of Shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in Shares (owners of such beneficial interests are referred to herein as “Beneficial Owners”) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of Shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depository Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the Shares holdings of each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding Shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all Shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants’ accounts with payments in amounts proportionate to their respective beneficial interests in Shares as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a “street name,” and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspects of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such Shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to the Shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such a replacement is unavailable, to issue and deliver printed certificates representing ownership of Shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

DETERMINATION OF NET ASSET VALUE

The NAV per share of the Fund is equal to the value of all the assets, minus the liabilities, divided by the number of outstanding shares. Except as described in the Fund’s prospectus, NAV of the Fund is calculated each business day as of the close of the New York Stock Exchange (“NYSE”) which is typically 4:00 p.m. ET. On occasion, the NYSE will close before 4:00 p.m. ET. When that happens, NAV will be calculated as of the time the NYSE closes. The Fund will not treat an intraday unscheduled disruption or closure in NYSE trading as a closure of the NYSE and will calculate NAV as of 4:00 p.m. ET if the particular disruption or closure directly affects only the NYSE. The following is a discussion of the procedures used by the Fund in valuing its assets.

Securities for which market quotations are readily available are generally valued at their current market value. Other securities and assets, including securities for which market quotations are not readily available; market quotations are determined not to be reliable; or, their value has been materially affected by events occurring after the close of trading on the exchange or market on which the security is principally traded (for example, a natural disaster affecting an entire country or region, or an event that affects an individual company) but before the Fund's NAV is calculated, may be valued at its fair value in accordance with policies and procedures utilized by the valuation designee. Fair value represents a good faith determination of the value of a security or other asset based upon specifically applied procedures. Fair valuation determinations may require subjective determinations. There can be no assurance that the fair value of an asset is the price at which the asset could have been sold during the period in which the particular fair value was used in determining the Fund's NAV.

Equity securities listed on a North American, Central American, South American or Caribbean securities exchange are generally valued at the last sale price on the exchange on which the security is principally traded. Other foreign equity securities are fair valued using quotations from an independent pricing service. The value of securities listed on the NASDAQ Stock Market, Inc. is generally the NASDAQ official closing price.

Fixed income securities with a remaining maturity of 61 days or more are valued using prices supplied by an approved independent third party or affiliated pricing services or broker/dealers. Generally, short-term securities which mature in 60 days or less are valued at amortized cost if their maturity at acquisition was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if their maturity when acquired by a Fund was more than 60 days.

Assets and liabilities initially expressed in foreign currencies are converted into U.S. dollars at the prevailing market rates from an approved independent pricing service as of 4:00 p.m. ET.

Shares of exchange-traded funds ("ETFs") are generally valued at the last sale price on the exchange on which the ETF is principally traded. Shares of open-end mutual funds are valued at their respective NAVs.

Fixed income securities are valued using market quotations supplied by approved independent third-party pricing services, affiliated pricing services or broker/dealers. In determining security prices, pricing services and broker/dealers may consider a variety of inputs and factors, including, but not limited to proprietary models that may take into account market transactions in securities with comparable characteristics, yield curves, option-adjusted spreads, credit spreads, estimated default rates, coupon rates, underlying collateral and estimated cash flows.

Options (e.g., on stock indices or equity securities) traded on U.S. equity securities exchanges are valued at the composite mean price, using the National Best Bid and Offer quotes at the close of options trading on such exchanges.

Exchange traded futures (e.g., on stock indices, debt securities or commodities) are valued at the settled price, or if no settled price is available, at the last sale price as of the close of the exchanges on which they trade.

Non-listed over-the-counter options and futures are valued utilizing market quotations provided by approved pricing service.

Swaps and structured notes are priced generally by an approved independent third party or affiliated pricing service or at an evaluated price provided by a counterparty or broker/dealer.

Certain fixed income securities and swaps may be valued using market quotations or valuations provided by pricing services affiliated with the Adviser. Valuations received by the Fund from affiliated pricing services are the same as those provided to other affiliated and unaffiliated entities by these affiliated pricing services.

DISTRIBUTIONS AND FEDERAL INCOME TAX MATTERS

The following discussion is a brief summary of some of the important federal (and, where noted, state) income tax consequences affecting the Fund and its shareholders. There may be other tax considerations applicable to particular shareholders. This section is based on the Code, the regulations thereunder, published rulings and court decisions, all as currently in effect. These laws are subject to change, possibly on a retroactive basis. The following tax discussion is very general; therefore, prospective investors are urged to consult their tax advisors about the impact an investment in the Fund may have on their own tax situations and the possible application of foreign, state and local law.

A shareholder's U.S. federal income tax consequences from acquiring, holding and disposing of shares in the Fund may vary depending upon the shareholder's particular situation.

This discussion only applies to shareholders who are U.S. persons, except where otherwise specifically indicated. For purposes of this discussion, U.S. persons are: (i) U.S. citizens or residents, (ii) U.S. corporations (i.e., entities classified as corporations for U.S. tax purposes that are organized under the laws of the United States or any state), (iii) an estate whose income is subject to U.S. federal income taxation regardless of its source, or (iv) a trust, if a court within the United States is able to exercise primary supervision over its administration and one or more U.S. persons have the authority to control all of its substantial decisions, or if the trust has a valid election in effect under applicable Treasury Regulations to be treated as a U.S. person.

For a discussion of the tax treatment of the ownership and disposition of Fund shares by foreign (i.e., non-U.S.) persons, see the discussion under “Foreign Shareholders,” below.

Except where otherwise noted, this discussion does not address issues of significance to U.S. persons in special situations such as: (i) certain types of tax-exempt entities, (ii) shareholders holding shares through tax-qualified accounts (such as 401(k) plan accounts or individual retirement accounts), (iii) shareholders holding investments through foreign institutions (financial and non-financial), (iv) financial institutions, (v) broker-dealers, (vi) entities not organized under the laws of the United States or a political subdivision thereof, (vii) shareholders holding shares as part of a hedge, straddle or conversion transaction, (viii) shareholders who are subject to the U.S. federal alternative minimum tax or the U.S. federal corporate minimum tax, and (ix) insurance companies.

If a pass-through entity (including for this purpose any entity treated as a partnership or S corporation for U.S. federal income tax purposes) is a beneficial owner of shares, the tax treatment of an owner in the pass-through entity will generally depend upon the status of the owner and the activities of the pass-through entity. Owners of pass-through entities that are considering the purchase of shares of the Fund should consult their tax advisers regarding the U.S. federal income tax consequences of the purchase, ownership and disposition of shares.

The Fund generally will be treated as a separate entity for federal income tax purposes. Net long-term and short-term capital gain, net income and operating expenses therefore will be determined for the Fund.

Special tax rules apply to investments held through defined contribution plans and other tax-qualified plans. Shareholders should consult their tax advisors to determine the suitability of shares of the Fund as an investment through such plans.

Qualification as a Regulated Investment Company

The Fund intends to elect to be treated and qualify each year as a regulated investment company under Subchapter M of the Code. In order to qualify for the special tax treatment accorded regulated investment companies and their shareholders, the Fund must, among other things:

- (a) derive at least 90% of its gross income for each taxable year from (i) dividends, interest, payments with respect to certain securities loans, and gain from the sale or other disposition of stock, securities, or foreign currencies, or other income (including, but not limited to, gain from options, swaps, futures, or forward contracts) derived with respect to its business of investing in such stock, securities, or currencies and (ii) net income derived from interests in “qualified publicly traded partnerships” (“QPTPs,” defined below);
- (b) diversify its holdings so that, at the end of each quarter of the Fund’s taxable year, (i) at least 50% of the market value of the Fund’s total assets is represented by cash and cash items, U.S. government securities, securities of other regulated investment companies, and other securities, limited in respect of any one issuer to an amount not greater than 5% of the value of the Fund’s total assets and not more than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund’s total assets is invested (x) in the securities (other than cash or cash items, or securities issued by the U.S. government or other regulated investment companies) of any one issuer or of two or more issuers that the Fund controls and that are engaged in the same, similar, or related trades or businesses, or (y) in the securities of one or more QPTPs. In the case of the Fund’s investments in loan participations, the Fund shall treat both the financial intermediary and the issuer of the underlying loan as an issuer for the purposes of meeting this diversification requirement; and
- (c) distribute with respect to each taxable year at least 90% of the sum of its investment company taxable income (as that term is defined in the Code, without regard to the deduction for dividends paid — generally, taxable ordinary income and any excess of net short-term capital gain over net long-term capital loss) and net tax-exempt interest income, for such taxable year.

In general, for purposes of the 90% gross income requirement described in paragraph (a) above, income derived from a partnership will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership which would be qualifying income if realized by the regulated investment company. However, 100% of the net

income derived from an interest in a “qualified publicly traded partnership” (a “QPTP”) (defined as a partnership where (x) interests in which are traded on an established securities markets or readily tradable on a secondary market as the substantial equivalents thereof, (y) that derives at least 90% of its income from passive income sources defined in Section 7704(d) of the Code, and (z) that derives less than 90% of its income from the qualifying income described in (a)(i) above) will be treated as qualifying income. Although income from a QPTP is qualifying income, as discussed above, investments in QPTPs cannot exceed 25% of the Fund’s assets. In addition, although in general the passive loss rules of the Code do not apply to regulated investment companies, such rules do apply to a regulated investment company with respect to items attributable to an interest in a QPTP.

Gains from foreign currencies (including foreign currency options, foreign currency swaps, foreign currency futures and foreign currency forward contracts) currently constitute qualifying income for purposes of the 90% test, described in paragraph (a) above. However, the Treasury Department has the authority to issue regulations (possibly with retroactive effect) excluding from the definition of “qualifying income” a fund’s foreign currency gains to the extent that such income is not directly related to the Fund’s principal business of investing in stock or securities.

For purposes of paragraph (b) above, the term “outstanding voting securities of such issuer” will include the equity securities of a QPTP. The Fund’s investment in MLPs may qualify as an investment in (1) a QPTP, (2) a “regular” partnership, (3) a “passive foreign investment company” (a “PFIC”) or (4) a corporation for U.S. federal income tax purposes. The treatment of particular MLPs for U.S. federal income tax purposes will affect the extent to which the Fund can invest in MLPs. The U.S. federal income tax consequences of the Fund’s investments in “PFICs” and “regular” partnerships are discussed in greater detail below.

If the Fund qualifies for a taxable year as a regulated investment company that is accorded special tax treatment, the Fund will not be subject to federal income tax on income distributed in a timely manner to its shareholders in the form of dividends (including Capital Gain Dividends, defined below). If the Fund were to fail to qualify as a regulated investment company accorded special tax treatment in any taxable year, the Fund would be subject to taxation on its taxable income at corporate rates, and all distributions from earnings and profits, including any distributions of net tax-exempt income and net long-term capital gain, would be taxable to shareholders as ordinary income. Some portions of such distributions may be eligible for the dividends-received deduction in the case of corporate shareholders and for treatment as qualified dividend income in the case of individual shareholders. In addition, the Fund could be required to recognize unrealized gain, pay substantial taxes and interest, and make substantial distributions before re-qualifying as a regulated investment company that is accorded special tax treatment.

The Fund intends to distribute at least annually to its shareholders all or substantially all of its investment company taxable income (computed without regard to the dividends-paid deduction) and may distribute its net capital gain (that is the excess of net long-term capital gain over net short-term capital loss). Investment company taxable income which is retained by the Fund will be subject to tax at regular corporate tax rates. The Fund might also retain for investment its net capital gain. If the Fund does retain such net capital gain, such gain will be subject to tax at regular corporate rates on the amount retained, but the Fund may designate the retained amount as undistributed capital gain in a notice to its shareholders who (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their respective shares of the undistributed amount, and (ii) will be entitled to credit their respective shares of the tax paid by the Fund on such undistributed amount against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal under current law to the difference between the amount of undistributed capital gain included in the shareholder’s gross income and the tax deemed paid by the shareholder under clause (ii) of the preceding sentence.

Generally, the excess (if any) of the Fund’s net short-term capital loss over the net long-term capital loss for a taxable year will carry over as a short-term capital loss arising on the first day of the next tax year. In addition, the excess (if any) of the Fund’s net long-term capital loss over the net short-term capital gain for the year will carry over as a long-term capital loss arising on the first day of the next tax year. Unused capital losses realized by the Fund may be carried forward indefinitely until they can be used to offset capital gains.

If future capital gains are offset by carried-forward capital losses, such future capital gains are not subject to Fund-level federal income tax, regardless of whether they are distributed to shareholders. However, distributions of amounts of capital gains offset by carried-forward capital losses are generally treated as return of capital distributions to shareholders. The Fund cannot carry back or carry forward any net operating losses.

The Fund may be limited under Code Section 382 in its ability offset its taxable income by capital loss carryforwards and net unrealized built-in losses after an “ownership change” of the Fund. The term “net unrealized built-in losses” refers to

the excess, if any, of the Fund's aggregate adjusted basis in its assets immediately before an ownership change, over the fair market value of such assets at such time, subject to a de minimis rule. The Fund would experience an ownership change under Code Section 382 if and when 5-percent shareholders of the Fund increase their ownership by more than 50 percentage points in the aggregate over their respective lowest percentage ownership of Fund shares in a 3-year period. Under Code Section 382, if the Fund experiences an ownership change, the Fund may use its pre-change tax capital loss carryforwards and net unrealized built-in losses in a year after the ownership change generally only up to the product of the fair market value of the Fund's equity immediately before the ownership change and a certain interest rate published monthly by Treasury known as the applicable long-term tax-exempt rate. The foregoing limitation on the use of pre-ownership change net unrealized built-in losses only applies for a period of five years after the ownership change, while the foregoing limitation on the use of pre-ownership change capital loss carryforwards lasts indefinitely.

In determining its net capital gain, including in connection with determining the amount available to support a Capital Gain Dividend, its taxable income and its earnings and profits, the Fund may elect to treat part or all of any post-October capital loss (defined as any net capital loss attributable to the portion of the taxable year after October 31, or if there is no net capital loss, any net long-term capital loss or any net short-term capital loss attributable to the portion of the taxable year after that date) or late-year ordinary loss (generally, (i) net ordinary loss from the sale, exchange or other taxable disposition of property, attributable to the portion of the taxable year after October 31, plus (ii) other net ordinary loss attributable to the portion of the taxable year after December 31) as if incurred in the succeeding taxable year.

Excise Tax on Regulated Investment Companies

If the Fund fails to distribute in a calendar year an amount at least equal to the sum of 98% of its ordinary income (taking into account certain deferrals and elections) for such year and 98.2% of its capital gain net income (adjusted for certain ordinary losses) for the one-year period ending October 31 (or later if the Fund is permitted to elect and so elects), plus any retained amount from the prior year, the Fund will be subject to a nondeductible 4% excise tax on the undistributed amounts. The Fund intend to make distributions sufficient to avoid imposition of the 4% excise tax, although the Fund reserves the right to pay an excise tax rather than make an additional distribution when circumstances warrant (e.g., the excise tax amount is deemed by the Fund to be de minimis). Certain derivative instruments give rise to ordinary income and loss. If the Fund has a taxable year that begins in one calendar year and ends in the next calendar year, the Fund will be required to make this excise tax distribution during its taxable year. There is a risk that the Fund could recognize income prior to making this excise tax distribution and could recognize losses after making this distribution. As a result, all or a portion of an excise tax distribution could constitute a return of capital (see discussion below).

Equalization Accounting

The Fund may use "equalization accounting" to determine the portion of its income and gains that has been distributed with respect to each taxable year. Under equalization accounting, the Fund would allocate a portion of its undistributed investment company taxable income and net capital gain to redemptions of Fund shares. This method would allow the Fund to reduce the amount of such income and gains that it distributes to non-redeeming shareholders but would not reduce the total return on a shareholder's investment. If the IRS determines that the Fund's equalization method is improper and that the Fund has under-distributed its income and gain for any taxable year, the Fund may be liable for federal income and/or excise tax. Equalization accounting is not available for the Fund if it is a personal holding company for federal income tax purposes.

Personal Holding Company

If the Fund is a "personal holding company" and fails to distribute (or to be treated as distributing) all of its investment company taxable income, the Fund may also be subject to a 20% nondeductible tax on its "undistributed personal holding company income." The Fund would generally be a personal holding company for a taxable year if five or fewer individuals own more than 50% of its outstanding shares at any time in the last half of the taxable year. The term "individual" for this purpose includes private foundations and certain trusts. The Fund do not expect to be subject to the tax on undistributed personal holding company income, although there can be no assurance that this will never occur.

Taxation of Fund Distributions

The Fund anticipate distributing substantially all of its net investment income for each taxable year. Distributions are taxable to shareholders even if they are paid from income or gain earned by the Fund before a shareholder's investment (and thus were included in the price the shareholder paid). Distributions are taxable whether shareholders receive them in cash or reinvest them in the Fund. Distributions of net capital gain from the sale of investments that the Fund owned for more than one year and that are properly reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gain despite how long a shareholder may have owned shares in the Fund. Distributions of capital gain generally are made after applying any available capital loss carryovers. The maximum individual rate applicable to long-term capital gains is 20%. A shareholder whose distributions are reinvested in shares will be treated as

having received a dividend equal to the amount of cash that the shareholder would have received if such shareholder had elected to receive the distribution in cash.

For U.S. federal income tax purposes, distributions of investment company taxable income are generally taxable as ordinary income to the extent of the Fund's current or accumulated "earnings and profits." If the Fund makes a distribution in excess of its current and accumulated "earnings and profits" in any taxable year, the excess distribution will be treated as a return of capital to the extent of a shareholder's tax basis in the shareholder's shares, and thereafter as capital gain. A return of capital is generally not taxable, but it reduces a shareholder's basis in the shareholder's shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the shareholder of such shares.

For federal income tax purposes, distributions of net investment income generally are taxable as ordinary income. Taxes on distributions of capital gain are determined by how long the Fund owned the investment. A distribution of gain from the sale of investments that the Fund owned for one year or less will be taxable as ordinary income.

The Fund may designate certain dividends as derived from "qualified dividend income," which, when received by an individual or other non-corporate shareholder, will be taxed at a maximum tax rate applicable to long-term capital gain. Dividend income distributed to individual or other non-corporate shareholders will qualify as "qualified dividend income" as that term is defined in Section 1(h)(11)(B) of the Code to the extent such distributions are attributable to income from the Fund's investments in common and preferred stock of U.S. companies and stock of certain qualified foreign corporations provided that certain holding period and other requirements are met by both the Fund (with respect to the dividend paying corporation's stock) and its shareholders (with respect to the Fund's shares). Distributions are taxable to shareholders even if they are paid from income or gains earned by the Fund before a shareholder invested in the Fund (and thus were included in the price the shareholder paid). A dividend will not be treated as qualified dividend income (at either the Fund or shareholder level) (i) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 121-day period beginning on the date which is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during the 181-day period beginning 90 days before such date), (ii) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property, (iii) if the recipient elects to have the dividend income treated as investment interest for purposes of the limitation on deductibility of investment interest, or (iv) if the dividend is received from a foreign corporation that is (a) not eligible for the benefits of a comprehensive income tax treaty with the U.S. (with the exception of dividends paid on stock of such a foreign corporation readily tradable on an established securities market in the U.S.) or (b) treated as a PFIC in the year in which the dividend is paid or in the preceding taxable year. The amount of the Fund's distributions that would otherwise qualify for this favorable tax treatment may be reduced as a result of the Fund's securities lending activities or high portfolio turnover rate.

In general, distributions of investment income reported by the Fund as derived from qualified dividend income will be treated as qualified dividend income by a non-corporate taxable shareholder so long as the shareholder meets the holding period and other requirements described above with respect to the Fund's shares. In any event, if the qualified dividend income received by the Fund during any taxable year is equal to or greater than 95% of its "gross income," then 100% of the Fund's dividends (other than dividends that are properly reported as Capital Gain Dividends) will be eligible to be treated as qualified dividend income. For this purpose, the only gain included in the term "gross income" is the excess of net short-term capital gain over net long-term capital loss.

Any loss realized upon a taxable disposition of shares held for six months or less will be treated as long-term capital loss to the extent of any Capital Gain Dividends received by the shareholder with respect to those shares. All or a portion of any loss realized upon a taxable disposition of Fund shares will be disallowed if other shares of such Fund are purchased within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

A distribution paid to shareholders by the Fund in January of a year generally is deemed to have been received by shareholders on December 31 of the preceding year, if the distribution was declared and payable to shareholders of record on a date in October, November, or December of that preceding year. The Fund will provide federal tax information annually, including information about dividends and distributions paid during the preceding year to taxable investors and others requesting such information.

If the Fund makes a distribution to its shareholders in excess of its current and accumulated "earnings and profits" in any taxable year, the excess distribution will be treated as a return of capital to the extent of each shareholder's basis (for tax purposes) in its shares, and any distribution in excess of basis will be treated as capital gain. A return of capital is not taxable, but it reduces the shareholder's basis in its shares, which reduces the loss (or increases the gain) on a subsequent taxable disposition by such shareholder of the shares.

Dividends received by corporate shareholders that are reported by the Fund in a written statement furnished to shareholders may qualify for 50% dividends received deduction with respect to the amount of qualifying dividends received by the Fund from domestic corporations and with respect to that portion (if any) of interest paid or accrued on certain high yield discount obligations owned by the Fund are treated as dividends. For a shareholder to receive this deduction, certain holding period requirements apply. In particular, the Fund's corporate shareholders must hold their Fund shares (and must not have certain protections against risk of loss) at least 46 days for the 91-day period beginning on the date 45 days before the date on which the Fund's shares becomes ex-dividend. Additionally, the Fund must meet similar holding period requirements with respect to shares of the domestic corporation issuing dividends. The dividends-received deduction is also reduced for dividends on certain debt-financed portfolio stock.

Section 163(j) of the Code generally limits the deductibility of business interest to the sum of the taxpayer's business interest income and 30% of its adjusted taxable income. Certain small businesses are exempt from such limitations. If the Fund, as a regulated investment company, earns business interest income, the Fund would be permitted to pay Code Section 163(j) interest dividends to its shareholders. A shareholder that receives a section 163(j) interest dividend generally may treat the dividend as interest income for purposes of Code Section 163(j) if certain holding period requirements are met. Generally, the shareholder must have held the fund shares for more than 180 days during the 361-day window beginning 180 days before the ex-dividend date, and the shareholder must not be obligated (under a short sale or otherwise) to make related payments with respect to substantially similar or related property.

Surtax on Net Investment Income

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund shares, but excluding any exempt interest dividends from the Fund) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

Sale of Exchange-Listed Shares or Redemption of Creation Shares Units

The sale of exchange-listed shares of the Fund, or the redemption of shares constituting Creation Units by a Authorized Participant, may give rise to a taxable gain or loss to the selling or redeeming shareholder equal to the difference between the amount received for the shares and the shareholder's adjusted tax basis in the shares sold or redeemed. In general, any gain or loss arising from (or treated as arising from) the sale or redemption of shares of the Fund will be considered capital gain or loss and will be long-term capital gain or loss if the shares were held for more than one year. However, any capital loss arising from the sale or redemption of shares held for six months or less will be treated as a long-term capital loss to the extent of the amount of capital gain dividends received on (or undistributed capital gains credited with respect to) such shares. Additionally, any loss realized upon the sale or exchange of Fund shares with a tax holding period of six months or less may be disallowed to the extent of any distributions treated as exempt interest dividends with respect to such shares. The maximum individual rate applicable to long-term capital gains is either 20%. Capital gain of a corporate shareholder is taxed at the same rate as ordinary income.

Taxation of Certain Fund Investments

The following discussion relates to the particular U.S. federal income tax consequences of the investment policies of the Fund.

Derivatives

Generally, derivatives are financial contracts whose value depends on, or is derived from, the value of an underlying asset, reference rate or index and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities, related indexes and other assets. The types of derivatives in which the Fund may invest include, but are not limited to, interest rate, currency or stock or bond index futures contracts, currency forward contracts and currency swaps, the purchase and sale (or writing) of exchange listed and over-the-counter ("OTC") put and call options on debt and equity securities, currencies, interest rate, currency or stock index futures and fixed-income and stock indices and other financial instruments, entering into various interest rate transactions such as swaps, caps floors, and collars, entering into equity swaps, caps and floors, the purchase and sale of indexed debt securities or trading in other similar types of instruments.

Certain investments of the Fund in derivatives, including transactions in options, swaptions, futures contracts, forward contracts, straddles, swaps, short sales, foreign currencies, inflation-linked securities and foreign securities, including for hedging purposes, will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules). In a given case, these rules may accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gain into short-term capital gain,

convert short-term capital losses into long-term capital loss, or otherwise affect the character of the Fund's income. These rules could therefore affect the amount, timing and character of distributions to shareholders and cause differences between the Fund's book income and its taxable income. If the Fund's book income exceeds its taxable income, the distribution (if any) of such excess generally will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax- exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in its shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Fund's book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company that is accorded special tax treatment. Income earned as a result of these transactions would, in general, not be eligible for the dividends-received deduction or for treatment as exempt-interest dividends when distributed to shareholders. The Fund will endeavor to make any available elections pertaining to such transactions in a manner believed to be in the best interest of the Fund and its shareholders.

Securities Loans

The Fund's participation in loans of securities may affect the amount, timing, and character of distributions to shareholders. With respect to any security subject to a securities loan, any (i) amounts received by the Fund in place of dividends earned on the security during the period that such security was not directly held by the Fund will not give rise to qualified dividend income and (ii) withholding taxes accrued on dividends during the period that such security was not directly held by the Fund will not qualify as a foreign tax paid by the Fund and therefore cannot be passed through to shareholders even if the Fund meets the requirements described in "Foreign Taxes," below.

Debt Instruments Issued or Acquired at a Discount

The Fund may acquire debt obligations that have original issue discount. "Original issue discount" is the excess of a debt obligation's stated redemption price at maturity over the obligation's issue price. Generally, the amount of the original issue discount is treated as interest income and is included in taxable income (and required to be distributed) over the term of the debt security even though payment of that amount is not received until a later time (if ever), usually when the debt security matures. In addition, payment-in-kind securities will give rise to income that is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year. Because the Fund distributes substantially all of its net investment income to its shareholders (including such imputed interest), the Fund may have to sell portfolio securities in order to generate the cash necessary for the required distributions. Such sales may occur at a time when the Adviser would not otherwise have chosen to sell such securities and may result in a taxable gain or loss. The Fund may invest in inflation-linked debt securities. Any increase in the principal amount of an inflation-linked debt security will be original issue discount, which is taxable as ordinary income and is required to be distributed, even though the Fund will not receive the principal, including any increase thereto, until maturity. The Fund may be required to liquidate other investments, including at times when it is not advantageous to do so, in order to satisfy its distribution requirements and to eliminate any possible taxation at the Fund level.

Certain debt securities that may be acquired by the Fund in the secondary market may be treated as having market discount. "Market discount" is generally the excess of the stated redemption price of the bond at maturity over the basis of the bond immediately after its acquisition by the taxpayer. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. The Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Distressed Debt

The Fund may invest to a significant extent in debt obligations that are in the lowest rated categories (or are unrated), including debt obligations of issuers that are not currently paying interest or that are in default. Investments in debt obligations that are at risk of being in default (or are presently in default) present special tax issues for the Fund. Tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities and how payments received on obligations in default should be allocated between principal and income. These and other related issues will be addressed by the Fund when, as and if it invests in such securities, in order to seek to ensure that it distributes sufficient income to preserve its status as a regulated investment company and does not become subject to U.S. federal income taxation or any excise tax.

Foreign Currency

Any investment that the Fund may make in foreign currencies, foreign currency denominated debt securities and certain options, futures or forward foreign currency contracts (and similar instruments) will be subject to special tax rules. Generally, transactions in foreign currencies give rise to ordinary income or loss. An election under Section 988(a)(1)(B) may be available to treat foreign currency gain or loss attributable to certain forward, futures and option contracts as capital, including certain “foreign currency contracts.” A “foreign currency contract” is a contract that (1) requires delivery of, or settlement of, a foreign currency that is a currency in which positions are also traded through regulated futures contracts, (2) is traded in the interbank market, and (3) is entered into at an arm’s-length price determined by reference to the price in the interbank market. If this Section 988(a)(1)(B) election is made, foreign currency contracts are treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss under the Section 1256 mark-to-market rules. All other forward contracts under this 988(a)(1)(B) election would be characterized as capital and generally gain or loss would be recognized when the contract is closed and completed. Other rules apply to options, futures or forward foreign currency contracts that may be part of a straddle or a Section 988 hedging transaction within the meaning of Code Section 988(d).

Partnerships

Special tax considerations apply if the Fund invests in investment companies that are taxable as partnerships for federal income tax purposes. In general, the Fund will not recognize income earned by such an investment company until the close of the investment company’s taxable year. But the Fund will recognize such income as it is earned by the investment company for purposes of determining whether it is subject to the 4% excise tax. Therefore, if the Fund and such an investment company have different taxable years, the Fund may be compelled to make distributions in excess of the income recognized from such an investment company in order to avoid the imposition of the 4% excise tax. The Fund’s receipt of a non-liquidating cash distribution from an investment company taxable as a partnership generally will result in recognized gain (but not loss) only to the extent that the amount of the distribution exceeds the Fund’s adjusted basis in shares of such investment company before the distribution. If the Fund receives a liquidating cash distribution from an investment company taxable as a partnership, it will recognize capital gain or loss to the extent of the difference between the proceeds received by the Fund and the Fund’s adjusted tax basis in shares of such investment company; however, the Fund will recognize ordinary income, rather than capital gain, to the extent that the Fund’s allocable share of “unrealized receivables” (including any accrued but untaxed market discount) exceeds the shareholder’s share of the basis in those unrealized receivables.

Some amounts received by the Fund with respect to its investments in MLPs will likely be treated as a return of capital because of accelerated deductions available with respect to the activities of such MLPs. On the disposition of an investment in such an MLP, the Fund will likely realize taxable income in excess of economic gain with respect to that asset (or, if the Fund does not dispose of the MLP, the Fund likely will realize taxable income in excess of cash flow with respect to the MLP in a later period), and the Fund must take such income into account in determining whether the Fund has satisfied its distribution requirements. The Fund may have to borrow or liquidate securities to satisfy its distribution requirements and to meet its redemption requests, even though investment considerations might otherwise make it undesirable for the Fund to sell securities or borrow money at such time.

Real Estate Investment Trusts

The Fund’s investments in REIT equity securities, if any, may result in the Fund’s receipt of cash in excess of the REIT’s earnings. If the Fund receives such distributions all or a portion of these distributions will constitute a return of capital to the Fund. Receiving a return of capital distribution from a REIT will reduce the amount of income available to be distributed to Fund shareholders. Income from REIT securities generally will not be eligible for treatment as qualified dividend income.

Under Code Section 199A, a deduction of up to 20% is available for taxpayers other than corporations for qualified business income received in taxable years beginning before January 1, 2026, from certain pass-through businesses, including “qualified REIT dividends” from REITs (i.e., ordinary REIT dividends, other than capital gains dividends, and REIT dividends designated as qualified dividend income). A regulated investment company may pay and report “section 199A dividends” to its shareholders with respect to the regulated investment company’s qualified REIT dividends. The amount of section 199A dividends that the Fund may pay and report to its shareholders is limited to the excess of the “qualified REIT dividends” that the Fund receives from REITs for a taxable year over the Fund’s expenses allocable to such dividends.

A shareholder may treat section 199A dividends received on a share of the Fund as “qualified REIT dividends” if the shareholder has held the share for more than 45 days during the 91-day period beginning 45 days before the date on which the share becomes ex-dividend, but only to the extent that the shareholder is not under an obligation (under a short-sale or otherwise) to make related payments with respect to positions in substantially similar or related property. A

shareholder may include 20% of the shareholder's "qualified REIT dividends" in the computation of the shareholder's "combined qualified business income amount" under Code Section 199A. Code Section 199A allows a taxpayer (other than a corporation) a deduction for a taxable year equal to the lesser of (A) the taxpayer's "combined qualified business income amount" or (B) 20% of the excess of the taxpayer's taxable income over the taxpayer's net capital gain for the year.

Passive Foreign Investment Companies

If the Fund invests in PFICs, certain special tax consequences may apply. A PFIC is any foreign corporation in which (i) 75% or more of the gross income for the taxable year is passive income, or (ii) the average percentage of the assets (generally by value, but by adjusted tax basis in certain cases) that produce or are held for the production of passive income is at least 50%. Generally, passive income for this purpose includes dividends, interest, royalties and rents, but does not include certain rents and royalties received from active businesses. Passive income for this purpose does not include rents and royalties received by the foreign corporation from active business and certain income received from related persons. The Fund's investments in certain PFICs could subject the Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company. This tax cannot be eliminated by making distributions to Fund shareholders. In addition, certain interest charges may be imposed on the Fund as a result of such distributions.

If the Fund is in a position to treat a PFIC as a "qualified electing fund" ("QEF"), the Fund will be required to include in its gross income its share of the company's income and net capital gain annually, regardless of whether it receives any distributions from the company. Alternately, the Fund may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gain and loss are treated as ordinary income and loss. The QEF and mark-to-market elections may have the effect of accelerating the recognition of income (without the receipt of cash) and increasing the amount required to be distributed by the Fund to avoid taxation. Making either of these elections, therefore, may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return. The Fund that invests indirectly in PFICs by virtue of the Fund's investment in other investment companies that qualify as "U.S. persons" within the meaning of the Code may not make a QEF election; rather, such underlying investment companies investing directly in the PFICs would decide whether to make such election. Furthermore, the Fund's income inclusion with respect to a PFIC with respect to which the Fund has made a qualified electing fund, or "QEF," election, as qualifying income for purposes of determining the Fund's eligibility to be subject to tax as a regulated investment company if either if (A) there is a current distribution out of the earnings and profits of the PFIC that are attributable to such income inclusion or (B) such inclusion is derived with respect to the Fund's business of investing in stock, securities, or currencies. Dividends paid by PFICs will not be eligible to be treated as "qualified dividend income."

Investment in the Subsidiary

The Fund has a wholly-owned subsidiary organized under the laws of the Cayman Islands, which is classified as a corporation for U.S. federal income tax purposes (the "Subsidiary"). The Fund will invest a portion of its assets in the Subsidiary. A foreign corporation, such as the Subsidiary, will generally not be subject to U.S. federal income taxation unless it is deemed to be engaged in a U.S. trade or business. It is expected that the Subsidiary will conduct its activities in a manner so as to meet the requirements of a safe harbor provided under Section 864(b)(2) of the Code under which the Subsidiary may engage in trading in stocks or securities or certain commodities without being deemed to be engaged in a U.S. trade or business. However, if certain of the Subsidiary's activities were determined not to be of the type described in the safe harbor, then the activities of the Subsidiary may constitute a U.S. trade or business, and subject to U.S. taxation as such.

In general, a foreign corporation, such as the Subsidiary, that does not conduct a U.S. trade or business is subject to tax at a flat rate of 30 percent (or lower tax treaty rate), generally payable through withholding, on the gross amount of certain U.S.-source income that is not effectively connected with a U.S. trade or business. There is presently no tax treaty in force between the U.S. and the Cayman Islands that would reduce this rate of withholding tax. It is not expected that the Subsidiary will derive meaningful income subject to such withholding tax.

The Subsidiary will be treated as a controlled foreign corporation ("CFC") and the Fund investing in the Subsidiary will be treated as a "U.S. shareholder" of that Subsidiary. As a result, the Fund will be required to include in gross income for U.S. federal income tax purposes all of the Subsidiary's "subpart F income," whether or not such income is distributed by the Subsidiary. It is expected that all of the Subsidiary's income will be "subpart F income." The Fund's recognition of the Subsidiary's "subpart F income" will increase the Fund's tax basis in the Subsidiary. Distributions by the Subsidiary to the Fund will be tax-free, to the extent of its previously undistributed "subpart F income," and will correspondingly reduce the

Fund's tax basis in the Subsidiary. "Subpart F income" is generally treated as ordinary income, regardless of the character of the Subsidiary's underlying income. If a net loss is realized by the Subsidiary, such loss is not generally available to offset the income earned by the Fund and such loss cannot be carried forward to offset taxable income of the Fund or the Subsidiary in future periods. Under Treasury Regulations, the Fund's income inclusion with respect to a CFC should be qualifying income for purposes of qualifying as a regulated investment company (1) if the Subsidiary distributes such income to the Fund in the year in which it is earned or (2) such inclusion is derived with respect to the Fund's business of investing in stock, securities, or currencies.

The ability of the Fund to invest directly in commodities, and in certain commodity-related securities and other instruments, is subject to significant limitations in order to enable the Fund to maintain its status as a regulated investment company under the Code.

Investments in Other Controlled Foreign Corporations

The Fund may also invest in other CFCs in addition to the Subsidiary. A CFC is a foreign corporation in which more than 50% of the stock, by vote or value, is owned by U.S. persons each of whom own, directly or constructively, 10% or more of the stock of a foreign corporation by vote or by value ("U.S. shareholders"). If the Fund is a U.S. shareholder with respect to a CFC, the Fund is generally must annually include in income its allocable share of the CFC's (i) "subpart F income" and (ii) global intangible low-tax income ("GILTI"), both as defined by the Code, regardless of whether or not the CFC distributes such amounts to the Fund. Amounts included in gross income by the Fund as subpart F income of a CFC are qualifying income for a RIC under Code Section 851(b) if either (i) such amounts are distributed to the Fund in the taxable year in which they are earned by the CFC, or (ii) such income is derived with respect to the Fund's business of investing in stock, securities or currencies. Treasury Regulations provide that GILTI inclusions are treated in the same manner for purposes of Code Section 851(b) as subpart F inclusions.

Investment in Other Funds

If the Fund invests in shares of mutual funds, other ETFs or other companies that are taxable as regulated investment companies, as well as certain investments in REITs (collectively, "underlying funds"), its distributable income and gains will normally consist, in part, of distributions from the underlying funds and gains and losses on the disposition of shares of the underlying funds. To the extent that an underlying fund realizes net losses on its investments for a given taxable year, the Fund will not be able to recognize its share of those losses (so as to offset distributions of net income or capital gains from other underlying funds) until it disposes of shares of the underlying fund. Moreover, even when the Fund does make such a disposition, a portion of its loss may be recognized as a long-term capital loss, which will not be treated as favorably for federal income tax purposes as a short-term capital loss or an ordinary deduction. In particular, the Fund will not be able to offset any capital losses from its dispositions of underlying fund shares against its ordinary income (including distributions of any net short-term capital gain realized by an underlying fund).

In addition, in certain circumstances, the "wash sale" rules under Section 1091 of the Code may apply to the Fund's sales of underlying fund shares that have generated losses. A wash sale occurs if shares of an underlying fund are sold by the Fund at a loss and the Fund acquires substantially identical shares of that same underlying fund 30 days before or after the date of the sale. The wash-sale rules could defer losses in the Fund's hands on sales of underlying fund shares (to the extent such sales are wash sales) for extended (and, in certain cases, potentially indefinite) periods of time.

As a result of the foregoing rules, and certain other special rules, the amount of net investment income and net capital gain that the Fund will be required to distribute to shareholders may be greater than what such amounts would have been had the Fund directly invested in the securities held by the underlying funds, rather than investing in shares of the underlying funds. For similar reasons, the character of distributions from the Fund (e.g., long-term capital gain, exempt interest, eligibility for dividends-received deduction, etc.) will not necessarily be the same as it would have been had the Fund invested directly in the securities held by the underlying funds.

If the Fund received dividends from an underlying fund that qualifies as a regulated investment company, and the underlying fund reports such dividends as "qualified dividend income," then the Fund is permitted in turn to designate a portion of its distributions as "qualified dividend income," provided the Fund meets holding period and other requirements with respect to shares of the underlying fund.

Depending on the Fund's percentage ownership in an underlying fund, both before and after a redemption, a redemption of shares of an underlying fund by the Fund may cause the Fund to be treated as distribution taxable as a dividend under the Code, to the extent of its allocable shares of earnings and profits, on the full amount of the distribution instead of receiving capital gain income on the shares of the underlying fund. Such a distribution may be treated as qualified dividend income and thus eligible to be taxed at the rates applicable to long-term capital gain. If qualified dividend income

treatment is not available, the distribution may be taxed as ordinary income. This could cause shareholders of the Fund to recognize higher amounts of ordinary income than if the shareholders had held the shares of the underlying funds directly.

The Fund may elect to pass through to shareholders foreign tax credits from an underlying fund and exempt-interest dividends from an underlying fund, provided that at least 50% of the Fund's total assets are invested in other regulated investment companies at the end of each quarter of the taxable year.

Cost Basis Reporting

The Fund (or its administrative agent) must report to the IRS and furnish to fund shareholders the cost basis information for fund shares purchased on or after January 1, 2012, when redeemed, exchanged or otherwise sold and whether the shares had a short-term or long-term holding period. In addition, the Fund are required to report the gross proceeds from the sale of all Fund shares (regardless of when such shares were purchased).

Shareholders may elect from among several IRS-accepted cost basis methods to calculate the cost basis of their covered shares. In the absence of such an election, the Fund will use its default cost basis method. The cost basis method elected or applied may not be changed after the settlement date of a sale of Fund shares. Fund shareholders should consult with their tax advisers concerning the most desirable IRS-accepted cost basis method for their tax situation.

Backup Withholding

The Fund generally is required to backup withhold and remit to the U.S. Treasury a percentage of the taxable dividends and or gross proceeds paid to, and the proceeds of share sales, exchanges, or redemptions made by, any individual shareholder who (i) fails to properly furnish the Fund with a correct taxpayer identification number ("TIN"), (ii) has been identified by the IRS as otherwise subject to backup withholding, or (iii) fails to certify to the Fund that the shareholders is a U.S. person that is not subject to such withholding. The backup withholding rules may also apply to distributions that are properly reported as exempt-interest dividends. The backup withholding tax rate is 24% for tax years beginning before January 1, 2026. If a shareholder fails to furnish a valid TIN upon request, the shareholder can be subject to IRS penalties.

Foreign Shareholders

For purposes of this discussion, "foreign shareholders" are shareholders that are foreign persons, including: (i) individuals classified as nonresident aliens for U.S. tax purposes, (ii) foreign trusts (i.e., trusts other than a trust with respect to which a U.S. court is able to exercise primary supervision over administration of that trust and one or more U.S. persons have authority to control substantial decisions of that trust), (iii) foreign estates (i.e., an estate the income of which is not subject to U.S. tax on its foreign-source income), and (iv) foreign corporations (i.e., entities classified as corporations for U.S. tax purposes other than an entity organized under the laws of the United States or any state). If a pass-through entity (including for this purpose any entity treated as a partnership or S corporation for U.S. federal income tax purposes) is a beneficial owner of shares, the tax treatment of an owner of the pass-through entity will generally depend upon the status of the owner and the activities of the pass-through entity. Owners of pass-through entities that are considering the purchase of shares of a Fund should consult their tax advisers regarding the U.S. federal income tax consequences of the purchase, ownership and disposition of shares.

This discussion does not address tax consequence of special concern to Foreign Shareholders subject to special U.S. tax rules, including:

- former U.S. citizens and residents and expatriated or inverted entities;
- a non-resident alien individual present in the United States for 183 days or more in a taxable year.
- a controlled foreign corporation, passive foreign investment company, or foreign government; or
- a Foreign Shareholder whose income from the Fund is effectively connected with a U.S. trade or business of the Foreign Shareholder or, if a U.S. income tax treaty applies, is attributable to a U.S. permanent establishment of the Foreign Shareholder as determined under such treaty.

U.S. Withholding Requirements on Distributions to Foreign Shareholders Generally

Subject to the exceptions described below, distributions made to foreign shareholders of the Fund will be subject to non-refundable federal income tax withholding at a 30% rate (or such lower rate provided under an applicable income tax treaty) even if they are funded by income or gains (such as portfolio interest, short-term capital gains, or foreign-source dividend and interest income) that, if paid to a foreign person directly, would not be subject to withholding. Such withholding is something referred to as "Chapter 3 Withholding." If any distribution made by the Fund is "effectively connected" with a U.S. trade or business (or, if an applicable income tax treaty so requires, is attributable to a permanent establishment) of the recipient foreign shareholder, federal income tax withholding generally applicable to foreign

shareholders will not apply provided that the shareholder provides the Fund with proper document (generally on a Form W-8ECI) certifying its eligibility for such treatment, and the distribution will be subject to the tax, withholding, and reporting requirements generally applicable to U.S. shareholders, and an additional branch profits tax may apply if the foreign shareholder is a foreign corporation.

Short-Term Capital Gain Dividends

If a foreign shareholder of the Fund timely furnishes valid tax documentation on the appropriate Form W-8 certifying its non-U.S. status, short-term capital gain dividends properly reported by the Fund to shareholders as paid from its net short-term capital gains in excess of the Fund's net long-term capital losses, other than short-term capital gains realized on disposition of U.S. real property interests (see the discussion below under "Redemptions and Capital Gain Dividends"), will not be subject to U.S. withholding tax unless the shareholder is a nonresident alien individual present in the United States for periods aggregating 183 days or more during the taxable year of the dividend and certain other conditions apply.

Interest-Related Dividends

If a foreign shareholder of the Fund timely furnishes valid tax documentation on the appropriate Form W-8 certifying its non-U.S. status, dividends properly reported by the Fund to shareholders as interest-related dividends and paid from its net "qualified interest income" generally will not be subject to U.S. withholding tax. "Qualified interest income" includes, in general, the sum of the Fund's U.S. source: (i) bank deposit interest, (ii) short-term original issue discount (payable 183 days or less from the date of its original issuance), (iii) interest on obligations in registered form that qualifies as "portfolio interest," and (iv) any interest-related dividend passed through from another regulated investment company, in each case in excess of expenses allocable to the interest income. However, with respect to clauses (iii) and (iv), the Fund's interest-related dividends paid to a foreign shareholder are subject to U.S. taxation to the extent attributable to interest received by the Fund on indebtedness issued by (a) the foreign shareholder, (b) any corporation or partnership of which the foreign shareholder is a 10 percent owner, or (c) a person related to the foreign shareholder if the foreign shareholder is a CFC. In addition, dividends do not qualify as interest-related dividends if paid to foreign shareholders in countries for certain periods during which the Secretary of the Treasury determines that there is inadequate information exchange between such country and the United States to prevent the evasion of U.S. income tax by a U.S. person.

Shares Held Through an Intermediary

Where shares of the Fund are held through an intermediary, even if the Fund reports a distribution in a manner described above, no assurance can be made that the intermediary will respect such a designation. Foreign shareholders should contact their intermediaries regarding the application of these rules to their accounts. In addition, the foregoing exemptions from U.S. withholding tax do not apply to withholding required under the Foreign Account Tax Compliance Act ("FATCA"), described under the discussion below under "**Foreign Accounts**".

Redemptions and Capital Gain Dividends

In general, a foreign shareholder's capital gains realized on the redemption or other disposition of shares of the Fund or from capital gain dividends are not subject to federal income or withholding tax, provided that the Fund obtains a properly completed and signed certificate of foreign status (generally on an applicable IRS Form W-8), unless: (i) such gains or distributions are effectively connected with a U.S. trade or business (or, if an applicable income tax treaty so requires, are attributable to a permanent establishment) of the foreign shareholder, (ii) in the case of an individual foreign shareholder, the shareholder is present in the United States for a period or periods aggregating 183 days or more during the year of the disposition of Fund shares or the receipt of capital gain dividends and certain other conditions are met, or (iii) the Fund is a "qualified investment entity." A regulated investment company is a "qualified investment entity" if it either is a "U.S. real property holding corporation" (a "USRPHC") or would be a USRPHC but for the application of certain exceptions to the definition thereof. A USRPHC is a domestic corporation that holds U.S. real property interests ("USRPIs") the fair market value of which equals or exceeds 50% of the sum of the fair market values of the corporation's interests in real property and trade or business assets. USRPIs generally include any interest in U.S. real property and any interest (other than solely as a creditor) in a domestic corporation that was a USRPHC in the preceding five years (or during the shareholder's holding period in shares of the USRPHC, if shorter).

If a foreign shareholder of the Fund is subject to tax for the reason identified in clause (i), above, the tax, withholding, and reporting requirements applicable to U.S. shareholders generally will apply to the foreign shareholder and an additional branch profits tax may apply if the foreign shareholder is a foreign corporation. If clause (i) is inapplicable but clause (ii), above, applies, such gains and distributions will be subject to federal income tax at a 30% rate (or such lower rate provided under an applicable income tax treaty). If clause (iii), above, applies, any distributions by the Fund to a foreign shareholder (including, in certain cases, distributions made by the Fund in redemption of its shares) attributable to gains realized by the Fund on the disposition of USRPIs or attributable to certain distributions received by the Fund from a

lower-tier regulated investment company or real estate investment trust, would be subject to U.S. tax withholding. In addition, such distributions could result in the foreign shareholder being required to file a U.S. income tax return and pay tax on the distributions at regular U.S. federal income tax rates. The consequences to a foreign shareholder, including the rate of withholding and the character of such distributions (e.g., as ordinary income or capital gain), would depend upon the extent of the foreign shareholder's current and past ownership of the Fund. In addition, if the Fund were a USRPHC or former USRPHC, it could be required to withhold U.S. tax on the proceeds of a share redemption by a greater-than-5% foreign shareholder, in which case such foreign shareholder generally would also be required to file U.S. tax returns and pay any additional taxes due in connection with the redemption.

Whether or not the Fund is characterized as a "qualified investment entity" will depend upon the nature and mix of the Fund's assets. Foreign shareholders should consult their tax advisors concerning the application of these rules to their investment in the Fund.

Certifications Requirements for Obtaining Reduced Treaty Rates of Withholding and Exemptions from Backup Withholding

In general, a foreign shareholder of the Fund that intends to qualify for a lower rate of withholding under an applicable U.S. income tax treaty must provide the Fund with proper document (generally on a Form W-8BEN or a Form W-8BEN-E) certifying its eligibility for treaty relief. Foreign shareholders should consult their tax advisors in this regard. Treaty relief is not available for excess inclusions received directly or indirectly from REMIC residual interests or from REIT TMPs that are allocated to Fund shareholders.

Distributions and redemption proceeds paid or credited to a foreign shareholder of the Fund are generally exempt from backup withholding. However, a foreign shareholder of the Fund may be required to establish that exemption by providing certification of foreign status on an appropriate Form W-8.

FATCA withholding on Distributions to Foreign Entities

Under the Foreign Account Tax Compliance Act (or "FATCA"), foreign financial institutions ("FFIs") or non-financial foreign entities ("NFFEs") that are shareholders of the Fund may be subject to a 30% withholding tax on certain distributions paid by the Fund. FATCA withholding is different from, and in addition to, the rules discussed above for withholding on distributions payable to Foreign Shareholders generally, withholding on certain redemptions and capital gain dividends, and backup withholding. The FATCA withholding tax generally may be avoided on payments to an: (a) FFI, if the FFI reports certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI, and (b) NFFE, if the NFFE: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reports information relating to them to the withholding agent (which may be the Fund). The U.S. Treasury has negotiated intergovernmental agreements (each, an "IGA") with certain countries and is in various stages of negotiations with other foreign countries with respect to one or more alternative approaches to implement FATCA. An entity in one of those countries may be required to comply with the terms of an IGA and applicable local law instead of U.S. Treasury regulations.

An FFI can avoid FATCA withholding by becoming a "participating FFI," which requires the FFI to enter into a tax compliance agreement with the IRS under section 1471(b) of the Code under which it agrees to verify, report and disclose certain of its U.S. accountholders and provided that such entity meets certain other specified requirements. The FFI will report to the IRS, or, depending on the FFI's country of residence, to the government of that country (pursuant to the terms and conditions of an applicable IGA and applicable law), which will, in turn, report to the IRS. An FFI that is resident in a country that has entered into an IGA with the U.S. to implement FATCA will be exempt from FATCA withholding provided that the FFI shareholder and the applicable foreign government comply with the terms of such agreement.

An NFFE that is the beneficial owner of a payment from the Fund can avoid FATCA withholding generally by certifying that it does not have any substantial U.S. owners or by providing the name, address and taxpayer identification number of each substantial U.S. owner. The NFFE will report to the Fund or other applicable withholding agent, which will, in turn, report information to the IRS.

FFIs and NFFEs also may fall into certain exempt, excepted or deemed compliant categories as established by U.S. Treasury regulations, IGAs, and other guidance regarding FATCA. An FFI or NFFE that invests in the Fund will need to provide the Fund with documentation properly certifying the entity's status under FATCA in order to avoid FATCA withholding.

Creation Units

As a result of U.S. federal income tax requirements, the Trust on behalf of the Fund, has the right to reject an order for a creation of Shares if the creator (or group of creators) would, upon obtaining the Shares so ordered, own 80% or more of the outstanding Shares of the Fund and if, pursuant to Section 351 of the Code, the Fund would have a basis in the Deposit Instruments different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination.

State and Local Tax Matters

Depending on the residence of the shareholders for tax purposes, distributions may also be subject to state and local taxation. Rules of state and local taxation regarding qualified dividend income, ordinary income dividends and capital gain dividends from regulated investment companies may differ from the rules of U.S. federal income tax in many respects. Shareholders are urged to consult their tax advisors as to the consequences of these and other state and local tax rules affecting investment in the Fund.

Most states provide that a regulated investment company may pass through (without restriction) to its shareholders state and local income tax exemptions available to direct owners of certain types of U.S. government securities (such as U.S. Treasury obligations). Thus, for residents of these states, distributions derived from the Fund's investment in certain types of U.S. government securities should be free from state and local income taxation to the extent that the interest income from such investments would have been exempt from state and local taxes if such securities had been held directly by the respective shareholders. Certain states, however, do not allow a regulated investment company to pass through to its shareholders the state and local income tax exemptions available to direct owners of certain types of U.S. government securities unless the Fund holds at least a required amount of U.S. government securities. Accordingly, for residents of these states, distributions derived from the Fund's investment in certain types of U.S. government securities may not be entitled to the exemptions from state and local income taxes that would be available if the shareholders had purchased U.S. government securities directly. The exemption from state and local income taxes does not preclude states from asserting other taxes on the ownership of U.S. government securities. To the extent that the Fund invests to a substantial degree in U.S. government securities which are subject to favorable state and local tax treatment, shareholders of the Fund will be notified as to the extent to which distributions from the Fund are attributable to interest on such securities.

Tax Shelter Reporting Regulations

If a shareholder realizes a loss on disposition of the Fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the Internal Revenue Service a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all regulated investment companies. The fact that a loss is reportable under these regulations does not affect the legal determination whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

Other Tax Matters

Special tax rules not described in this discussion apply to investments through defined contribution plans and other tax-qualified plans and to investments by tax-exempt entities. Shareholders should consult their tax adviser to determine the suitability of shares of the Fund as an investment through such plans or by such entities and the precise effect that an investment in the Fund would have on their particular tax situations.

The foregoing discussion relates solely to U.S. federal income tax law. Dividends and distributions also may be subject to state and local taxes. Shareholders are urged to consult their tax advisors regarding specific questions as to U.S. federal, state, local and, where applicable, foreign taxes. Foreign investors should consult their tax advisers concerning the U.S. federal income tax consequences of ownership of shares of the Fund and for more information on the certification and filing requirements imposed on foreign investors in order to qualify for exemption from the backup withholding tax rates (or a reduced rate of withholding provided by treaty).

General Considerations

The federal income tax discussion set forth above is for general information only. Prospective investors should consult their tax advisers regarding the specific federal tax consequences of purchasing, holding, and disposing of shares of each of the Fund, as well as the effects of state, local and foreign tax law and any proposed tax law changes.

OTHER INFORMATION

Capitalization

The capitalization of the Trust consists solely of an unlimited number of shares of beneficial interest, all without par value. The Board of Trustees may establish additional funds (with different investment objectives and fundamental policies) at any time in the future. Establishment and offering of additional funds will not alter the rights of the Trust's shareholders. When issued, shares are fully paid, non-assessable, redeemable and freely transferable. Shares do not have preemptive rights or subscription rights. In any liquidation of the Fund, each shareholder is entitled to receive his pro rata share of the net assets of that Fund.

Voting Rights

Under the Declaration of Trust, the Trust is not required to hold annual meetings of the Fund's shareholders to elect Trustees or for other purposes. It is not anticipated that the Trust will hold shareholders' meetings unless required by law or the Declaration of Trust. In this regard, the Trust will be required to hold a meeting to elect Trustees to fill any existing vacancies on the Board if, at any time, fewer than a majority of the Trustees have been elected by the shareholders of the Trust. In addition, the holders of not less than 51% of the outstanding shares of the Trust may remove persons serving as Trustee either by declaration in writing or at a meeting called for such purpose. The Trustees are required to call a meeting for the purpose of considering the removal of persons serving as Trustee if requested in writing to do so by the holders of not less than 10% of the outstanding shares of the Trust. To the extent required by applicable law, the Trustees shall assist shareholders who seek to remove any person serving as Trustee.

The Trust's shares do not have cumulative voting rights, so that the holders of more than 50% of the outstanding shares may elect the entire Board of Trustees, in which case the holders of the remaining shares would not be able to elect any Trustees.

FINANCIAL STATEMENTS

The audited financial statements and financial highlights of the Fund for the fiscal period ended March 31, 2024, as set forth in the Fund's [Annual Report](#) to shareholders, including the notes thereto and the report of the registered public accounting firm, are incorporated by reference into this SAI. You can obtain a copy of the Trust's Annual Report at no charge by calling 1.844.282.3837 (1.844.BTC.ETFs) or through the Trust's website at [/www.CyberHornetETFs.com](http://www.CyberHornetETFs.com).

DESCRIPTION OF RATINGS

The following descriptions are summaries of published ratings. Description of Commercial Paper Ratings

A-1 This is the highest category by Standard & Poor's Global Ratings ("S&P") and indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

A-1 Capacity for timely payment on issues with this designation is satisfactory and the obligation is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories.

PRIME-1 Issues rated Prime-1 (or supporting institutions) by Moody's Investors Service, Inc. ("Moody's") have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on funds employed.
- Conservative capitalization structure with moderate reliance on debt and ample asset protection.
- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.
- Well-established access to a range of financial markets and assured sources of alternate liquidity.

The rating F1 (Highest Credit Quality) is the highest commercial rating assigned by Fitch, Inc. ("Fitch"). Paper rated F1 is regarded as having the strongest capacity for timely payment of financial commitments. The rating F2 (Good Credit Quality) is the second highest commercial paper rating assigned by Fitch which reflects a satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.

The rating TBW-1 by Thomson BankWatch ("Thomson") indicates a very high likelihood that principal and interest will be paid on a timely basis.

Description of Municipal Note Ratings

Moody's highest rating for state and municipal and other short-term notes is MIG-1 and VMIG-I. Short-term municipal securities rated MIG-1 or VMIG-1 are of the best quality. They have strong protection from established cash flows, superior liquidity support, or demonstrated broad-based access to the market for refinancing or both. Short-term municipal securities rated MIG-2 or VMIG-2 are of high quality. Margins of protection are ample although not so large as in the MIG-I/VMIG-2 group.

An S&P note rating reflects the liquidity concerns and market access risks unique to notes. Notes due in three years or less will likely receive a note rating. Notes maturing beyond three years will most likely receive a long-term debt rating. The following criteria will be used in making that assessment:

- Amortization Schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note, and
- Source of Payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

S&P note rating symbols are as follows:

SP-1

Strong capacity to pay principal and interest. Those issues determined to possess a very strong capacity to pay a debt service is given a plus (+) designation.

SP-2

A-1

Satisfactory capacity to pay principal and interest with some vulnerability to adverse financial and economic changes over the term of the notes.

Description of Corporate Bond Ratings

S&P

Bonds rated AAA have the highest rating S&P assigns to a debt obligation. Such a rating indicates an extremely strong capacity to pay principal and interest. Bonds rated AA also qualify as high-quality debt obligations. Capacity to pay principal and interest is very strong, and in the majority of instances they differ from AAA issues only in small degree. Debt rated A has a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.

Debt rated BBB is regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher rated categories. Debt rated BB and B is regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal. BB indicates the least degree of speculation and C the highest degree of speculation. While such debt will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions. Debt rated BB has less near-term vulnerability to default than other speculative grade debt. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to inadequate capacity to meet timely interest and principal payments. The BB rating category is also used for debt subordinated to senior debt that is assigned an actual or implied BBB- rating. Debt rate B has greater vulnerability to default but presently has the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions would likely impair capacity or willingness to pay interest and repay principal. The B rating category also is used for debt subordinated to senior debt that is assigned an actual or implied BB or BB- rating.

Moody's

Bonds which are rated Aaa by Moody's are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edge." Interest payments are protected by a large, or an exceptionally stable, margin and principal is secure.

While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues. Bonds rated Aa by Moody's are judged by Moody's to be of high quality by all standards. Together with bonds rated Aaa, they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than the Aaa securities. Bonds which are rated A possess many favorable investment attributes and are to be considered as upper-medium grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment sometime in the future. Bonds which are rated Baa are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well. Bonds which are rated Ba are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future.

Uncertainty of position characterizes bonds in this class. Bonds which are rated B generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Moody's bond ratings, where specified, are applied to financial contracts, senior bank obligations and insurance company senior policyholder and claims obligations with an original maturity in excess of one-year. Obligations relying upon support mechanisms such as letters-of-credit and bonds of indemnity are excluded unless explicitly rated.

Obligations of a branch of a bank are considered to be domiciled in the country in which the branch is located. Unless noted as an exception, Moody's rating on a bank's ability to repay senior obligations extends only to branches located in countries which carry a Moody's sovereign rating. Such branch obligations are rated at the lower of the bank's rating or Moody's sovereign rating for the bank deposits for the country in which the branch is located.

When the currency in which an obligation is denominated is not the same as the currency of the country in which the obligation is domiciled, Moody's ratings do not incorporate an opinion as to whether payment of the obligation will be affected by the actions of the government controlling the currency of denomination. In addition, risk associated with bilateral conflicts between an investor's home country and either the issuer's home country or the country where an issuer branch is located are not incorporated into Moody's ratings.

Moody's makes no representation that rated bank obligations or insurance company obligations are exempt from registration under the 1933 Act or issued in conformity with any other applicable law or regulation. Nor does Moody's represent that any specific bank or insurance company obligation is legally enforceable or is a valid senior obligation of a rated issuer.

Moody's ratings are opinions, not recommendations to buy or sell, and their accuracy is not guaranteed. A rating should be weighed solely as one factor in an investment decision and you should make your own study and evaluation of any issuer whose securities or debt obligations you consider buying or selling.

Fitch

Bonds rated AAA by Fitch are judged by Fitch to be strictly high grade, broadly marketable, suitable for investment by trustees and fiduciary institutions liable to but slight market fluctuation other than through changes in the money rate. The prime feature of an AAA bond is a showing of earnings several times or many times interest requirements, with such stability of applicable earnings that safety is beyond reasonable question whatever changes occur in conditions. Bonds rated AA by Fitch are judged by Fitch to be of safety virtually beyond question and are readily salable, whose merits are not unlike those of the AAA class, but whose margin of safety is less strikingly broad. The issue may be the obligation of a small company, strongly secured but influenced as to rating by the lesser financial power of the enterprise and more local type market.

Bonds rated A are considered to be investment grade and of high credit quality. The obligor's ability to pay interest and repay principal is considered to be strong, but may be more vulnerable to adverse changes in economic conditions and circumstances than bonds with higher ratings.

Bonds rated BBB are considered to be investment grade and of satisfactory credit quality. The obligor's ability to pay interest and repay principal is considered to be adequate. Adverse changes in economic conditions and circumstances, however, are more likely to have adverse impact on these bonds, and therefore impair timely payment. The likelihood that the ratings of these bonds will fall below investment grade is higher than for bonds with higher ratings. Bonds rated BB are considered speculative. The obligor's ability to pay interest and repay principal may be affected over time by adverse economic changes. However, business and financial alternatives can be identified which could assist the obligor in satisfying its debt service requirements. Bonds rated B are considered highly speculative. While bonds in this class are currently meeting debt service requirements, the probability of continued timely payment of principal and interest reflects the obligor's limited margin of safety and the need for reasonable business and economic activity throughout the life of the issue.

Thomson

Bonds rated AAA by Thomson BankWatch indicate that the ability to repay principal and interest on a timely basis is extremely high. Bonds rated AA indicate a very strong ability to repay principal and interest on a timely basis, with limited incremental risk compared to issues rated in the highest category. Bonds rated A indicate the ability to repay principal and interest is strong. Issues rated A could be more vulnerable to adverse developments (both internal and external) than obligations with higher ratings.

Bonds rated BBB (the lowest investment-grade category) indicate an acceptable capacity to repay principal and interest. Issues rated "BBB" are, however, more vulnerable to adverse developments (both internal and external) than obligations with higher ratings.

While not investment grade, the BB rating suggests that the likelihood of default is considerably less than for lower-rated issues.

However, there are significant uncertainties that could affect the ability to adequately service debt obligations. Issues rated B show a higher degree of uncertainty and therefore greater likelihood of default than higher-rated issues. Adverse developments could negatively affect the payment of interest and principal on a timely basis.

ONEFUND TRUST PROXY VOTING POLICY

Proxy Voting Policy and Procedures

The ONEFUND TRUST (the “Trust”) has adopted the following Proxy Voting Policy and Procedures (the “Trust’s Policy”), as set forth below, in recognition of the fact that proxy voting is an important component of investment management and must be performed in a dutiful and purposeful fashion in order to advance the best interests of the Trust’s shareholders.

Shareholders of the Trust expect the Funds to vote proxies received from issuers whose voting securities are held by the Funds. The Trust exercises its voting responsibilities as a fiduciary, with the goal of maximizing the value of the Trust and its shareholder’s investments. Under the Trust’s Proxy Voting Policy, the Board has delegated proxy voting authority to ONEFUND, LLC (the “Adviser”). The Adviser will seek to ensure that proxies are voted in the best interests of the Trust and its shareholders except where the Trust may be required by law to vote proxies in the same proportion as the vote of all other shareholders (i.e., “echo vote”).

Delegation of Proxy Voting to the Adviser

The Adviser shall vote all proxies relating to securities held by the Trust and, in that connection subject to any further policies and procedures contained herein, shall use proxy voting policies and procedures (“Proxy Policy”) adopted by the Adviser in conformance with Rule 206(4)-6 under the Investment Advisers Act of 1940, as amended (“Advisers Act”).

Material Conflicts of Interest

If (i) the Adviser knows that a vote presents a material conflict between the interests of: (a) shareholders of the Trust, and (b) the Adviser or any of affiliated persons; and (ii) the Adviser proposes to vote on the particular issue in the manner not prescribed by its Proxy Policy, then the Adviser will follow the material conflict of interest procedures set forth in the Adviser’s Proxy Policy when voting such proxies.

Adviser and Trust CCO Responsibilities

The Trust has delegated proxy voting authority with respect to the Trust’s portfolio securities to the Adviser, as set forth above. Consistent with this delegation, the Adviser is responsible for the following:

- Implementing written policies and procedures, in compliance with Rule 206(4)-6 under the Advisers Act, reasonably designed to ensure that the Adviser votes portfolio securities in the best interest of shareholders of the Trust.
- Providing the Board and Trust CCO a summary of material changes made to the proxy policy during the period covered by the Adviser CCO’s annual compliance report, and a redlined copy of such Proxy Policy, as applicable.

Quarterly, per the Trust CCO’s request, the Adviser shall provide confirmation that proxy votes for the Trust were handled in compliance with the Proxy Policies.

Review Responsibilities

The Adviser may retain a proxy-voting service to coordinate, collect, and maintain all proxy-related information.

If the Adviser retains a proxy-voting service, the Adviser will review the Trust’s voting records maintained by the service provider, select a sample of proxy votes from those submitted, and examine them against the proxy voting service files for accuracy of the votes at least annually in regard to adhering to foregoing policy guidelines.

Board Reporting

At least annually, the Adviser shall present to the Board its policies, procedures and other guidelines for voting proxies. In addition, the Adviser shall notify the Board promptly of material changes to any of these documents.

With respect to any proxies that the Adviser or any third-party proxy voting firm hired by the Adviser has identified as involving a conflict of interest, the Adviser shall submit a report indicating the nature of the conflict of interest and how that conflict was resolved with respect to the voting of the proxy.

Preparation and Filing of Proxy Voting Record on Form N-PX

Each Fund will file its complete proxy voting record with the SEC on Form N-PX annually by August 31 of each year.

The Trust's Administrator(s) will be responsible for the oversight and completion of the filing of the Form N-PX required for each Series within the ONEFUND TRUST with the SEC.

The Trust's Administrator(s) will file Form N-PX for each twelve-month period ended June 30, and the filing for each year will be made with the SEC on or before August 31 of that year.

Recordkeeping

Documentation of all votes for the Trust will be maintained by the Adviser, and through a third-party proxy voting service, as applicable.

Adopted: April 9, 2015

Amended: June 11, 2021, December 15, 2023
